

Index

- 2-star, 28
- actor, 18, 19
- actor centrality, *see* degree centrality;
 - closeness centrality; betweenness centrality
- Adamic-Adar, 122
- adjacency matrix, 22
- affiliation network, 24, 25, 73
- aspect, 26
- association rule, 125
- assortativity, 63, 64, 133, 156
- attributed network, 9
- AUCS network, 34, 36, 38, 39, 45, 46, 47*f*,
 - 50*f*, 50, 55*f*, 55, 62, 77, 78, 81, 82, 83*f*, 84, 85, 87, 90*f*, 90, 91*f*, 100, 102*f*, 103, 125, 126, 126*t*, 127, 128, 134, 141, 156
- betweenness, 9
- betweenness centrality, 38, 44, 51, 54–56
- bipartite network, 24, 113
- block matrix, 84
- boundary specification, 68, 69
- cascading effect, 27
- catalyst network, 95
- centralization, 39
- clique, 6, 104–107
- closeness centrality, 44, 51, 54, 55
- cluster, 97
- clustering coefficient, 38–40, 133, 135, 156, 163
- cohesive subgroup, 97
- community, 96
- community detection, 6, 8–10, 96–118, 173–174
- community evaluation, 113–118
- confidence, 127
- configuration, 28
- configuration model, 137–139
- connection, 4
- connective redundancy, 48
- critical condition, 157
- cultural atom, 24
- data collection, 9, 67–73
- data transformation, 67, 68
- degree, 133
- degree centrality, 9, 38, 43–45, 48, 49, 54
- degree deviation, 45, 46
- degree distribution, 134, 155
- density, 39
- diameter, 39
- diffusion, *see also* epidemic; opinion diffusion,
 - 3, 8–10, 149–165, 172, 173, 175
- disassortativity, 63, 64, 133
- distance, *see* geodesic distance
- dyad, 43
- dynamical processes, *see* diffusion;
 - formation
- edge, 18, 19
- edge assignment models, 135
- edge censoring, 70
- edge co-occurrence graph, 84
- edge-typed multigraph, 22, 35
- epidemic, 10, 151, 153
- Erdős-Rényi model, 28, 137, 145, 157, 159
- ERGM, 28, 29*f*, 29, 31, 32, 129
- evolution, *see* formation
- exclusive neighborhood, 48
- exclusive relevance, 58

- exclusivity, 116
 exponential random graph model, *see* ERGM

 fads, 155
 fixed-choice effect, 68, 70
 Flatland, 1, 3, 4, 15, 38, 67, 79, 96, 119, 133, 149, 169, 177
 flattening, 10, 39, 73–75, 100
 formation, 10, 133–148

 game theory, 165
 geodesic distance, 9, 50, 53*t*, 55
 giant component, 152
 global simplification, 73, 77
 gossip, 155
 graph theory, 15

 heterogeneous information networks, *see* HIN
 HIN, 8, 9, 25, 27, 35, 95, 124
 homogeneity, 116
 homophily, 134, 150
 hybrid network, 34, 36, 37

 identity resolution, 72–73
 igraph, 91*f*
 inter-layer assortativity, 92
 interlayer edge, 18
 interconnected networks, 27
 interdependence, 56
 interlayer assortativity, 63, 63*t*, 64, 64*t*
 intralayer edge, 18
 invisible relationships, 3, 7

 Jaccard correlation, 62, 83*f*, 84
 Jaccard Index, 115, 117

k-core, 80*f*, 81

 layer, 18, 19
 layer correlation, 9, 10, 15, 16, 20, 61, 82, 119, 125–129
 layer interdependency, 16
 layer similarity, *see* layer correlation
 lift, 127
 link, 4
 link prediction, 10, 119–125
 local simplification, 74, 77, 78
 longitudinal study, 27

 many-to-many relationships, 26, 36
 mechanic society, 96
 meta-path, 124

 missing data, 6, 9, 68–72, 171
 missing responses, 71
 ML model, 26
 modularity, 9, 99, 108*f*, 108–111, 112*f*, 112, 113, 116
 multidimensional censoring, 70
 multidimensional network, 9, 16, 21
 multigraph, 87, 93
 multilevel network, 23–25, 31
 multimode network, 23
 multirelational network, 21, 35
 multitype network, 25
 multilayer network model, 5, 9, 18, 19, 26, 35
 multilayer social network
 communities, *see* community detection
 data collection, *see* data collection
 formation, *see* formation
 link prediction, *see* link prediction
 model, *see* multilayer network model
 preprocessing, *see* preprocessing
 sampling, *see* sampling
 visualization, *see* visualization
 multipartite network, 75
 multiplex network, *see also* multiplexity, 9, 16, 21, 22*f*, 22, 23, 27, 31, 73, 87, 97, 134, 171
 multiplex tie, 21
 multiplexity, *see also* multiplex network, 15, 16, 21*f*, 22, 23, 42, 48, 85, 97, 107

 neighborhood centrality, 9, 43, 47, 48
 network evolution, 133
 network formation, 133, 134
 network growth models, 10, 135
 network of networks, 8, 16, 26, 27, 164
 network schema, 25, 27
 network simplification, 68
 network statistics, 29
 networked society, 2
 node, 18, 19
 node censoring, 70
 node-colored network, 25

 occupation centrality, 49
 online social network, *see* OSN
 opinion diffusion, 10
 organic society, 96
 OSN, 5, 7, 19, 26, 32, 35, 37, 68, 71–73, 98, 151, 161, 172
 other models, *see* attributed network; HIN; multidimensional network; multiplex network; network of networks

- parallel coordinates, 82
- path, 41*f*, 41, 42, 50, 51, 52*f*, 52–54, 56, 57
- path count, 124
- path length, 40*t*, 51, 56
- percolation, 10
- phase diagram, 152
- phase transition, 10
- preferential attachment, 134, 138, 139, 141, 144–147
- preprocessing, *see* flattening; simplification
- projection, 24, 73–76

- quasi-clique, 106

- random graph, *see also* Erdős-Rényi model, 28
- random walk, 40, 41*f*, 41, 49
- random walk betweenness centrality, 54
- random walk closeness centrality, 54
- ranked sociogram, 90, 92*f*
- redundancy, 100, 116
- relational tie, 4
- relevance, 9, 38, 57, 61, 82, 93
- respondent inaccuracy, 71

- sampling, 9, 67, 68, 70–71
- shortest path, 50, 51, 53, 53*t*, 54–56
- simple graph, 4, 18
- simplification, 10, 92, 93, 95
- single-layer network, 18, 19
- SIR model, 154*f*, 154–157

- SIS model, 154*f*, 154–156, 159
- small world, 135
- snowball sampling, 71
- social aggregator, 32
- social atom, 24
- social media aggregators, 71
- sociogram, 80, 81, 90, 92, 93
- spreading, *see* diffusion
- strength of ties, 22, 23
- substrate network, 95

- teleportation, 41
- temporal network, 18, 27
- threshold model, 162, 164
- trade network, 28
- transitivity, 9
- transmissibility, 158
- triad, 43, 128
- triangle, 28, 128
- two-mode network, 24, 25, 75, 76*f*, 113, 123

- variety, 116
- vertical boundary specification problem, 69
- visualization, 10, 79, 80*f*, 81, 82, 83*f*, 84, 87, 90*f*, 90, 92, 93, 95, 172–173
- voter model, 165

- weight, 4, 39, 40, 42, 44, 47, 49, 53, 74, 76

- xrelevance, 93
