

The Cambridge Handbook of Acculturation Psychology

Research and practice in the field of acculturation psychology is continually on the rise. Featuring over 50 leading experts in the field, this handbook compiles and systemizes the current state of the art by exploring the broad international scope of acculturation. The collection introduces readers to the concepts and issues; examines various acculturating groups (immigrants, ethnic minorities, indigenous peoples, expatriates, tourists, refugees, and asylum seekers); highlights the global contexts for acculturation in a variety of societies; and focuses on acculturation of a number of special groups, such as young people, the workplace, and outcomes for health and well-being. This comprehensive new edition addresses major world changes over the last decade, including the increase in global migration, religious clashes, and social networking, and provides updated theories and models so that beginners and advanced readers can keep abreast of new developments in the study of acculturation.

DAVID L. SAM is Professor of Cross-cultural Psychology at the University of Bergen, Norway.

JOHN W. BERRY is Emeritus Professor of Psychology at Queen's University, Kingston, Canada, and Research Professor in the National Research University Higher School of Economics, Moscow, Russia.

Notes on the contributors

AMINA ABUBAKAR is a psychologist with background training in cross-cultural, educational and pediatric psychology. In 2008, she received her doctorate from Tilburg University in The Netherlands. Dr. Abubakar currently works as a Marie Curie fellow at Lancaster University, United Kingdom. Her main research areas are in understanding the interaction between biomedical and psychosocial risk in shaping developmental outcomes of children, especially those in Sub-Saharan Africa. Additionally she is interested in investigating the impact of contextual factors (e.g., immigration, ethnicity, familial and peer influences) on well-being (mental health, life satisfaction and identity formation) among adolescents. She has received support for her work through various funding agencies including the National Institutes of Health (USA), the Netherlands Research Organization, the European Research Agency, the Thrasher Foundation (USA) and the Jacobs Foundation (Switzerland).

BYRON G. ADAMS is an industrial psychologist from Johannesburg in South Africa. He is currently a National Research Foundation (NRF, South Africa) postdoctoral research fellow in cross-cultural psychology at Tilburg University in The Netherlands. In addition, he is a senior research associate at the University of Johannesburg, South Africa, where he teaches research methodology, organizational behavior and career and personnel psychology at both undergraduate and postgraduate levels. While his broad research interests include personality, psychological assessment, transformation and organizational behavior he has a more specific interest in identity, and its associations with acculturation, intergroup relations and well-being, especially in non-Western contexts.

VERÓNICA BENET-MARTÍNEZ is currently an ICREA full professor in the department of political and social sciences at Universitat Pompeu Fabra (UPF), Barcelona, Spain. Before joining ICREA and UPF, she held faculty positions at the University of California, Riverside, and the University of Michigan, Ann Arbor, and was a funded postdoctoral fellow at the University of California, Berkeley. She obtained a PhD in social-personality psychology from the University of California, Davis. She has been an associate editor for the *Journal of personality and social psychology* and also an editorial board member for several top-tier personality, social and cross-cultural psychology journals. She has published extensively in the areas of (cross)cultural, social and personality psychology, including coediting *The*

Oxford handbook of multicultural identity. Her main research interests are in the areas of multicultural identity and experiences, and cultural influences in social and personality processes.

YOAV S. BERGMAN obtained his PhD from Bar-Ilan University, Israel, and has recently completed his postdoctoral fellowship at the Hebrew University in Jerusalem. He has published several articles which focus on negative attitudes toward older adults, as well as on other social groups in Israel. His main research interests include the moderating effects of personality characteristics on acculturation processes, and cross-cultural differences in attitudes toward older adults and the aging process.

TRACY BERNO is Associate Professor at Lincoln University in New Zealand. Tracy teaches in the areas of research methods and international development. Her research interests in cross-cultural psychology are in the area of tourism and include the cross-cultural adjustment of both tourists and host nationals. Much of Tracy's research is undertaken in the Pacific islands, where she is Adjunct Associate Professor at the University of the South Pacific.

JOHN W. BERRY is Professor Emeritus of Psychology at Queen's University, Kingston, Canada, and Research Professor, National Research University Higher School of Economics, Moscow, Russian Federation. He obtained his BA from Sir George Williams University, Montréal, and his PhD from the University of Edinburgh. He has received honorary doctorates from the University of Athens, and Université de Geneve, and a Lifetime Achievement Award from the International Academy for Intercultural Research. He has published over thirty books in the areas of cross-cultural, social and intercultural psychology, including coauthoring the textbook *Cross-cultural psychology: research and applications*. His main research interests are in the areas of acculturation and intercultural relations, with an emphasis on applications to immigration, educational and health policy.

