

## Contents

<i>Preface</i>	<i>page</i> ix
<i>List of Symbols</i>	xi
<b>Part I Fundamentals of Passive Seismic Monitoring</b>	<b>1</b>
<b>1 Constitutive Relations and Elastic Deformation</b>	<b>3</b>
1.1 Stress and Strain	3
1.2 Linear Elasticity	8
1.3 Elastic Anisotropy	11
1.4 Effective Media	16
1.4.1 Voigt–Reuss–Hill Averaging	16
1.4.2 Hashin–Shtrikman Extremal Bounds	17
1.4.3 Backus Averaging	18
1.4.4 Fractured Media	19
1.5 Poroelasticity	21
1.5.1 Fluid-Substitution Calculations	22
1.5.2 Pore-Pressure Diffusion	23
1.5.3 Fluid Flow	24
1.6 Summary	25
1.7 Suggestions for Further Reading	26
1.8 Problems	26
<b>2 Failure Criteria and Anelastic Deformation</b>	<b>29</b>
2.1 Brittle Structures in Rock	29
2.1.1 Stress Field Near a Fracture	31
2.2 Effective Stress and Brittle-Failure Criteria	33
2.2.1 Mohr–Coulomb Criterion	36
2.2.2 Griffith Criterion	37
2.2.3 Other Brittle-Failure Criteria	38
2.3 Frictional Sliding on a Fault	40
2.3.1 Rate–State Friction	42
2.4 Earthquake Cycle and Stress Drop	43
2.5 Ductile Deformation	46
2.6 Summary	48
2.7 Suggestions for Further Reading	48
2.8 Problems	49

<b>3 Seismic Waves and Sources</b>	51
3.1 Equations of Motion	51
3.2 Wave Solutions	53
3.2.1 Body Waves	53
3.2.2 Surface Waves	56
3.2.3 Green's Functions and Geometrical Spreading	61
3.2.4 Wave Amplitude Partitioning at Interfaces	63
3.3 Effects of Anisotropy	66
3.3.1 Thomsen Parameters for TI Media	68
3.4 Anelastic Attenuation	69
3.5 Seismic Sources	72
3.5.1 Moment Tensors	72
3.5.2 Double-Couple Sources	75
3.5.3 Non-Double-Couple Sources	79
3.6 Magnitude Scales	82
3.7 Source Scaling and Spectral Models	85
3.8 Magnitude Distributions	88
3.9 Aftershocks	90
3.10 Summary	91
3.11 Suggestions for Further Reading	93
3.12 Problems	93
<b>4 Stress Measurement and Hydraulic Fracturing</b>	95
4.1 How Subsurface Stress Is Determined	95
4.1.1 Focal-Mechanism Inversion	96
4.1.2 Crossed-Dipole Sonic Logs	97
4.1.3 Wellbore Failure Mechanisms	97
4.1.4 Diagnostic Fracture-Injection Tests	100
4.1.5 Overcoring	102
4.1.6 Simplified Mathematical Models	103
4.2 Hydraulic Fracturing	106
4.2.1 Completion Methods and Treatment Strategies	111
4.3 Numerical Models of Hydraulic Fractures	114
4.4 Flowback and Flow Regimes	121
4.5 Summary	123
4.6 Suggestions for Further Reading	124
4.7 Problems	124
<b>Part II Applications of Passive Seismic Monitoring</b>	127
<b>5 Passive-Seismic Data Acquisition</b>	129
5.1 A Brief History of Microseismic Monitoring	131
5.2 Sensor Configurations	134
5.2.1 Deep-Downhole Arrays	134

5.2.2	Surface and Shallow-Well Arrays	138
5.2.3	Regional Seismograph Networks	141
5.3	Background Model Construction and Calibration	143
5.3.1	Calibration Sources	144
5.4	Survey Design Considerations	146
5.4.1	Sensor Types	146
5.4.2	Noise	148
5.5	Survey Design Optimization	149
5.6	Summary	154
5.7	Suggestions for Further Reading	156
5.8	Problems	156
<b>6</b>	<b>Downhole Microseismic Processing</b>	<b>158</b>
6.1	Input Data	160
6.2	Coordinate Systems and Transformations	161
6.3	Event Detection and Arrival-Time Picking	165
6.3.1	Single Receiver Methods	166
6.3.2	Multi-Receiver Methods	169
6.3.3	Wavefield Separation	172
6.3.4	Matched Filtering and Subspace Detection	173
6.4	Hypocentre Estimation	179
6.5	Background Model Determination	182
6.6	Source Characterization	185
6.7	Summary	188
6.8	Suggestions for Further Reading	188
6.9	Problems	189
<b>7</b>	<b>Surface and Shallow-Array Microseismic Processing</b>	<b>190</b>
7.1	The Free-Surface Effect and Wave Amplification	192
7.2	Beamforming and Vespagrams	194
7.3	Basic Processing Workflow	195
7.4	Elastic Imaging	197
7.4.1	Imaging Condition	201
7.4.2	Resolution and Uncertainty	202
7.5	Case Examples	203
7.6	Summary	205
7.7	Suggestions for Further Reading	208
7.8	Problems	208
<b>8</b>	<b>Microseismic Interpretation</b>	<b>209</b>
8.1	Interpretation Workflow	210
8.2	Data Preconditioning	211
8.3	Event Attributes	212
8.4	Clustering Analysis	213
8.5	Interpretation Methods	216

8.5.1	Estimated Stimulated Volume	216
8.5.2	Frequency–Magnitude Distributions and Fractal Dimension	221
8.5.3	Microseismic Facies Analysis	224
8.6	Source Mechanism Studies	226
8.6.1	Waveform Modelling	230
8.7	Applications	233
8.8	Interpretation Pitfalls	237
8.9	Summary	238
8.10	Suggestions for Further Reading	238
8.11	Problems	239
<b>9</b>	<b>Induced Seismicity</b>	<b>241</b>
9.1	Background	241
9.1.1	Pioneering Studies	242
9.1.2	Distinguishing Between Natural and Induced Seismicity	243
9.1.3	Activation Mechanisms	245
9.2	Tools of the Trade	250
9.2.1	Event Detection	252
9.2.2	Hypocentre Estimation	254
9.2.3	Moment–Tensor Inversion	257
9.3	Case Studies	258
9.3.1	Engineered Geothermal Systems (EGS)	259
9.3.2	Saltwater Disposal (SWD)	264
9.3.3	Hydraulic Fracturing (HF) Induced Seismicity	268
9.4	Traffic Light Systems	272
9.5	Probabilistic Seismic Hazard Assessment (PSHA)	274
9.6	Natural Analogs of Injection-Induced Earthquakes	278
9.7	Summary	278
9.8	Suggestions for Further Reading	280
9.9	Problems	280
<b>Appendix A</b>	<b>Glossary</b>	<b>281</b>
<b>Appendix B</b>	<b>Signal-Processing Essentials</b>	<b>292</b>
<b>Appendix C</b>	<b>Data Formats</b>	<b>299</b>
