Deciding how best to nurture creativity in our schools has become more complicated as interest in creativity has exploded. There are controversial Common Core strictures in many states; at the same time, the classroom has become increasingly digital, making it easier to access information, communicate ideas, and learn from people across the world. Many countries now include cultivating creativity as a national educational policy recommendation, yet there is still debate over best practices. Many well-intentioned educators may be instituting programs that do not reach the desired outcome, and the notion that schools “kill creativity” has become widespread. This belief is both hyperbolic and problematic: it allows us to recognize a problem but not solve it. In this book, an international group of experts in the field addresses these issues, discussing theories and research that focus on how to nurture creativity in both K–12 and college-level classrooms.

RONALD A. BEGHELTO is Professor of Educational Psychology in the Neag School of Education at the University of Connecticut. Prior to joining the faculty at UConn, Dr. Beghetto served as the College of Education’s Associate Dean for Academic Affairs and Associate Professor of Education Studies at the University of Oregon. He is the Editor-in-Chief for the Journal of Creative Behavior and serves as an associate editor for the International Journal of Creativity and Problem Solving. He also serves on the editorial boards of Psychology of Aesthetics, Creativity, and the Arts; the Journal of Educational Research; Gifted Child Quarterly; and Creativity Studies. Dr. Beghetto is a Fellow of the American Psychological Association and the Society for the Psychology of Aesthetics, Creativity, and the Arts (Division 10, APA). He has also received numerous awards for excellence in research and teaching.

JAMES C. KAUFMAN is Professor of Educational Psychology at the University of Connecticut. An internationally recognized leader in the field of creativity, he is the author or editor of more than 35 books, including Creativity 101 and The Cambridge Handbook of Creativity. Kaufman is a past president of the American Psychological Association’s Division 10, devoted to creativity. He coedit the International Journal of Creativity and Problem Solving and cofounded two APA journals. He has won the Torrance Award from the National Association for Gifted Children, the Berlyne and Farnsworth Awards from the APA, and Mensa’s Award for Excellence in Research.
CURRENT PERSPECTIVES IN SOCIAL AND BEHAVIORAL SCIENCES

Current Perspectives in Social and Behavioral Sciences provides thought-provoking introductions to key topics, invaluable to both the student and scholar. Edited by world’s leading academics, each volume contains specially commissioned essays by international contributors, which present cutting-edge research on the subject and suggest new paths of inquiry for the reader. This series is designed not only to offer a comprehensive overview of the chosen topics but also to display and provoke lively and controversial debate.

Also in this series:
Reflections on the Learning Sciences edited by Michael A. Evans, Martin J. Packer, and R. Keith Sawyer
Mindfulness and Performance edited by Amy L. Baltzell

Forthcoming titles:
Research and Theory on Workplace Aggression edited by Nathan A. Bowling, and M. Sandy Hershcovich
Genetics, Ethics and Education edited by Susan Bourey, Elena L. Grigorenko, Stephen R. Latham, and Mei Tan
Teacher Motivation edited by Helen Watt, Paul Richardson, and Kari Smith
The Cambridge Companion to Culture, Mind, and Brain: Emerging Concepts, Methods, Applications edited by Laurence J. Kirmayer, Marie-Françoise Chesselet, Shinobu Kitayama, Carol M. Worthman, and Constance A. Cummings
NURTURING CREATIVITY IN THE CLASSROOM

SECOND EDITION

RONALD A. BEGHETTO

PART I VOICES FROM THE FIELD

1. Changing the Subject
   Larry Rosenstock and Rob Riordan 3

2. Creativity and the Invention Convention
   Jake Mendelssohn 6

3. Creativity and Shifting Roles of an Educational Leader:
   A Reflection of What Creativity Used to Mean to Me
   and What It Means Now
   Larry Audet 12

4. What I Used to Think about Creativity in Schools
   Tim Patston 17

PART II VOICES FROM THE RESEARCH

5. Developing Creativity Across All Areas of the Curriculum
   Joseph Renzulli 23

6. Accountability, the Common Core, and Creativity
   John Baer and Tracey Garrett 45

7. Ever-Broadening Conceptions of Creativity in the Classroom
   Ronald A. Beghetto and James C. Kaufman 67

8. Creativity in Mathematics Teaching: A Chinese Perspective
   (An Update)
   Weihua Niu and Zheng Zhou 86
Contents

9. Roads Not Taken, New Roads to Take: Looking for Creativity in the Classroom
   Thomas Skiba, Mei Tan, Robert J. Sternberg, and Elena L. Grigorenko
   108