DINA BIRMAN is Associate Professor and Director of the Community Well-Being PhD Program in the School of Education at the University of Miami. Dr. Birman has conducted research on acculturation, adaptation and interventions for adolescent, adult and elderly refugees and immigrants in the United States, including those from the former Soviet Union, Central America, Somalia and Vietnam. As a community psychologist, she explores these topics from an ecological/contextual perspective. She is Editor-in-Chief of the *International journal of intercultural relations*, and serves on editorial boards of *American journal of community psychology* and *Journal of community and applied social psychology*.

RUPERT BROWN is Professor of Social Psychology, University of Sussex in the United Kingdom. He works in the area of intergroup relations. Within this general area he has three specific research interests. The first is the antecedents of prejudice and social psychological interventions that may reduce it. A second area is acculturation – how different cultural groups mutually accommodate each other,

especially in immigration contexts. A third area is hate crime, particularly its indirect effects on members of the victims' community.

OZGUR CELENK completed her doctoral studies in Tilburg University, The Netherlands. Her research mainly focuses on couple dynamics and the particular role of culture, ethnicity and acculturation in understanding various dynamics in couple relationships. She is also interested in the assessment of acculturation across different domains and groups.

SYLVIA DANTAS is a social and clinical psychologist and professor at São Paulo Federal University UNIFESP in Brazil. She obtained her BA in psychology at Catholic University of São Paulo, MA and PhD in psychology at Boston University. Her research interests focus on the relation between culture and psychology and intercultural group contact. She is interested in migration, the process of psychological acculturation, gender, race/ethnicity, intergroup relations, prejudice/discrimination, intergenerational relations and cultural and ethnic identity. With a federal government research grant (2003–2007) she developed and headed the Intercultural Counseling Service at the Psychology Institute at São Paulo University. At present, she heads the Nucleus of Intercultural Research of the Department of Health, Clinic and Institutions at São Paulo Federal University. She is also the leader of the Intercultural Dialogue, an interdisciplinary research group at the Advanced Studies Institute at São Paulo University IEA-USP.

DAWN DARLSTON-JONES is Associate Professor, and the Coordinator of the Bachelor of Behavioural Science at the University of Notre Dame, Fremantle Western Australia, where she has developed a degree based on critical psychology and decolonization theory. Her research interests lie in the nexus between psychology and education, with particular emphasis on decolonization, liberation and self-determination. She is an award-winning educator receiving institutional, and national recognition. She is currently a chief investigator on a nationally funded project designed to increase the number of indigenous psychologists and improve the cultural responsiveness of all psychology graduates.

ALEJANDRA DEL CARMEN DOMINGUEZ ESPINOSA is Professor and the current coordinator of the PhD program in the department of psychology at the Iberoamerican University in Mexico City. She is also the leading researcher of the Culture, Emotions and Gender Laboratory at the same university. She obtained her PhD at the National University of Mexico with honors in 2003. She received the Rogelio Diaz Guerrero Early Career Distinction award from the Mexican Social Psychology Association in 2006. Her current areas of research involve impression management strategies, social desirability and acculturation. She is the regional representative for Mexico, Central America and the Caribbean at the International Association for Cross-Cultural Psychology.

RADOSVETA DIMITROVA is a COFAS Marie Curie fellow at Stockholm University, Sweden. She holds two PhDs in developmental and cross-cultural psychology; the

latter received the 2012 Student and Early Career Council Dissertation Award of the Society for Research in Child Development (SRCD). She has worked on identity and acculturation of various ethnic minority groups in Europe and has ongoing collaborations in Asia, the United States, and Africa. Her scholarly research interests regard migration, identity, acculturation and positive youth development in highly marginalized and stigmatized ethnic minority communities in Europe, most notably Roma. She is the President of the Early Researchers Union (ERU) of the European Association of Developmental Psychology (EADP), a representative of the Student and Early Career Council (SECC) and the Ethnic and Racial Issues Committee at SRCD, the Society for the Study of Human Development (SSHD) Emerging Scholars Committee and a member of the Society for Research on Adolescence (SRA) Study Group Committee, Student and Early Career Net at EARA (European Association for Research on Adolescence) and the advisory board of the Global Network for Human Development Intervention Research in Low- and Middle-Income (LAMI) countries.

