States of Consciousness extends Thomas Natsoulas’s development of the psychology of consciousness by giving sustained attention to the stream of consciousness and its component “pulses of experience.” Natsoulas’s unrivaled scholarship across psychology, philosophy, and cognate fields means that very often surprising connections are made between the works of leading theorists of consciousness, including Brentano, Mead, Bergmann, Strawson, James, Freud, Skinner, Hebb, Gibson, O’Shaughnessy, and Woodruff Smith. At a time when interest in consciousness and the brain is growing rapidly, this book provides an in-depth analysis of sophisticated psychological accounts that pertain to consciousness. Its breadth of coverage and interdisciplinary nature will be of interest to postgraduates and specialists in a range of fields, particularly the history of psychology and philosophy of mind.

THOMAS NATSOULAS is Emeritus Professor of Psychology at the University of California, Davis, and a fellow of the Association for Psychological Science and the American Psychological Association. He is the author of Consciousness and Perceptual Experience (Cambridge, 2015) and The Conceptual Representation of Consciousness (Cambridge, 2015).
