bilingualism, 164–165
binary semantic feature analysis, 31–35, 52
Boroditsky, Lera, 136, 159–160
bound morphemes, 14–17
brain damage, language impairments and, 45
brain imaging, 47–48
Brown, Roger, 20
Cangelosi, Angelo, 75
canonical antonyms, 123, 137
Carnap, Rudolf, 57
cataphor, 244, 259
categories/categorization, 78, 86–90, 105–106
    classical version, 90–91
exemplar theories of, 95
Lakoff’s view on, 92–93
Rosch’s prototypical approach, 93–95
vs. concept, 99–100
Wittgenstein’s view on, 91–92
category specific impairments, 45
Chinese, 154, 162
Chinese Room Argument, 63–64, 76
closed-class words, 18–19
cognitive development vs. linguistic development, 151–152
cognitive semantics, 37, 38, See also embodied
cognitive science, 30
colligation, 131–132, 137
collocation, 130–131, 137
colloccational range, 131
colour(s), 68
categorical perception, 155–157
connotations of, 102
combined words, and change in meaning, 133–135
commercial transaction frame, 225–227
commisive speech acts, 256
common ground, 245–247, 259
communicative intention, 236, 249–250
complex metaphors, 180–181
compositionality, 20
computational modelling, 49–51
computationalism/computational theory of
mind, 61
conceptual contingency, 190
conceptual knowledge of the world, 150
conceptual metaphor, 162, 173–175, 178–179
source domain and target domain, 174–175, 179, 182, 194, 195–196
vs. metaphorical expression, 175
Conceptual Metaphor Theory (CMT), 72, 173, 196–197
criticisms, 194–196
conceptual metonymy, 189–191
connotation, 101–105
Construction Grammar theory, 21–22, 216–217
construction meaning, 21–22
container image-schema, 186
content, 208, 209
context, 235–237
discourse, 242–243
shared/common knowledge as, 248
spatio-temporal, 242