GIORGIA DONÀ is Professor of Forced Migration and Refugee Studies in the School of Social Sciences at the University of East London in the United Kingdom, where she teaches courses on refugees, ethnic conflicts and migration. Her research interests include psychosocial issues in forced migration, sociopolitical violence, child migration and participatory research methodologies. She has published extensively on refugees, acculturation and well-being. She is Book Review Editor for the *International journal of migration, health and social care* and a fellow of the Higher Education Academy. In 2012, Giorgia was awarded the Emerald Literati Network Awards for Excellence.

PAT DUDGEON is from the Bardi people of the Kimberly area in Western Australia. She is a psychologist, professor and research fellow at the School of Indigenous Studies at the University of Western Australia. Her area of research includes social and emotional well-being and suicide prevention. Among her many commitments, she is a commissioner of the Australian National Mental Health Commission, on the executive board of the Australian Indigenous Psychologist's Association, and Cochair of the Commonwealth Aboriginal Torres Strait Islander Mental Health and Suicide Prevention Advisory Group. She is currently the project leader of the National Empowerment Project: an indigenous suicide prevention project working with Aboriginal communities across the country and the Aboriginal and Torres Strait Islander Suicide Prevention Evaluation Project. She has many publications in indigenous mental health, in particular, *Working together: Aboriginal and Torres Strait Islander mental health and wellbeing principles and practice*. She is actively involved with the aboriginal community and has a commitment to social justice for indigenous people.

GAIL M. FERGUSON is Assistant Professor of Human Development and Family Studies and Faculty Affiliate of the Center for Latin American and Caribbean Studies at the University of Illinois at Urbana-Champaign. Born and raised on the

Caribbean island of Jamaica, her scholarship lies at the intersection of cross-cultural psychology, developmental psychology and clinical psychology, with a focus on Caribbean populations. Dr. Ferguson's current research in the Culture and Family Life Lab explores the implications of twenty-first century globalization for youth and family acculturation, enculturation and well-being. This line of work has unearthed modern forms of acculturation including remote acculturation of nonmigrants, and tridimensional acculturation of migrants in multicultural settings. Dr. Ferguson also teaches courses on acculturation and immigration, globalization and families and family conflict management. She currently serves on the editorial boards of the *Journal of youth and adolescence* and the *Caribbean journal of psychology*.

GHAYDA HASSAN is a clinical psychologist and a professor of clinical cultural psychology at UQAM University in Montréal and has several research, clinical and community-based national and international affiliations. Her systematic reviews, research and clinical activities are centered around four main areas of clinical cultural psychology: (1) intervention in family violence and cultural diversity; (2) identity, belonging and mental health of children and adolescents from ethnic and religious minorities; (3) cohabitation, intercommunity relations and violent extremism; and (4) working with vulnerable immigrants and refugees.

GABRIEL HORENCZYK is the J. Robert Fisher Professor at the School of Education, the Melton Centre, and the Swiss Center for Conflict Research, all at the Hebrew University of Jerusalem, Israel. He conducts research on acculturation, identity and adaptation of immigrant youth, primarily from the perspectives of social and cross-cultural psychology. During the last years, he has been interested in the acculturative contexts of immigrants focusing mainly on the school as a central arena of intergroup contact and acculturation. He led the Israel team in the International Comparative Study of Ethnocultural Youth (ICSEY). Gabriel Horenczyk is regional representative and member of the executive committee of the International Association for Cross-Cultural Psychology.

INGA JASINSKAJA-LAHTI is Professor of Social Psychology at the University of Helsinki, Finland. She has done extensive research on intergroup relations and immigrant integration in Finland and published widely in international scholarly journals. She is an associate editor of the *International journal of intercultural relations* and the *Journal of community and applied social psychology*. Her most recent research concerns the reciprocity of intergroup relations and identity negotiations in an immigration context with a focus on both majority-minority and minority-minority relations.

