

Contents

<i>Preface</i>	<i>page ix</i>
1 Quantum Mechanics and Experience	1
1.1 The Mathematical Formalism	1
1.2 The Born Rule	3
1.3 A Definite Connection with Experience	5
2 The Wave Function: <i>Ontic versus Epistemic</i>	9
2.1 There Is an Underlying Reality	9
2.2 The ψ -Epistemic View	11
2.3 ψ -Ontology Theorems	18
3 The Nomological View	22
3.1 The Effective Wave Function	23
3.2 The Universal Wave Function as Law	24
3.3 A Critical Analysis	26
4 Reality of the Wave Function	29
4.1 Ontological Models Framework Extended	29
4.2 A New Proof in Terms of Protective Measurements	31
4.3 With More Strength	34
4.4 A Weaker Criterion of Reality	39
5 Origin of the Schrödinger Equation	42
5.1 Spacetime Translation Invariance	43
5.2 The Energy–Momentum Relation	46
5.3 Derivation of the Schrödinger Equation	46
5.4 Further Discussion	48

viii	<i>Contents</i>	
6	The Ontology of Quantum Mechanics (I)	50
6.1	Schrödinger's Charge Density Hypothesis	51
6.2	Is an Electron a Charge Cloud?	53
6.3	The Origin of Charge Density	59
6.4	Further Discussion	66
7	The Ontology of Quantum Mechanics (II)	68
7.1	Wave Function Realism?	68
7.2	A New Ontological Analysis of the Wave Function	74
7.3	The Wave Function as a Description of Random Discontinuous Motion of Particles	80
7.4	Similar Pictures of Motion through History	89
8	Implications for Solving the Measurement Problem	94
8.1	The Measurement Problem Revisited	94
8.2	Can RDM of Particles Directly Solve the Measurement Problem?	104
8.3	The Origin of the Born Probabilities	106
8.4	A Model of Wavefunction Collapse in Terms of RDM of Particles	117
8.5	An Analysis of Other Collapse Models	137
9	Quantum Ontology and Relativity	147
9.1	The Picture of Motion Distorted by the Lorentz Transformation	147
9.2	Simultaneity: Relative or Absolute?	154
9.3	Collapse Dynamics and Preferred Lorentz Frame	157
9.4	Particle Ontology for Quantum Field Theory	160
	<i>Epilogue</i>	163
	<i>References</i>	170
	<i>Index</i>	185
