<i>List of Figures</i>	<i>page</i> viii
<i>Preface</i>	xi
<i>Prerequisites</i>	xv

## PART I

<b>1 Preliminaries</b>	3
1.1 Complex Numbers	3
1.2 Estimates	6
1.3 Stereographic Projection	8
1.4 Exercises	10
<b>2 Analytic Functions</b>	13
2.1 Polynomials	13
2.2 Fundamental Theorem of Algebra and Partial Fractions	15
2.3 Power Series	17
2.4 Analytic Functions	20
2.5 Elementary Operations	23
2.6 Exercises	27
<b>3 The Maximum Principle</b>	31
3.1 The Maximum Principle	31
3.2 Local Behavior	33
3.3 Growth on $\mathbb{C}$ and $\mathbb{D}$	35
3.4 Boundary Behavior	38
3.5 Exercises	41
<b>4 Integration and Approximation</b>	43
4.1 Integration on Curves	43
4.2 Equivalence of Analytic and Holomorphic	47
4.3 Approximation by Rational Functions	53
4.4 Exercises	60
<b>5 Cauchy's Theorem</b>	63
5.1 Cauchy's Theorem	63
5.2 Winding Number	64
5.3 Removable Singularities	70
5.4 Laurent Series	72

5.5	The Argument Principle	76
5.6	Exercises	78
<b>6</b>	<b>Elementary Maps</b>	<b>81</b>
6.1	Linear Fractional Transformations	82
6.2	Exp and Log	86
6.3	Power Maps	87
6.4	The Joukovski Map	89
6.5	Trigonometric Functions	91
6.6	Constructing Conformal Maps	93
6.7	Exercises	98
<b>PART II</b>		
<b>7</b>	<b>Harmonic Functions</b>	<b>105</b>
7.1	The Mean-Value Property and the Maximum Principle	105
7.2	Cauchy–Riemann and Laplace Equations	111
7.3	Hadamard, Lindelöf and Harnack	114
7.4	Exercises	118
<b>8</b>	<b>Conformal Maps and Harmonic Functions</b>	<b>123</b>
8.1	The Geodesic Zipper Algorithm	123
8.2	The Riemann Mapping Theorem	129
8.3	Symmetry and Conformal Maps	132
8.4	Conformal Maps to Polygonal Regions	135
8.5	Exercises	137
<b>9</b>	<b>Calculus of Residues</b>	<b>141</b>
9.1	Contour Integration and Residues	141
9.2	Some Examples	142
9.3	Fourier and Mellin Transforms	145
9.4	Series via Residues	149
9.5	Laplace and Inverse Laplace Transforms	150
9.6	Exercises	154
<b>10</b>	<b>Normal Families</b>	<b>156</b>
10.1	Normality and Equicontinuity	156
10.2	Riemann Mapping Theorem Revisited	162
10.3	Zalcman, Montel and Picard	164
10.4	Exercises	168
<b>11</b>	<b>Series and Products</b>	<b>170</b>
11.1	Mittag-Leffler’s Theorem	170
11.2	Weierstrass Products	175
11.3	Blaschke Products	181

## Contents

vii

11.4 The Gamma and Zeta Functions	184
11.5 Exercises	189
<b>PART III</b>	
<b>12 Conformal Maps to Jordan Regions</b>	195
12.1 Some Badly Behaved Regions	195
12.2 Janiszewski's Lemma	197
12.3 Jordan Curve Theorem	199
12.4 Carathéodory's Theorem	201
12.5 Exercises	205
<b>13 The Dirichlet Problem</b>	207
13.1 Perron Process	207
13.2 Local Barriers	209
13.3 Riemann Mapping Theorem Again	212
13.4 Exercises	214
<b>14 Riemann Surfaces</b>	216
14.1 Analytic Continuation and Monodromy	216
14.2 Riemann Surfaces and Universal Covers	220
14.3 Deck Transformations	226
14.4 Exercises	227
<b>15 The Uniformization Theorem</b>	230
15.1 The Modular Function	230
15.2 Green's Function	232
15.3 Simply-Connected Riemann Surfaces	237
15.4 Classification of All Riemann Surfaces	243
15.5 Exercises	243
<b>16 Meromorphic Functions on a Riemann Surface</b>	246
16.1 Existence of Meromorphic Functions	246
16.2 Properly Discontinuous Groups on $\mathbb{C}^*$ and $\mathbb{C}$	246
16.3 Elliptic Functions	248
16.4 Fuchsian Groups	251
16.5 Blaschke Products and Convergence Type	253
16.6 Exercises	257
<i>Appendix</i>	260
A.1 Fifteen Conditions Equivalent to Analytic	260
A.2 Program for Color Pictures	261
<i>Bibliography</i>	267
<i>Index</i>	269
