 household production function, 178
 indirect, 9–11, 13, 28, 29, 37, 40, 48, 95, 96, 99,
 100, 111, 114–118, 158, 168, 175, 187, 197
 instantaneous, 60–62, 79, 87, 89, 156
 Leontief, 101
 linear, 168, 169
 linear demand, 95
 linear logarithmic, 115
 nested, 112
 non-standard, 200
 paternalistic altruistic, 25
 per capita, 61
 perfect complements, 102
 purely altruistic, 25
 purely egoistic, 26

- quasi-concave, 137
- quasi-homothetic, 129, 182
- quasi-linear, 93, 96–98, 103, 115, 116, 182
- stochastic, 141
- Stone–Geary, 182
- strictly concave, 138, 158
- strictly convex, 138
- strictly quasi-concave, 158
- subutility function, 39
- twice continuously differentiable, 98
- two-period, 76
- weakly cardinal, 135
- weakly separable, 39, 44, 126
- well-behaved, 9

- value of a statistical life, 132, 133, 148, 150, 155, 156, 173
- value of preventing a fatality, *see* value of a statistical life

- value transfer, 179, 184
- variance, 144–146, 159, 193, 209
- VPF, *see* value of preventing a fatality
- VSL, *see* value of a statistical life

- welfare weights, 122, 131, 132
 - intergenerational, 153
- Willig formula, 97, 175
- willingness to accept (WTA) compensation, 171
- willingness to pay (WTP), 7, 17, 18, 21, 23, 27, 31, 34, 39, 41, 44, 56, 74, 88, 96, 97, 99–101, 103–105, 113, 115, 122, 125, 141, 148, 153, 161, 162, 164, 169, 171, 174, 175, 200, 202, 211
- willingness-to-pay locus, 139
- WTA, *see* willingness to accept compensation
- WTP, *see* willingness to pay

- Young’s theorem, 99, 114, 116
