This discussion of causal uncertainty in tort liability adopts a comparative approach in order to highlight the important normative, epistemological and procedural implications of the various proposed solutions. Occupying a middle ground between the legal perspective and the philosophical views that are at stake when it comes to the resolution of tort law cases in a context of causal uncertainty, the arguments will be of great interest to legal scholars, legal philosophers and advanced tort law students.

MICUEL MARTÍN-CASALS is Full Professor of Civil Law and Director of the Institute of European and Comparative Private Law at the University of Girona.

DIEGO M. PAPAYANNIS is a professor of legal philosophy at the University of Girona.
UNCERTAIN CAUSATION IN TORT LAW