ADAM KOMISAROF is Professor in the Department of Economic Studies and Business Administration at Reitaku University, Japan. He earned his BA in educational studies from Brown University, MA in intercultural relations from Antioch University, and PhD in public administration from International Christian University (ICU) in Tokyo, Japan. Dr. Komisarof served as a senior associate

member of St. Antony's College, University of Oxford, and conducted research as a visiting academic at the Nissan Institute of Japanese Studies (2012–13). He has authored two books about acculturation dynamics in Japan and numerous journal papers. He is a fellow and an executive board member of the International Academy for Intercultural Research.

NADEZHDA LEBEDEVA is Professor in the Department of Psychology and Head of the International Laboratory for Socio-Cultural Research at The National Research University Higher School of Economics (HSE) in Moscow, Russian Federation. She is also Academic Director of Joint Master Program Applied Social Psychology of HSE and Tilburg University in The Netherlands. Before joining HSE, she worked as the Head of the Department of Cross-Cultural Psychology at the Russian Academy of Sciences' Institute of Ethnology and Anthropology. Her recent research interests are intercultural relations, acculturation, values, cultural transmission, culture and creativity and social and cultural change.

CHAN-HOONG LEONG is Senior Research Fellow at the Institute of Policy Studies, National University of Singapore (NUS). Dr. Leong received his PhD in psychology from Victoria University of Wellington, New Zealand, and an MSc in statistics from NUS. His research interests include attitudes to immigration and emigration, intergroup relations and integration, historical narratives and identity and the management of cultural diversity in the workplace. He is Consulting Editor for the *International journal of intercultural relations*, and Editor for the 2013 special issue, "Multiculturalism: beyond ethnocultural diversity and contestations." Dr. Leong has consulted for various government projects with topics covering education, defense, language and immigration.

KARMELA LIEBKIND is Professor of Social Psychology at the University of Helsinki, Finland, and a well-known authority on intergroup relations. She has published extensively in international scholarly journals and books on ethnic identity and acculturation of minority members as well as on contact and prejudice between members of minority and majority groups, on discrimination and on prejudice reduction. She has also been consulted by international bodies as an expert in intercultural contact, immigrants, racism and xenophobia.

TUULI ANNA MÄHÖNEN is a university lecturer in social psychology at the Open University of the University of Helsinki, Finland. Her research interests include intergroup relations, acculturation and immigrant integration. Most recently, she has studied in the INPRES/LADA research project, the most pertinent pre- and postmigration factors involved in the long-term adaptation of immigrants from Russia to Finland.

ANITA S. MAK is Professor of Psychology at the University of Canberra, Australia. She teaches cultural competence, health psychology and psychological assessment. A former international student and an immigrant from Hong Kong to Australia, her research focuses on Asian-Australian intercultural relations, immigrants' and

international students' adaptation and internationalization. Her recent research interests have included psychosocial adjustment for both dominant and nondominant groups in multicultural educational and workplace settings. Anita has extensive experience in designing and delivering diversity and cultural competence training programs in Australia and internationally. She is a fellow of the International Academy for Intercultural Research.

R. C. MISHRA is Professor of Psychology at Banaras Hindu University, India. He received his PhD from Allahabad University in India, he has been a postdoctoral research fellow, Shastri research fellow, and visiting professor at Queen's University, Canada. He has also been a fellow-in-residence of the Netherlands Institute of Advanced Study, Wassenaar in The Netherlands, and a visiting professor at the University of Konstanz in Germany, and the University of Geneva and Jean Piaget Archives in Switzerland. His principal interest is in cultural influence on human development, and he has contributed about 150 research papers and chapters to professional journals and edited books, both in India and abroad, in the fields of cognition, acculturation, schooling, health and intergroup relationship. He is the coauthor of *Ecology, acculturation and psychological adaptation: a study of adivasis in Bihar*, *Development of geocentric spatial language and cognition: an eco-cultural perspective* and coeditor of *Psychology in human and social development: lessons from diverse cultures*.

FROSSO MOTTI-STEFANIDI is Professor of Psychology at the University of Athens, Greece. Her research has focused on the study of individual and group differences in the adaptation and development of immigrant adolescents in the Greek school context. She currently studies the effect of the economic crisis in Greece on immigrant and nonimmigrant youth's adaptation and well-being, concurrently and over time. The project is conducted from within a risk and resilience developmental framework. She has received the Distinguished International Alumni Award from the College of Education and Human Development of the University of Minnesota. She is President of the European Association for Developmental Psychology and a member of the governing council of the Society for Research in Child Development. She has also served as President of the European Association of Personality Psychology.

