- acoustic intensity, 89
 anomalous scaling, 97
 anomaly, xiii, 75, 84
- bore, 141
 boundary conditions, 5
 boundary layer, 48
 broken symmetry, xiii, 51, 76, 97
- caustic, 101, 116, 177
 chaotic attractor, 70, 187
 characteristics, 92
 complex potential, 22
 compressibility, 101
 condensate, 130
 conformal transformation, 23
 continuity equation, 4
 continuous media, 1
 continuous motion, 2
 correlation function, 74
 creeping flow, 45
 cumulative effect, 51
 cumulative jet, 51
- D'Alembert paradox, 36
 Döppler shift, 100
 decay instability, 127
 decaying turbulence, 98
 decibels, 89
 dispersion relation, 88, 108, 121, 125, 131
 drag, 35, 36, 44, 55, 77, 79, 102
 drag crisis, 53, 159
- Earnshaw paradox, 91
 eddy diffusivity, 83
- elastic turbulence, 194
 elliptic equation, 93, 101
 energy cascade, 73
 energy dissipation rate, 72, 96
 energy flux, 73
 entrainment, 50
 entropy equation, 5
 Euler equation, 3
 Eulerian description, 12
- fluid particle, 3
 friction, xii, 37, 43
 friction factor, 77
 Froude number, 43, 141
- Galilean invariance, 12, 53, 96
 Galilean transformation, 136
 Goldstone mode, 142
 group velocity, 115, 181
- Hamiltonian, 31, 32, 122, 128, 132
 Hopf substitution, 94
 hydraulic jump, 141
 hydrostatics, 6
 hyperbolic equation, 93, 101
- incompressibility, 19
 incompressible fluid, 6, 19, 21, 41, 107
 inertia, xii, 4, 24, 43
 inertial interval, 73
 instability, 64, 103, 126, 130
 inverse cascade, 138
 inviscid limit, 72, 96
 irrotational flow, 17, 18

jet, 61
 jet attachment, 50
 jet merging, 51

Kármán vortex street, 52
 Kármán–Howarth relation, 75
 Kelvin wedge, 119
 Kelvin’s theorem, 16
 Kelvin–Helmholtz instability, 64, 191
 kinematic boundary condition, 109
 kinematic viscosity, 40
 kink, 136

Lagrangian coordinates, 32, 89
 Lagrangian description, 12
 Landau law, 68
 lift, 35, 56, 57, 101
 Lipschitz condition, 2, 85
 logarithmic profile, 78

Mach cone, 99
 Mach number, 99
 Magnus force, 57, 60, 159
 mean free path, 40
 modulational instability, 130, 134
 momentum flux, 40, 54, 77

negative temperature, 139
 no-slip, 40
 no-stress, 40
 non-newtonian fluids, 38
 nozzle, 179

parametric instability, 127
 parametric resonance, 127
 Pascal law, 2, 58
 path integral, 76
 Peclet number, 82
 phase velocity, 115
 Pitot tube, 11
 potential flow, 22
 Prandtl number, 84, 169
 Purcell swimmer, 60

Rankine-Hugoniot relations, 102, 104
 Rayleigh criterium, 66
 Rayleigh–Bénard instability, 103
 Rayleigh–Taylor instability, 190
 recirculating vortex, 50
 refraction, 176
