<i>Preface</i>	page ix
<i>Preface to the Second Edition</i>	x
<b>1 Introduction</b>	1
1.1 Normative and Descriptive Decision Theory	3
1.2 Rational and Right Decisions	4
1.3 Risk, Ignorance and Uncertainty	5
1.4 Social Choice Theory and Game Theory	8
1.5 A Very Brief History of Decision Theory	10
<b>2 The Decision Matrix</b>	17
2.1 States	19
2.2 Outcomes	22
2.3 Acts	28
2.4 Rival Formalizations	31
<b>3 Decisions under Ignorance</b>	41
3.1 Dominance	42
3.2 Maximin and Leximin	44
3.3 Maximax and the Optimism–Pessimism Rule	47
3.4 Minimax Regret	50
3.5 The Principle of Insufficient Reason	54
3.6 Randomized Acts	57
<b>4 Decisions under Risk</b>	65
4.1 Maximizing What?	66
4.2 Why is it Rational to Maximize Expected Utility?	72
4.3 The Axiomatic Approach	75
4.4 The Allais Paradox	80
4.5 The Ellsberg Paradox	82

vi Contents

4.6	The St. Petersburg Paradox	84
4.7	The Pasadena Paradox	88
4.8	The Two-Envelope Paradox	91
<b>5</b>	<b>Utility</b>	<b>97</b>
5.1	How to Construct an Ordinal Scale	98
5.2	Von Neumann and Morgenstern's Interval Scale	101
5.3	Can Utility be Measured on a Ratio Scale?	113
5.4	Can We Define Utility Without Being Able to Measure It?	117
<b>6</b>	<b>The Mathematics of Probability</b>	<b>124</b>
6.1	The Probability Calculus	125
6.2	Conditional Probability	130
6.3	Bayes' Theorem	132
6.4	The Problem of Unknown Priors	134
<b>7</b>	<b>The Philosophy of Probability</b>	<b>141</b>
7.1	The Classical Interpretation	142
7.2	The Frequency Interpretation	144
7.3	The Propensity Interpretation	147
7.4	Logical and Epistemic Interpretations	149
7.5	Subjective Probability	151
<b>8</b>	<b>Bayesianism and Pragmatic Arguments</b>	<b>174</b>
8.1	Why Should We Accept the Axioms?	177
8.2	Must a Rational Preference be Transitive?	179
8.3	Must a Rational Preference be Complete?	183
8.4	Must a Rational Preference Satisfy the Independence Axiom?	190
8.5	Can Bayesians be Money Pumped?	194
8.6	Do Bayesians Put the Cart Before the Horse?	197
8.7	Non-Bayesian Decision Theory	200
<b>9</b>	<b>Causal vs. Evidential Decision Theory</b>	<b>206</b>
9.1	Newcomb's Problem	206
9.2	Causal Decision Theory	209
9.3	Evidential Decision Theory	211
<b>10</b>	<b>Risk Aversion</b>	<b>220</b>
10.1	Actuarial Risk Aversion	220
10.2	Aversion Against Utility Risks	225
10.3	Epistemic Risk Aversion	228

<b>11 Game Theory I: Basic Concepts and Zero-sum Games</b>	234
11.1 The Prisoner's Dilemma	236
11.2 A Taxonomy of Games	242
11.3 Common Knowledge and Dominance Reasoning	246
11.4 Two-Person Zero-sum Games	252
11.5 Mixed Strategies and the Minimax Theorem	254
<b>12 Game Theory II: Nonzero-sum and Cooperative Games</b>	263
12.1 The Nash Equilibrium	263
12.2 The Battle of the Sexes and Chicken	267
12.3 The Bargaining Problem	270
12.4 Iterated Games	274
12.5 Game Theory and Evolution	279
12.6 Game Theory and Ethics	281
<b>13 Social Choice Theory</b>	287
13.1 The Social Choice Problem	289
13.2 Arrow's Impossibility Theorem	292
13.3 Sen on Liberalism and the Pareto Principle	298
13.4 Harsanyi's Utilitarian Theorems	301
<b>14 Overview of Descriptive Decision Theory</b>	311
14.1 Observed Violations of the Expected Utility Principle	311
14.2 Prospect Theory	314
14.3 Violations of Transitivity and Completeness	316
14.4 The Relevance of Descriptive Decision Theory	318
<i>Appendix: Glossary</i>	323
<i>Further Reading</i>	329
<i>Index</i>	336