LINDA WAIMARIE NIKORA is Professor in the School of Psychology at the University of Waikato, New Zealand. She is also the Director of the Maori and Psychology Research Unit. Professor Nikora teaches Culture, ethnicity and psychology; Community, culture and diversity: applied social psychology and psychological applications of the Treaty of Waitangi. Her research interests are community, social and indigenous psychologies with a specific interest in Maori people and how psychology may assist in their self-determination. Research over the past three years include: Tangi, Maori ways of mourning; traditional body modification; ethnic status as a stressor; Maori identity development; cultural safety and competence; Maori mental health and recovery; social and economic

determinants of health; homelessness; relational health; and social connectedness. Professor Nikora is also an honorary fellow of the New Zealand Psychological Society and a founding member of the National Standing Committee on Bicultural Issues.

KIMBERLY A. NOELS is Professor in the Social and Cultural Psychology area of the Department of Psychology and an Adjunct Professor in the Department of Educational Psychology at the University of Alberta, Canada. She was trained in linguistics, psychology and communication. Her research interests focus on the role of communication in the process of cross-cultural adaptation, with a specific focus on how language is related to situational variations in ethnic identity and psychological well-being. She is also interested in the social, cultural and motivational processes involved in second language learning and the implications of language learning for ethnic identity and intergroup relations. This research has received awards from the Modern Language Association, the International Association of Language and Social Psychology, the National Communication Association, and the Society for the Psychological Study of Social Issues. She has served on the executive committees of the International Association for Cross-Cultural Psychology, the International Association of Language and Social Psychology, and the International and Cross-Cultural Section of the Canadian Psychological Association.

BRIT OPPEDAL is a senior researcher in the department of child development and mental health of the Norwegian Institute of Public Health. She is the Director of the department's research program, "Youth, culture and competence study, YCC," which was established in 2006 and involves projects targeting both refugee and voluntary immigrant populations in different age and ethnic groups. One theme of her research is the role of multicultural context in the psychosocial development and integration of children of immigrants. Another focus is on predictors of stability and change in psychological well-being and psychopathology in terms of depression, anxiety, aggression and posttraumatic stress problems.

ROGELIA PE-PUA is an honorary associate professor of social sciences at the University of New South Wales, Australia. Rogelia has a long history of specialization in indigenous psychology, which started at the University of the Philippines where she taught for 15 years before migrating to Australia. She has published widely in this area, including the first edited volume on Philippine indigenous psychology, an entry on indigenous psychology for the 2015 *International encyclopedia of social and behavioral sciences*, book chapters and journal articles on indigenous methods. She has applied her passion for and expertise in indigenous and cross-cultural methods to her research and to her teaching. She was a founder of the Asian Association of Indigenous and Cultural Psychology. She has published research on migration and return migration in Hawaii and the Philippines, labor migration in Spain and Italy, the character of Australian ethnic press, international students' experiences, street-frequenting

ethnic youth, refugee family settlement, Hong Kong immigrants in Australia, legal needs of immigrants, social cohesion in Australia and the needs of Australian Muslim families. She has also worked collaboratively with international researchers comparing ethnocultural youth identity and acculturation in 13 countries; and culture and trait links in four countries.

KAREN PHALET is Professor of Social Psychology at the University of Leuven, Belgium, and a permanent research fellow of the European Research Center On Migration and Ethnic Relations at Utrecht University, The Netherlands. Her recent work develops comparative perspectives on migration, acculturation, religion and minority identity in Europe, with applied implications for school diversity and ethnic inequality. Ongoing research projects focus on the interplay of intergroup relations in European school contexts with social ties and identities and with achievement and adjustment outcomes of Muslim minority youth. She received her PhD in psychology from the University of Leuven, Belgium, in 1993 and has since been the author of numerous publications in cross-cultural and social psychology, sociology, migration and ethnic relations journals and books. Most recent honors were a 2013 Society for Personality and Social Psychology Fellow and a 2015 Distinguished Advanced Research Collaborative Fellowship at the Graduate Center/CUNY in New York.

LOBNA ROUHANI is a research officer at the University of Western Australia. She is currently working alongside Professor Pat Dudgeon on projects examining the social and emotional well-being of Aboriginal and Torres Strait Islander Australians. She has previously worked at the University of Melbourne, where she worked on and published on the effects of racism and discrimination on mental health in CALD and Aboriginal and Torres Strait Islander Australian communities. Additionally, she has codeveloped a short course with the Victorian Human Rights Commission, VicHealth and Deakin University targeted at further understanding and resolving racism and discrimination in the workplace.

