

Contents

	<i>Preface</i>	<i>page</i> ix
	<i>Acknowledgments</i>	xii
1	Introduction	1
	1.1 Dimensional Homogeneity	1
	1.2 Dimensionless Products	3
	1.3 Dimensional Formulae	4
	1.4 The Rayleigh Algorithm	5
	1.5 The Buckingham π Theorem	7
	1.6 The Number of Dimensions	8
	1.7 The Number of Dimensionless Products	9
	1.8 Example: Pressure of an Ideal Gas	9
	1.9 A Mistake to Avoid	11
	Essential Ideas	14
	Problems	14
2	Mechanics	17
	2.1 Kinematics and Dynamics	17
	2.2 Effective Dimensions	17
	2.3 Imposed Dimensions	20
	2.4 Example: Hanging Spring-Mass System	21
	2.5 Example: Hanging, Stretched Cable	23
	2.6 Asymptotic Behavior	24
	2.7 Example: Speed of Sound	25
	2.8 Example: Side Window Buffeting	27
	2.9 Example: Two-Body Orbits	29
	Essential Ideas	30
	Problems	31

3	Hydrodynamics	33
	3.1 Fluid Variables	33
	3.2 Example: Water Waves	33
	3.3 Surface Tension	35
	3.4 Example: Largest Water Drop	37
	3.5 Viscosity	39
	3.6 Example: Hydraulic Jump	41
	3.7 Example: Equilibrium Pipe Flow	43
	3.8 Example: Non-Equilibrium Pipe Flow	45
	3.9 Scale Models	46
	Essential Ideas	47
	Problems	47
4	Temperature and Heat	49
	4.1 Heat Transfer	49
	4.2 The Dimensions of Temperature and Heat	50
	4.3 Conduction and Convection	50
	4.4 Example: Cooking a Turkey	51
	4.5 Diffusion	54
	4.6 Making the Equations Dimensionless	55
	4.7 Example: Growth of Arctic Ice	55
	4.8 Example: Stack Effect	58
	Essential Ideas	59
	Problems	59
5	Electrodynamics and Plasma Physics	61
	5.1 Maxwell's Equations	61
	5.2 Example: Oscillations of a Compass Needle	63
	5.3 Example: Radiation from an Accelerating Charge	65
	5.4 Example: Child's Law	66
	5.5 Plasma Physics	68
	5.6 Example: Plasma Oscillations	69
	5.7 Example: Pinch Effect	70
	Essential Ideas	72
	Problems	72
6	Quantum Physics	74
	6.1 Planck's Constant	74
	6.2 Example: Blackbody Radiation	75
	6.3 Example: Spectral Energy Density of Blackbody Radiation	76
	6.4 Example: Bohr Model	77

	Table of Contents	vii
	6.5 Atomic Units	79
	6.6 Example: Quantum Ideal Gas	80
	6.7 Example: Quantized Radiation from an Accelerating Charge	82
	Essential Ideas	83
	Problems	84
7	Dimensional Cosmology	85
	7.1 The Fundamental Dimensional Constants	85
	7.2 Eddington-Dirac Number	85
	7.3 Example: Gravitational-Electrostatic Mass	87
	7.4 Example: Classical Electron Radius	87
	7.5 Classical Scales	88
	7.6 Fine Structure Constant	89
	7.7 The 15 Scales	90
	7.8 Planck Scale	92
	7.9 Example: Planck Mass	93
	7.10 The 22 Quantities	93
	Essential Ideas	95
	Problems	95
	Appendix: Answers to Problems	96
	<i>References</i>	98
	<i>Index</i>	100
