<i>Introduction</i>	xxiii
1 Installation: A Synthetic Theory to Explain How Humans Construct Systems That Support and Format Individual Behaviour	I
1.1 In Society, Individual Behaviour Appears Standardized and Predictable in Many Situations	II
1.2 An Example: Road Traffic, Showing How the Three Layers of Behavioural Determination Operate as a Single Regulation System	14
1.3 The Research Questions: How Do Individuals Choose Their Behavioural Path in a Situation? How Does Society Regulate the Behaviour of Its Members?	17
1.4 This Book's Structure	19
2 The Problem of Human Action and the Problem of Social Regulation: Two Sides of the Same Coin	21
2.1 The Three Layers of Determination of Human Behaviour	25
2.2 Our Microscope: Subjective Evidence-Based Ethnography	32
3 Theoretical Frameworks Grounding Installation Theory	44
3.1 Ecological Psychology	45
3.2 Activity Theory and Scripts	57
3.3 Social Constructionism	63
3.4 Distributed Cognition, Actants	70
3.5 Social Representations	76
3.6 Takeaway on the Theories and Some Comments	84
4 The Structure of Installations	93
4.1 Components of Installations Are Distributed over Three Layers	95
4.2 Layer 1: Objective Material Environment	97

viii	<i>Contents</i>	
	4.3 Layer 2: Embodied Interpretive Systems	108
	4.4 Layer 3: Social Regulation	123
	4.5 The Three Layers Combine as a Single Functional System and Their Redundancy Makes Installations Resilient	159
	4.6 Takeaway: The Resilient Power of Installations and Its Limits	169
5	Endurance of Installations: The Reconstructive Cycle of Practice	175
	5.1 An Overview of the Standard Reproduction Cycle	178
	5.2 Reproduction Cycle of Embodied Competences	181
	5.3 Reproduction Cycle of Material Components of the Installation	262
	5.4 The Role of Communities and Institutions in the Installations' Reproduction Cycle	267
	5.5 Takeaway: Distributed Control, Distributed Reproduction	281
6	Selection Mechanisms in Societal Evolution: Two Cases: Science and Industry	290
	6.1 Science	293
	6.2 Innovation Processes in Industry	303
	6.3 Takeaway: Some Common Features of the Societal Selection Mechanisms	314
7	The Evolution of Installations	321
	7.1 The Darwinian Principles of Evolution: Do They Apply to Installations?	322
	7.2 Overview of the Model	328
	7.3 The Evolution of the Symbolic Layer, Embodied or Embedded	341
	7.4 Genesis and Evolution of Objects	357
	7.5 The Regulation of Installations and the Evolution of Institutions	362
	7.6 A Synthetic Schema of the Evolution of Installations	368
8	Redesigning Installations to Change Behaviour	373
	8.1 Intervention and Change in Organizations	376
	8.2 Micro-level: An Academic Department	378
	8.3 Micro-level on a Large Scale: Changing the Drinking Behaviour	380
	8.4 Meso-level: Experimental Reality and the LDC Case	385
	8.5 Examples of Interventions Using Social Norms in Colombia	396
	8.6 A General Practical Approach to Apply Installation Theory for Interventions	399
9	Conclusion	403
	9.1 An Abstract of Installation Theory	403
	9.2 Considerations on Trees and Forests	415
	<i>Glossary</i>	425
	<i>References</i>	433
