

CONTENTS

<i>Preface</i>	<i>page xi</i>
1 The Orbits of One-Dimensional Maps	1
1.1 Iteration of Functions and Examples of Dynamical Systems	1
1.2 Newton's Method and Fixed Points	10
1.3 Graphical Iteration	17
1.4 The Stability of Fixed Points	20
1.5 Non-Hyperbolic Fixed Points	28
2 Bifurcations and the Logistic Family	38
2.1 The Basin of Attraction	38
2.2 The Logistic Family	40
2.3 Periodic Points	45
2.4 Periodic Points of the Logistic Map	52
2.5 The Period Doubling Route to Chaos	54
2.6 The Bifurcation Diagram and 3-Cycles of the Logistic Map	56
2.7 The Tent Family T_μ	64
2.8 The 2-Cycles and 3-Cycles of the Tent Family	66
3 Sharkovsky's Theorem	70
3.1 Period 3 Implies Chaos	70
3.2 Converse of Sharkovsky's Theorem	74
4 Dynamics on Metric Spaces	79
4.1 Basic Properties of Metric Spaces	79
4.2 Dense Sets	83
4.3 Functions between Metric Spaces	88
4.4 Diffeomorphisms of \mathbb{R}	94
5 Countability, Sets of Measure Zero and the Cantor Set	100
5.1 Countability and Sets of Measure Zero	100
5.2 The Cantor Set	105

5.3	Ternary Expansions and the Cantor Set	108
5.4	The Tent Map for $\mu = 3$	111
5.5	A Cantor Set Arising from the Logistic Map L_μ , $\mu > 4$	114
6	Devaney's Definition of Chaos	116
6.1	The Doubling Map and the Angle Doubling Map	117
6.2	Transitivity	120
6.3	Sensitive Dependence on Initial Conditions	121
6.4	The Definition of Chaos	122
6.5	Symbolic Dynamics and the Shift Map	126
6.6	For Continuous Maps, Sensitive Dependence is Implied by Transitivity and Dense Period Points	130
7	Conjugacy of Dynamical Systems	134
7.1	Conjugate Maps	134
7.2	Properties of Conjugate Maps and Chaos Through Conjugacy	137
7.3	Linear Conjugacy	142
8	Singer's Theorem	146
8.1	The Schwarzian Derivative Revisited	146
8.2	Singer's Theorem	150
9	Conjugacy, Fundamental Domains and the Tent Family	154
9.1	Conjugacy and Fundamental Domains	154
9.2	Conjugacy, the Tent Map and Periodic Points of the Tent Family	158
10	Fractals	166
10.1	Examples of Fractals	166
10.2	An Intuitive Introduction to the Idea of Fractal Dimension	168
10.3	Box Counting Dimension	170
10.4	The Mathematical Theory of Fractals	174
10.5	The Contraction Mapping Theorem and Self-Similar Sets	176
11	Newton's Method for Real Quadratics and Cubics	184
11.1	Binary Representation of Real Numbers	184
11.2	Newton's Method for Real Quadratic Polynomials	186
11.3	Newton's Method for Real Cubic Polynomials	188
11.4	The Cubic Polynomials $f_c(x) = (x + 2)(x^2 + c)$	190
12	Coppel's Theorem and a Proof of Sharkovsky's Theorem	195
12.1	Coppel's Theorem	195

12.2	The Proof of Sharkovsky's Theorem	199
12.3	The Completion of the Proof of Sharkovsky's Theorem	203
13	Real Linear Transformations, the Hénon Map and Hyperbolic Toral Automorphisms	209
13.1	Linear Transformations	209
13.2	The Hénon Map	216
13.3	Circle Maps Induced by Linear Transformations on \mathbb{R}	220
13.4	Endomorphisms of the Torus	221
13.5	Hyperbolic Toral Automorphisms	224
14	Elementary Complex Dynamics	228
14.1	The Complex Numbers	228
14.2	Analytic Functions in the Complex Plane	229
14.3	The Dynamics of Polynomials and the Riemann Sphere	234
14.4	The Julia Set	239
14.5	The Mandelbrot Set \mathcal{M}	249
14.6	Newton's Method in the Complex Plane for Quadratics and Cubics	256
14.7	Important Complex Functions	263
15	Examples of Substitutions	271
15.1	One-Dimensional Substitutions and the Thue–Morse Substitution	271
15.2	The Toeplitz Substitution	278
15.3	The Rudin–Shapiro Sequence	281
15.4	Paperfolding Sequences	284
16	Fractals Arising from Substitutions	290
16.1	A Connection between the Morse Substitution and the Koch Curve	290
16.2	Dragon Curves	293
16.3	Fractals Arising from Two-Dimensional Substitutions	294
16.4	The Rauzy Fractal	300
17	Compactness in Metric Spaces and an Introduction to Topological Dynamics	311
17.1	Compactness in Metric Spaces	311
17.2	Continuous Functions on Compact Metric Spaces	316
17.3	The Contraction Mapping Theorem for Compact Metric Spaces	318

17.4	Basic Topological Dynamics	319
17.5	Topological Mixing and Exactness	328
18	Substitution Dynamical Systems	336
18.1	Sequence Spaces	336
18.2	Languages	342
18.3	Dynamical Systems Arising from Sequences	344
18.4	Substitution Dynamics	350
19	Sturmian Sequences and Irrational Rotations	355
19.1	Sturmian Sequences	355
19.2	Sequences Arising from Irrational Rotations	359
19.3	Cutting Sequences	364
19.4	Sequences Arising from Irrational Rotations are Sturmian	367
19.5	Semi-Topological Conjugacy between $([0, 1), T_\alpha)$ and $(O(u), \sigma)$	371
19.6	The Three Distance Theorem	374
20	The Multiple Recurrence Theorem of Furstenberg and Weiss	379
20.1	van der Waerden's Theorem	379
Appendix A	Theorems from Calculus	383
Appendix B	The Baire Category Theorem	385
Appendix C	The Complex Numbers	387
Appendix D	Weyl's Equidistribution Theorem	389
	<i>References</i>	391
	<i>Index</i>	398