ANDREW G. RYDER is Associate Professor in the Department of Psychology and the Centre for Clinical Research in Health at Concordia University and affiliated researcher in the Culture and Mental Health Research Unit of the Jewish General Hospital, in Montréal, Quebec, Canada. He directs the Culture, Health, and Personality Lab where he conducts research on the cultural shaping of emotional disorders and the interrelation of acculturation and mental health. Recent conceptual papers have been dedicated to the theoretical integration of cross-cultural psychology and clinical psychology, exploring its implications for research and treatment.

COLETTE SABATIER is Professor Emeritus in Developmental and Cross-Cultural Psychology at Université de Bordeaux, France. She received her PhD degree in psychology from Université du Québec in Montréal, Canada, with a thesis titled “Cultural variations in mother-infant relationship, parental belief and practices. A comparative study of Haitian, Quebecois and Vietnamese living in Montréal,” and did a postdoctoral fellowship at Queen’s University, Kingston, Ontario, Canada, on

acculturation of adolescents under the direction of John W. Berry. Her special interest is on adolescent and child development within different cultural contexts, especially within immigrant families. She is examining the process of socialization, enculturation and acculturation from the child's or adolescent's point of view and the parent's point of view. She has coedited several books in French on this topic and published many papers and chapters on the role of family and culture on developmental process including identity, religiosity, intergroup relationships and well-being.

SABA SAFDAR is an Iranian-born, Canadian-educated associate professor in the psychology department at the University of Guelph in Canada, where she is Director of the Centre for Cross-Cultural Research. She received her PhD from York University in Toronto in 2002 and has been holding a faculty position since her graduation. Additionally, she has been a visiting scholar at several universities across the globe including the United States, the United Kingdom, France, Poland, Colombia, India and Kazakhstan. Professor Safdar's research primarily examines the wide range of factors that could help to understand adaptation processes of newcomers including immigrants and international students. She is a member of the editorial boards of several journals including the *International journal of cross-cultural psychology* and the *International journal of intercultural relations*. Her TEDx Talk was titled, "Everything you always wanted to know about culture but were afraid to ask."

DAVID L. SAM is Professor of Cross-Cultural Psychology at the University of Bergen, Norway, where he divides this position between the faculty of psychology and the faculty of medicine and dentistry. He teaches courses in cross-cultural psychology and medical anthropology. His research interests include psychology of acculturation, and the role of culture in health and human development. He has published extensively on young immigrants' adaptation, and in recent years this interest has adopted a more comparative point of view. He is currently the Deputy-Secretary General of the International Association for Cross-Cultural Psychology and the President-Elect of the International Academy for Intercultural Research.

GRO MJELDHEIM SANDAL is Professor in Psychology at the University of Bergen in Norway. Her area of expertise includes the implications of cultural diversity for working life with specific focus on recruitment, leadership, teamwork and coping strategies related to stress and mental health problems. For many years, she has also conducted research on culturally diverse crews operating in isolated, confined and potential dangerous environments, such as space, polar crossings and Antarctic overwintes.

JAIMEE STUART is a cultural/developmental psychologist working at Victoria University of Wellington, New Zealand. Her research focuses on the ecological contexts of development within multicultural environments, and how individuals and groups become psychologically resilient. Jaimee is a keen methodologist who utilizes mixed methods including both qualitative analysis and complex statistical modeling. Some of her diverse projects include examining perceptions of multiculturalism, intergenerational cultural transmission as well as the impacts of

bullying and victimization on diverse youth. Outside of her academic work, Jaimee is a consultant who develops and delivers evidence-based training in the areas of intercultural communication, leadership and well-being.

LINDA K. TIP is Research Fellow in the School of Global Studies, University of Sussex in the United Kingdom. Her research interests are broadly in the area of acculturation processes. She is currently investigating factors contributing to the well-being of resettled refugees in the United Kingdom using multiple methods in a longitudinal design.

