Index

$\alpha_D$ definition, 28
$\beta_D$ definition, 28
$\epsilon$ definition, 30
beam constitutive law, 13
beam governing equations, 15
beam kinematics, 12
bilayer
  basic solution, 49
  equal thickness, 55
  four-point bending, 57
bilayers
  effect properties for multilayer, 80
  blister test, 43
  buckling
    bilayer, 138
    circular, 146
    energy release rate, 140, 144
    mode mix, 145
  stress intensity factors, 144
  telephone cord, 152
  bulge test, 43
channeling cracks, 89
  effect of delamination, 100
  effect of substrate modulus, 93
  effect of substrate plasticity, 95
  interacting, 96
  on semi-infinite substrate, 92
  software, 247
calcium-magnesium-alumino-silicate, CMAS, 245
corrective heat transfer, 19
corner cracks, 132
  crack face contact, 37
  crack tip fields
    bimaterial, 30, 35, 269
    center crack on an interface, 36
    isotropic, 22
  cut test, 131
delamination
  phase factor, 51
  software, 239
temperature gradients, 164
  thin film, 54
  thin strip, 157
  Dundurs’ parameters, 28
environmental barrier coatings, EBCs, 202, 251
equilibrium energy release rate
  bilayer with uniform temperature, 60
  basic definition, 24
  buckled film, 144
  center crack on interface, 35
  channeling, 89
  corner cracks, 132
  crack length effect, 128
  crack spacing, 98
  deflection at an interface, 122
  delamination of bilayer, 50
  four-point bending, 57
  interface, Irwin’s relation, 30
  kinking from an interface, 113
  multilayer calculation, 75, 78
  numerical computation, 232
  penetrating crack, 121
  temperature gradient, 163, 167
  thermal shock, 176
  thermal transients, 182
  thin film on thick substrate, 54
  tunneling crack, 103
four-point bending, 46, 57
  heat equation, 18
  heat flux, 19
  Hooke’s law, 6
  hot spots, 178
indentation, 46
interface toughness
  epoxy glass, 39
  epoxy plexiglass, 32
  in TBCs, 45
interface toughness (cont.)
measurement overview, 41
mixed mode forms, 32
mixed mode, $\beta_D \neq 0$, 35
mixed mode, $\beta_D = 0$, 31

kinking
criteria, interface, 108
criteria, isotropic, 26
effect of mismatch, 111
interface, 106
isotropic material, 24
role of flaw size, 114
role of residual stress, 114

large deflections, 11, 143

mesh considerations, 236, 241, 263
mode mix
basic definition for an interface, 35
bilayers, 58
delamination with edge/moment loads, 54
effect for TBC's, 46
general multilayers, 78
isotropic material, 25
numerical computation, 233
mudcracks, see channeling cracks
multilayers
bilayer approximation, 79
delamination ERR, 74, 76
examples, 81
governing equations, 70

phase angle, see mode mix

phase factor
delamination, 51
thin layer, 87
plate theory, 16

software
chart, 4
FEA, 227
mode-mix, 227
steady-state, 188
transients, 208
stiffness derivative, 232
stress intensity factors
bilayer, 52
center crack on interface, 36
complex representation, 30
numerical computation, 233
superlayer test, 81

thermal barrier coatings, TBCs, 45, 84, 244, 245
temperature gradient
bilayer, 164
isotropic material, 162
multilayers, 171
thin film on thick substrate, 168
transient, 174
thermal shock, 174
thermal transients
cold shock, 175
critical cooling rates, 185
hot spots, 178
multilayers, 183
single layer, 180
trilayer, 81, 86
tunneling cracks, 102
