

## Index

- Adsorbed phase diffusivity 238
- Adsorption isotherm 7, 63, 144
- Adsorption kinetics 257
- Amino acid 116, 166, 178, 185
- Axial dispersion 14, 28, 40, 322
  
- Band broadening 83
- Batch method 193, 231, 292
- Bed compression factor 348
- Breakthrough curve 11, 71
- Buffer 190
  
- Capture 503, 505
- Cation exchanger 161, 266
- Characteristic time 37, 219, 222, 225
- Characteristic path 89
- Characteristics 89
- Coherence 94, 95
- Column efficiency 39, 282
- Competitive adsorption 155, 199
- Complexation 159, 175, 420
- Compressibility factor 325
- Compressive front 70
- Critical bed compression factor 348
- Critical velocity 348
  
- Danckwerts 400
- Darcy 318
- Dead volumes 21, 42
- Detector 43
- Dispersive wave 69
- Displacement 62, 116, 373, 500
  
- Eddy diffusion 321
- Effective diffusion 228
- Electrical double layer 169, 268
- Equilibrium model 67, 417
- Equilibrium theory 67
- External diffusion 216
- External mass transfer 217
- External porosity 3
- Extra column 43, 583
- Extract 468
- Extragranular porosity 3
  
- Fast Fourier transform 612
- Favorable lumped adsorption isotherms 64
- Fick 14, 217, 221
- Fluid mobile phase 3
- Fronting 62, 120
  
- Generalized lumped adsorption isotherm 64, 66
- Gradient 190, 505, 595
  
- Henry's coefficient 9
- HETP 39
- Hodograph 88
- Hydrodynamic dispersion 14, 27, 321
  
- Ideal model 17
- Ideal system 18
- Injection signal 43
- Interference 77
- Internal diffusion 216
- Internal porosity 3
- Intragranular fluid 3
- Intragranular porosity 3
- Invariant 182
- Inversed size exclusion 142
  
- James–Martin 327
  
- Kozeny–Kármán 318
  
- Langmuir 64, 147
- Laplace transform 25
- Linear driving force (LDF) 225
- Linearly modified Langmuir adsorption isotherm 65
- Loading factor 110
- Lumped concentration 5
- Lumped diffusion coefficient 222
- Lumped Henry's coefficient 35
- Lumped model 140
- Lumped solid 5
  
- Macropores 253
- Maxwell–Boltzmann 169
- Maxwell–Stefan 301
- Mercury intrusion porosimetry 143

- Micropores 253  
Mixing cells 14, 27  
Moments 23
- Nitrogen sorptometry 143  
Non-linearity factor 395  
Number of mixing cells 14  
Number of plates 14
- Particle size distribution 370  
Partition law 8  
Péclet number 28, 40, 256  
Perfusion 256  
Permeability 318  
Phenomenological model 178, 419  
Pore size 143, 177, 258  
Porosity 140  
Porous model 140  
Pressure drop 318  
Primary group 520  
Productivity 512  
Purity 511
- Radial dispersion 324, 377  
Radial temperature profiles 357, 364  
Radial velocity profiles 360, 362, 364  
Rate-controlling step 271  
Reduced units (HETP) 283  
Reduced velocity 283  
Refolding 178  
Residence time distribution 23  
Retention factor 12
- Retention time distribution 23  
Reynolds number 219
- Saturation capacity 147  
Schmidt number 219  
Secondary group 520  
Selectivity 107, 113  
Self-broadening front 69  
Sensor 42  
Sherwood number 219  
Shielding factor 167  
Shift time 477  
Shock wave 70, 71  
Simple wave 69  
Simulated moving bed 439  
Size exclusion 8, 142, 177  
Skewness 25  
Solid-phase skeleton 3  
Steric hindrance 167, 237, 409  
Stiffness 428  
Stoichiometric 117, 118, 178  
Superficial fluid velocity 28  
Surface resolution 393
- Tortuosity 237  
Total porosity 7, 140  
Transfer function 20, 25  
True moving bed 438
- Unfavorable lumped adsorption isotherm 64
- Van Deemter 47, 280  
Viscous fingering 373
