

CONTENTS

- Preface *page* xi
 Acknowledgements xvii
- 1 Neurons and Neural Communication 1**
 Brain Cells and Basic Structure 1
 Communication within Neurons 3
 Summary 13
- 2 An Introduction to the Brain 14**
 Protecting the Brain 14
 Orienting Yourself Around the Brain 15
 Overview of Human Brain Structures and Functions 15
 Exploring the Four Lobes 17
 Comparison of Brains Across Species 18
 Summary 21
- 3 Neuroscientific Methods 22**
 Imaging the Living Brain 22
 Brain Staining and Imaging 26
 Invasive Techniques 29
 Electrophysiological Techniques 32
 Summary 35
 References 36
- 4 Examination of Animal Behaviour: General Principles and Techniques 37**
 Behavioural Neuroscience, a Historical Context 37
 Measuring Behaviour: Methods and Techniques 42
 Summary 46
 References 47
- 5 Habituation and Sensitisation in the *Aplysia* 48**
 Habituation 48
 Sensitisation 55
 Summary 59
 References 61
- 6 Classical Conditioning in the *Aplysia* 62**
 Introduction and Background 62
 Behavioural Conditioning of *Aplysia* 63
 Circuits and Behavioural Mechanisms Underlying Classical Conditioning 63
 Circuits and Electrophysiological Mechanisms Underlying Classical Conditioning 65
 Biochemical and Molecular Mechanisms Underlying Classical Conditioning 66
 Other Mechanisms? 68
 Summary 70
 References 71
- 7 Long-Term Synaptic Plasticity in Mammals I: Long-Term Potentiation (LTP) 72**
 Introduction and Background 72
 The Hippocampus as a Site for Memory 73
 Electrophysiological Mechanisms Underlying Long-Term Potentiation 73
 Cellular and Molecular Mechanisms Underlying Long-Term Potentiation 75
 Maintenance of Long-Term Potentiation: Early and Late LTP 76
 LTP as a Mechanism for Learning? 80
 Erasure/Reversal of Long-Term Potentiation 82
 Summary 83
 References 84
- 8 Long-Term Synaptic Plasticity in Mammals II: Long-Term Depression (LTD) 87**
 Introduction and Background 87
 Long-Term Depression in the Cerebellum 88
 Electrophysiological Mechanisms Underlying Cerebellar LTD 88

- Molecular Mechanisms Underlying LTD 90
 LTD in the Hippocampus 93
 Summary 97
 References 98
- 9 Eye-Blink Conditioning 100**
 Introduction and Background 100
 Behavioural Conditioning of the
 Eye-Blink Reflex 101
 Anatomy of the Cerebellum 102
 Cerebellar Circuits Underlying Eye-Blink
 Conditioning 103
 Electrophysiological Mechanisms
 Underlying Eye-Blink Conditioning in
 the Cerebellum 106
 Cellular and Molecular Mechanisms Underlying
 Eye-Blink Conditioning 108
 The Hippocampus and Eye-Blink
 Conditioning 110
 Electrophysiological Mechanisms Underlying
 Eye-Blink Conditioning in the Hippocampus 110
 Summary 114
 References 115
- 10 Fear Conditioning 118**
 Introduction and Background 118
 Behaviour of Fear Conditioning 119
 Brain Structures and Circuits Underlying Fear
 Conditioning 120
 Electrophysiological Mechanisms Underlying
 Fear Behaviour 123
 Biochemical and Molecular Mechanisms
 Underlying Fear Behaviour 126
 Summary 128
 References 129
- 11 Taste Aversion 131**
 Introduction and Background 131
 Behaviour of Taste Aversion 131
 A Brain System for Taste Aversion 132
 Neural Changes Following Conditioned
 Taste Aversion 133
 Summary 140
 References 141
- 12 Sound Localisation 143**
 Introduction and Background 143
 Behaviour of Sound Localisation in
 Barn Owls 144
 Neural Circuits Involved in Sound
 Localisation 147
 Creating Auditory Maps of the Environment with
 Higher Brain Structures 154
 Summary 157
 References 158
- 13 Bat Echolocation 159**
 Introduction to Bats 159
 History of Echolocation 159
 Echolocation Signal Types 160
 Echolocation Behaviour 162
 Neural Basis of Echolocation 163
 Summary 170
 References 171
- 14 Spatial Navigation 172**
 Introduction 172
 A Brain System for Navigation: The Role
 of the Hippocampus 174
 Neural Basis of Navigation: Place Cells, Grid Cells
 and Head-Direction Cells 176
 Cells Representing Space Across Species 180
 Beyond Spatial Navigation 181
 Summary 181
 References 183
- 15 Birdsong Learning 185**
 Introduction and Background 185
 An Introduction to Songbirds 186
 How Songbirds Learn to Sing 186
 Birdsong System in the Brain 187
 Neurophysiology of Song Production 187
 Neurophysiology of Song Learning 190
 Song Stored in Memory 190
 Bird's Own Song Compared to Auditory
 Feedback 191
 Auditory–Vocal Integration 194
 Summary 194
 References 197

16 Circadian Rhythms 199

- Introduction 199
- Circadian Behaviour 200
- Neural Basis of Circadian Rhythms 201
- Entrainment of the Clock 203
- Other Brain Clocks 205
- Passing SCN Information to the Body 205
- Clocks and Sleep 206

- Clocks and Health 208
- Summary 209
- References 209

Index 211

The colour plates are found between pages 198 and 199.