PETER F. TITZMANN is a professor for life course and competence development of children and youth at the Jacobs Center for Productive Youth Development, University of Zürich, Switzerland. He received his PhD and his habilitation at the University of Jena, Germany. His general research interest is in the interplay between normative development and migration-related adaptation among adolescents with immigrant backgrounds. He investigated this interplay in various developmental outcomes, such as experiences of stress, delinquent behavior, social relations, family interactions and autonomy development. Peter F. Titzmann is on the editorial board of the *International journal of psychology* and a member of the research council of the European Association of Developmental Psychology (EADP).

CLAUDIO O. TOPPELBERG is a physician, a child, adolescent and adult psychiatrist and research scientist at the Judge Baker Children's Center, and an assistant professor at Harvard Medical School. He is board-certified by the American Board of Psychiatry and Neurology. His research in children and adolescents focuses on: (1) the relations of language, neurocognitive and emotional/behavioral development; (2) the development of dual-language children of immigrants; and (3) reduction in socioeconomic disparities in these domains through national and state policies. In 2015, Dr. Toppelberg was appointed to the committee on "Fostering the Development and Educational Success of Dual-Language Learners" of the National Academy of Medicine/ National Research Council of the US National Academy of Sciences. Dr. Toppelberg is active in the American Academy of Child and Adolescent Psychiatry, a member of its Diversity and Culture Committee, and coauthor of its "Practice parameters for cultural competence in child and adolescent psychiatry."

LE NHAT TRAN was a former lecturer and research associate at Hue University, Vietnam, and the University of New South Wales, Australia, teaching cross-cultural/acculturation psychology courses and research methods courses. She has two master's degrees in (health) social science from the University of Newcastle and a doctoral degree in social science and policy from the University of New South Wales, Australia. Le has mainly published on the acculturation experience of immigrants and international students. Her research interests include (indigenous) acculturation, multiculturalism, cross-cultural psychology and educational research. Le is now a research assistant at the Association of Independent Schools of New South Wales (AISNSW), and a member of the International Association for Cross-Cultural Psychology.

R. C. TRIPATHI is Professor Emeritus and National Fellow of ICSSR at the University of Allahabad, India. He was earlier Director of the GB Pant Social Science Institute, Allahabad and Professor and Chair, Department of Psychology, University of Allahabad, India. He received his MA from the University of Saugar, India, and took his doctorate degree from the University of Michigan, Ann Arbor. He is the Founding Editor of *Psychology and developing societies* along with Durganand Sinha. He has published in the areas of intergroup relations, social values, social policy and organizational behavior.

FONS J. R. VAN DE VIJVER is Professor of Cross-Cultural Psychology at Tilburg University, The Netherlands, and has honorary positions at North-West University, South Africa, and the University of Queensland, Australia. He has published widely on cross-cultural research methods (notably bias and equivalence), acculturation and personality. He is a former editor of the *Journal of cross-cultural psychology*, past President of the European Association of Psychological Assessment, and President-Elect of the International Association for Cross-Cultural Psychology.

KAREN VAN DER ZEE is Dean of the Faculty of Social Sciences and Chief Diversity Officer at VU University Amsterdam, The Netherlands. At VU University, she also holds a chair in intercultural competence. In addition, she is Professor of Organizational Psychology, Cultural Diversity, and Integration at the University of Groningen, The Netherlands. Her research is focused on the role of intercultural traits, patterns of social identity and organizational climate in managing cultural diversity in work settings.

JAN PIETER VAN OUDENHOVEN graduated from Leiden University in social psychology. He started his career in Latin America as a UNESCO associate expert in educational programs for farmers. Since 1976, he has been connected to the University of Groningen in The Netherlands as a social and cross-cultural psychologist. His main research interests are international cooperation, national cultures, personal factors of adaptation of migrants and acculturation and cross-cultural differences in moral principles. He has published 8 books and over 160 chapters and articles.

SIRKKU VARJONEN is a postdoctoral researcher at the department of social research, University of Helsinki, Finland. In her PhD thesis in social psychology, she analyzed immigrant life stories examining how immigrants construct their identities and negotiate their position in Finland. She has also explored the changes in ethnic Finnish return migrants' identity negotiations over the course of their migration to Finland. Her current research project focuses on how immigrants and majority Finns discuss multiculturalism in Finland.

