	<i>Acknowledgments</i>	xiii
	Introduction	1
1	Models for Homotopy Theories	4
	1.1 Some Basics in Category Theory	4
	1.2 Weak Equivalences and Localization	13
	1.3 Classical Homotopy Theory	16
	1.4 Model Categories	18
	1.5 Homotopy Categories	22
	1.6 Equivalences Between Model Categories	25
	1.7 Additional Structures on Model Categories	28
2	Simplicial Objects	34
	2.1 Simplicial Sets and Simplicial Objects	34
	2.2 Simplicial Sets as Models for Spaces	37
	2.3 Homotopy Limits and Homotopy Colimits	39
	2.4 Simplicial Model Categories	42
	2.5 Simplicial Spaces	45
	2.6 The Reedy Model Structure on Simplicial Spaces	47
	2.7 Combinatorial Model Categories	54
	2.8 Localized Model Categories	56
	2.9 Cartesian Model Categories	63
3	Topological and Categorical Motivation	66
	3.1 Nerves of Categories	66
	3.2 Kan Complexes and Generalizations	68
	3.3 Classifying Diagrams	71
	3.4 Higher Categories	74
	3.5 Homotopy Theories	78

4	Simplicial Categories	83
4.1	The Category of Small Simplicial Categories	83
4.2	Fixed-Object Simplicial Categories	84
4.3	The Model Structure	86
4.4	Proof of the Existence of the Model Structure	88
4.5	Properties of the Model Structure	96
4.6	Nerves of Simplicial Categories	99
5	Complete Segal Spaces	101
5.1	Segal Spaces	102
5.2	Segal Spaces as Categories Up to Homotopy	107
5.3	Complete Segal Spaces	110
5.4	Categorical Equivalences	113
5.5	Dwyer–Kan Equivalences	116
6	Segal Categories	124
6.1	Basic Definitions and Constructions	125
6.2	Fixed-Object Segal Categories	130
6.3	The First Model Structure	138
6.4	The Equivalence With Complete Segal Spaces	145
6.5	The Second Model Structure	148
6.6	The Equivalence With Simplicial Categories	151
7	Quasi-Categories	157
7.1	Basic Definitions	157
7.2	Properties of Acyclic Cofibrations	160
7.3	The Model Structure	166
7.4	The Coherent Nerve and Rigidification Functors	171
7.5	Necklaces and Their Rigidification	173
7.6	Rigidification of Simplicial Sets	179
7.7	Properties of the Rigidification Functor	187
7.8	The Equivalence With Simplicial Categories	194
7.9	The Equivalence With Complete Segal Spaces	207
8	Relative Categories	213
8.1	Basic Definitions	213
8.2	Subdivision Functors	218
8.3	The Model Structure and Equivalence With Complete Segal Spaces	221
9	Comparing Functors to Complete Segal Spaces	233
9.1	Classifying and Classification Diagrams	234
9.2	Some Results for Simplicial Categories	236

	<i>Contents</i>	ix
	9.3 Comparison of Functors	239
	9.4 Complete Segal Spaces From Simplicial Categories	242
10	Variants on $(\infty, 1)$-Categories	248
	10.1 Finite Approximations	248
	10.2 Stable $(\infty, 1)$ -Categories	251
	10.3 Dendroidal Objects	254
	10.4 Higher (∞, n) -Categories	256
	<i>References</i>	261
	<i>Index</i>	267