10. The Five Core Attitudes and Seven I’s of the Creative Process
    Jane Piirto
    131

11. Creativity Embedded into K–12 Teacher Preparation and Beyond
    Fredricka K. Reisman
    162

12. Attitude Change as the Precursor to Creativity Enhancement
    Jonathan A. Plucker and Gayle T. Dow
    190

13. Nurturing Creativity in the Engineering Classroom
    David H. Cropley
    212

14. Intrinsic Motivation and Creativity in the Classroom: Have We Come Full Circle?
    Beth A. Hennessey
    227

15. Learning for Creativity
    R. Keith Sawyer
    265

16. Creativity and Prosocial Values: Nurturing Cooperation within the Classroom
    Vlad Petre Glăveanu, Angela Branco, and Monica Souza Neves-Pereira
    287

17. How Social-Emotional Imagination Facilitates Deep Learning and Creativity in the Classroom
    Rebecca Gotlieb, Erik Jahner, Mary Helen Immordino-Yang, and Scott Barry Kaufman
    308

18. Four Faces of Creativity at School
    Maciej Karwowski and Dorota M. Jankowska
    337

19. Teaching for Creativity
    Robert J. Sternberg
    355

20. A Coda for Creativity in the Classroom: Take-Home Points and Final Insights
    James C. Kaufman and Ronald A. Beghetto
    381

Preface

Continuing to Nurture Creativity in the Classroom

The first edition of Nurturing Creativity to the Classroom was published in 2010. Although less than a decade has passed, much has happened in the worlds of education and creativity. We’ve seen the Common Core Standards implemented in many states, eliciting emotional reactions both in favor of and against these ideas. The classroom (and world) has become increasingly digital; it is easier than ever to access information, communicate ideas, and learn from people across the world. New voices have emerged and new research and theories have added to the discussion.

We have also seen interest in creativity explode over the past few years. Creativity has become an international educational priority. Many countries have included cultivating creativity in their national educational policy recommendations. This recognition of the importance of creativity has also come with increased concern that many schools are ill-equipped to nurture students’ creative potential. In fact, the notion that schools “kill creativity” has become a widespread social meme. We view such beliefs as both hyperbolic and problematic. Although it is true that some educational contexts might suppress students’ willingness to take the risks necessary for creativity, schools can’t really kill creativity. Indeed, opportunities for supporting creativity are ever-present. Often what is needed is simply recognizing and capitalizing on those opportunities.

The ideas shared in the new addition of this book have the goal of helping educators and researchers nurture creativity in K–12 and college-level classrooms. The chapters in this edition represent a blend of old and new. Some of the chapters are updated from the first edition, some are vastly rewritten, and some are brand-new chapters written expressly for the second edition. We also have four new brief essays to open the book from educators working in the field who have accomplished remarkable feats at incorporating creativity into the classroom. The book concludes with a rewritten coda of both classic and new take-home points.

Preface

As we wrote in the first preface, we have dual roles of being professors and fathers. As we have watched Olivia, Jacob, and Asher explore and develop their own creativity, the importance of an educational system that values creativity has become increasingly salient. Our children have an advantage in that their fathers value creativity (perhaps too much!). Like so many other parents, we are committed to providing diverse learning opportunities for our children. However, this commitment is not enough.

Sometimes the well-intended parenting and educational practices backfire or get in the way of supporting creativity. In some cases, more guidance and structure is needed to help young people anchor their originality to the given set of task constraints for a particular activity. In other cases, it may be most helpful to get out of the way and allow young people to express their originality in their own unique way. Striking this balance is an ongoing challenge. There are no simple recipes for how best to accomplish it. One key is recognizing that it is a dynamic process. It is a process that often requires blending timely support and encouragement with guidance and awareness of real-world constraints.

It is our hope that this book inspires educators, parents, and researchers to ensure that all students have an opportunity to find, nurture, and sustain their creative potential. We are excited to present an updated and revised edition of this book. We hope that you will enjoy and draw as much insight and inspiration from these essays as we have.
Acknowledgments

The authors would like to give very special thanks David Repetto of Cambridge University Press for his interest, patience, encouragement, and constant support; Paul J. Barnett for editorial assistance; and our colleagues and friends at the University of Connecticut. Love to Jeralyn and Olivia and to Allison, Jacob, and Asher.