PAUL VEDDER is Professor of Clinical Child and Adolescent Studies at Leiden University in The Netherlands. His research focusses on youth's inter- and intragenerational relationships in acculturation contexts and how these affect their learning and development. After conducting a series of small-scale collaborative

and international comparative studies on schoolchildren's social competences in the Caribbean, Sweden and The Netherlands, he was the national coordinating researcher on a large international comparative study of ethnocultural youth. At present, he is working on a cross-cultural study on time spending, health and well-being in young adolescents in Ghana, India and The Netherlands and coordinates studies on immigrant children's acculturation in Iceland and The Netherlands. He acts as an associate editor of *Cultural diversity & ethnic minority psychology*.

WAIKAREMOANA WAITOKI is a senior research officer in the School of Psychology at the University of Waikato, New Zealand. She is also a clinical psychologist specializing in mental health. Waikaremoana's research interests are in Maori mental health, indigenous curriculum development and planning, workforce development, social determinants of health, bipolar disorder and family violence. She is also actively involved in addressing structural racism in psychology throughout research, teaching and practice. Waikaremoana is the Bicultural Director on the New Zealand Psychological Society.

COLLEEN WARD is Professor of Psychology and Director of the Centre for Applied Cross-Cultural Research at Victoria University of Wellington, New Zealand. Her major research interests are in acculturation and intercultural relations. Colleen has held teaching and research positions at the University of the West Indies in Trinidad, Science University of Malaysia, National University of Singapore and University of Canterbury in New Zealand. She was President of the International Academy of Intercultural Research (2009–11), and Editor of the *International journal of intercultural relations* (2012–14). In 2014, Colleen became an honorary fellow of the International Association for Cross-Cultural Psychology.

MARTA YOUNG is a registered psychologist and associate professor in the clinical psychology program at the University of Ottawa, Canada. Her teaching and research interests include the psychology of trauma, multicultural assessment and counseling and the psychosocial adaptation of immigrants and refugees. Ethnocultural communities surveyed include Somalis, South and East Indians, Ukrainians, Haitians, Filipinos, Chileans, Hong Kong Chinese and Bosnians. She is also actively involved in training clinical graduate students with respect to multicultural issues. Her private practice focuses on providing psycholegal assessments and psychotherapy to refugees as well as consultation to resettlement workers, immigration lawyers, social workers and ESL teachers.

HANNA ZAGEFKA is Reader in Social Psychology at Royal Holloway University of London. Her lab focuses on intergroup relations, social identity (especially national or ethnic identity), acculturation and prejudice. She has researched acculturation processes in a wide variety of settings, including various countries in Europe, Asia and South America, using both survey and experimental methodologies.

Acknowledgments

This book represents the continuing effort on the part of a number of international scholars who see the need to understand human behavior from a more global perspective. These scholars also consider that theories and research findings are culturally situated and that no one theoretical viewpoint will fully capture the understanding that we desire to gain about human behavior. The opportunity to work with such people has been very inspiring and stimulating for both of us.

Producing a book like this would not be possible without the help of several people. As editors, we are very grateful for the contributions made by all the chapter authors. First we are grateful to all authors for agreeing to collaborate with other scholars to produce a joint chapter. We want to thank you all for the wonderful internal reviewing you did to reduce our work as editors. We know that producing these kinds of chapters requires much time and effort, and we are very grateful for all the sacrifice you have had to make within all the constraints we imposed, not to mention accommodating your coauthor(s) because of different work schedules and pace. We appreciate the richness of the chapters. The different chapters generally reflect the theoretical and empirical position of the authors and do not necessarily reflect the position of the editors.

We are particularly grateful to Laina Isler (Victoria University of Wellington, New Zealand) for her invaluable editorial skills in organizing the chapters and coordinating the work of the chapter authors and the editors. We also gratefully acknowledge financial support from the Department of Psychosocial Science, University of Bergen, Norway, to engage Laina as an editorial assistant, as well as to engage Dominic Sagoe (University of Bergen, Norway) and Philomena Antwi for seeing to the indexing of the handbook. John Berry's contribution was carried out within the framework of the Basic Research Program at the National Research University Higher School of Economics (HSE) and supported within the framework of a subsidy granted to the HSE by the Government of the Russian Federation for the implementation of the Global Competitiveness Program.

We also express our thanks to the different editors at Cambridge University Press, particularly to Rebecca Taylor, Hetty Marx and Carrie Parkinson, who have

been both understanding and supportive in guiding us through the maze of writing an edited book. Finally, we would like to thank our families for their support and encouragement during the entire period.

DLS and JWB
