<i>Notation</i>	<i>page</i> xi
<i>Preface</i>	xiii
<i>Introduction</i>	xv
1 Boson Fock space	1
1.1 Annihilation and creation operators	1
1.2 Lie algebras on the boson Fock space	4
1.3 Fock space over a Hilbert space	6
Exercises	9
2 Real Lie algebras	10
2.1 Real Lie algebras	10
2.2 Heisenberg–Weyl Lie algebra \mathfrak{hw}	12
2.3 Oscillator Lie algebra \mathfrak{osc}	13
2.4 Lie algebra $\mathfrak{sl}_2(\mathbb{R})$	14
2.5 Affine Lie algebra	20
2.6 Special orthogonal Lie algebras	21
Exercises	26
3 Basic probability distributions on Lie algebras	27
3.1 Gaussian distribution on \mathfrak{hw}	27
3.2 Poisson distribution on \mathfrak{osc}	31
3.3 Gamma distribution on $\mathfrak{sl}_2(\mathbb{R})$	36
Exercises	44
4 Noncommutative random variables	47
4.1 Classical probability spaces	47
4.2 Noncommutative probability spaces	48
4.3 Noncommutative random variables	54
4.4 Functional calculus for Hermitian matrices	57

4.5	The Lie algebra $so(3)$	59
4.6	Trace and density matrix	65
4.7	Spin measurement and the Lie algebra $so(3)$	70
	Exercises	72
5	Noncommutative stochastic integration	75
5.1	Construction of the Fock space	75
5.2	Creation, annihilation, and conservation operators	80
5.3	Quantum stochastic integrals	83
5.4	Quantum Itô table	86
	Exercises	88
6	Random variables on real Lie algebras	90
6.1	Gaussian and Poisson random variables on \mathfrak{osc}	90
6.2	Meixner, gamma, and Pascal random variables on $\mathfrak{sl}_2(\mathbb{R})$	94
6.3	Discrete distributions on $so(2)$ and $so(3)$	96
6.4	The Lie algebra $e(2)$	97
	Exercises	99
7	Weyl calculus on real Lie algebras	103
7.1	Joint moments of noncommuting random variables	103
7.2	Combinatorial Weyl calculus	106
7.3	Heisenberg–Weyl algebra	107
7.4	Functional calculus on real Lie algebras	114
7.5	Functional calculus on the affine algebra	117
7.6	Wigner functions on $so(3)$	122
7.7	Some applications	128
	Exercises	130
8	Lévy processes on real Lie algebras	131
8.1	Definition	131
8.2	Schürmann triples	134
8.3	Lévy processes on \mathfrak{hw} and \mathfrak{osc}	140
8.4	Classical processes	142
	Exercises	148
9	A guide to the Malliavin calculus	149
9.1	Creation and annihilation operators	149
9.2	Wiener space	155
9.3	Poisson space	162
9.4	Sequence models	168
	Exercises	173

Contents

ix

10 Noncommutative Girsanov theorem	178
10.1 General method	178
10.2 Quasi-invariance on \mathfrak{osc}	180
10.3 Quasi-invariance on $\mathfrak{sl}_2(\mathbb{R})$	183
10.4 Quasi-invariance on \mathfrak{hw}	184
10.5 Quasi-invariance for Lévy processes	185
Exercises	189
11 Noncommutative integration by parts	190
11.1 Noncommutative gradient operators	190
11.2 Affine algebra	192
11.3 Noncommutative Wiener space	197
11.4 The white noise case	212
Exercises	216
12 Smoothness of densities on real Lie algebras	217
12.1 Noncommutative Wiener space	217
12.2 Affine algebra	222
12.3 Towards a Hörmander-type theorem	224
Exercises	230
Appendix	231
A.1 Polynomials	231
A.2 Moments and cumulants	239
A.3 Fourier transform	241
A.4 Cauchy–Stieltjes transform	243
A.5 Adjoint action	244
A.6 Nets	245
A.7 Closability of linear operators	246
A.8 Tensor products	247
Exercise solutions	249
Chapter 1	249
Chapter 2	250
Chapter 3	253
Chapter 4	256
Chapter 5	259
Chapter 6	260
Chapter 7	266
Chapter 8	266
Chapter 9	267

Chapter 10	269
Chapter 11	270
Chapter 12	270
