

From Servant to Queen

A Journey through Victorian Mathematics

With a few exceptions, pure mathematics in Britain at the beginning of the nineteenth century was a recreation for amateurs. Drawing on primary sources, John Heard provides an engaging account of the process by which it rose to become an academic discipline of repute which by the First World War was led by G H Hardy, and supported by the internationally respected London Mathematical Society. In chronicling that rise, this book describes key contributions and the social environment in which mathematicians operated, uses contemporary commentary where appropriate, and provides full references to help any researchers who want to dig deeper into the original sources. No mathematical knowledge is required, and readers with a wide range of interests and backgrounds will find much to enjoy in this unique insight into the world of Victorian mathematics and science.

John Heard is an independent researcher with a doctorate in the history of science from Imperial College London. He is also a member of the British Society for the History of Science, the British Society for the History of Mathematics, and a Fellow of the Institute of Chartered Accountants in England and Wales.

Arthur Cayley, painted by Lowes Cato Dickinson in 1872; a satirical verse by James Clerk Maxwell concludes with the lines:

... by Dickinson depicted
In two dimensions, we the form may trace
Of him whose mind, too large for vulgar space,
In n dimensions flourished unrestricted.

Library of Congress Cataloging-in-Publication Data

NAMES: Heard, John (John Michael), author.

TITLE: From Servant to Queen : A Journey through Victorian Mathematics / John Heard.

DESCRIPTION: Cambridge ; New York, NY : Cambridge University Press, 2019. | Includes bibliographical references and index.

IDENTIFIERS: LCCN 2018042537 | ISBN 9781107124134

SUBJECTS: LCSH: Hardy, G. H. (Godfrey Harold), 1877-1947. | Mathematicians – Great Britain – Biography. | Mathematics – History – 19th century. | Mathematics – History – 20th century. | Aesthetics. | Mathematics in nature.

CLASSIFICATION: LCC QA29.H23 H43 2019 | DDC 510.92/241-dc23

LC record available at <https://lcn.loc.gov/2018042537>

ISBN 978-1-107-12413-4 Hardback

CONTENTS

<i>List of Figures</i>	page viii
<i>Acknowledgements</i>	ix
<i>Notes for the Reader</i>	x
1 Setting the Scene	i
2 The Legacy of Newton	ii
3 The London Mathematical Society	50
4 The Pure Mathematician as Hero	111
5 Mathematicians in an Aethereal World	145
6 Apologias for Pure Mathematicians	190
7 Embracing Beauty	214
Epilogue	243
<i>Select Bibliography</i>	247
<i>Index</i>	257

FIGURES

3.1	Invitation to the first meeting of the ‘University College Mathematical Society’	<i>page 58</i>
3.2	Original design by Augustus De Morgan of a badge for the London Mathematical Society	62
3.3	Construction diagram from the first proposition in Euclid’s <i>Elements</i>	63
3.4	Total number of ordinary members of the London Mathematical Society at each position in the table of wranglers	73
4.1	James Whitbread Lee Glaisher	116
4.2	Henry John Stephen Smith	129
5.1	Chart showing references to ‘pure mathematician(s)’	146
5.2	The controversial ‘parallel postulate’ from the <i>Elements of Euclid</i>	167
6.1	Sylvester’s characterisation of mathematical discovery	207
7.1	Cartoon from <i>Punch</i> by George du Maurier	219
7.2	Lois Cayley: clearly a mathematician	230
7.3	The existence proof: Hardy on the left, Littlewood on the right	238

ACKNOWLEDGEMENTS

This book could not have been written without access to many libraries and archives, and I extend my sincere thanks to the librarians and archivists who, over the years, have allowed me to consult the materials in their care. Some of these materials are quoted or reproduced here, and in this respect I am pleased to make the following acknowledgements: letters from Henry Baker, by permission of the Master and Fellows of St John's College, Cambridge; the portrait of Arthur Cayley, the photograph of G H Hardy and J E Littlewood, a letter from Harald Cramér, and an obituary speech by Alexander Ostrowski, by permission of the Master and Fellows of Trinity College, Cambridge; letters from Andrew Russell Forsyth, by permission of the British Library; a letter from G H Hardy, by permission of the Syndics of Cambridge University Library; the journal of Thomas Archer Hirst, by courtesy of the Royal Institution of Great Britain; minute books of the London Mathematical Society, by courtesy of the Society; portrait of J W L Glaisher, by permission of the Royal Astronomical Society; 'My First Gorilla', by permission of the Zoological Society of London; a sketch of a badge for the London Mathematical Society, a letter to Thomas Archer Hirst, and letters from Sophia De Morgan, by permission of University College (London) Library, Special Collections.

I am grateful to June Barrow-Green for an initial suggestion that led to the writing of this book, and to her and Tony Crilly for their valuable comments on a draft of it; of course, the responsibility for any errors or omissions is mine alone. Finally, my partner Stella Pilavaki has provided constant and loving support and encouragement throughout the authorial process.

NOTES FOR THE READER

Two forms of referencing are used in this book. An alphabetic superscript refers to a short note at the bottom of the page; such notes give additional information or explanations that do not fit easily in the main text. Much more numerous are numerical superscripts, which refer to the ‘Notes and References’ section at the end of each chapter. The information here concerns sources, and nothing else; so if the reader is not concerned about these, then *all numerical superscript references can safely be ignored*. In each ‘Notes and References’ section, full bibliographic details are given for the first mention of a publication, with an abbreviated reference being given for subsequent mentions.

For convenience and conciseness, the term ‘Britain’ is used to signify Great Britain and the island of Ireland; while ‘the Continent’ signifies that part of Europe on the other side of the English Channel.

In the index, if the title of a book or journal begins with a definite or indefinite article, then the article is omitted; thus *A Budget of Paradoxes* is indexed under ‘B’, and ‘The Purloined Letter’ under ‘P’.

In quotations, any italicised stress is in the original.
