Reshaping Markets

Set against the origins and consequences of the global financial crisis, this timely book offers an enriching and revealing narrative of the role that the state plays in regulating markets. Focusing on core areas of private law such as corporate, labour and banking law, the contributors offer a conceptual framework in which to examine the central tenets of the role of private law in today’s global economy. In the current climate of ever-increasing economic inequality and austerity measures, the authors highlight the urgent need for a comprehensive analysis of the continuing tension between ideas of market liberalism and theories of society. With a focus on both the domestic and transnational dimensions of market governance, the authors offer a crucial insight into the co-existence and interaction between state and market-based economic governance.

BERTRAM LOMFELD is Professor of Private Law and Legal Philosophy at Free University of Berlin.

ALESSANDRO SOMMA is Professor of Comparative Law at the University of Ferrara, Italy.

PEER ZUMBANSEN is the inaugural Professor of Transnational Law at The Dickson Poon School of Law, King’s College, London, where he directs the Transnational Law Institute.

LARRY CATÁ BACKER is W. Richard and Mary Eshelman Faculty Scholar and Professor of Law & International Affairs at the Pennsylvania State University. He is the founder and director of the Coalition for Peace & Ethics, and has visited at the University of California, Hastings, College of the Law and Tulane Law School. His research focuses on governance-related issues of globalization and the constitutional theories of public and private governance, with a focus on institutional frameworks where public and private law systems converge. He runs the essay site ‘Law at the End of the Day’ under http://lcbackerblog.blogspot.com.

DAVID CAMPBELL is Professor of International Business Law in the School of Law, University of Leeds, UK, a Fellow of the Chartered Institute of Arbitrators and has taught at a number of British universities and in Australia, Hong Kong, New Zealand, Spain and the USA. He has written on a wide range of legal and social scientific issues in leading UK, Commonwealth and US journals. His main current research interests are in remedies for non-performance of contractual obligations and in regulatory theory, and particularly in the development of a ‘non-Chicagoan’ law and economics of these subjects.

DANIELA CARUSO is Professor for Contract and European Union law at Boston University School of Law and has taught at Kilachand Honors College, Harvard Law School, Oxford, London School of Economics, Pisa and Amsterdam. In her EU Law publications, she has focused on private law as a particularly effective tool for analysing the political transformation of supranational institutions. She has also written on equality and federalism, on the implications of European integration for state-based social legislation, and on regional policies. In matters of contract law, her articles have dealt with the distributive impact of pseudo-contractual mechanisms in the delivery of special education services, and with the links between contract doctrines and welfare reform in domestic and comparative perspectives. Her pro bono work concerns special education law and residential mental health units.
