

## Index

- Abatement technology, 185  
 Addiction, 82, 84  
 Additive separability, 136, 140, 186  
 Address approach, 125  
 Adjoint equation, *see costate equation*  
 Advertising  
   and industry structure, 112, 114  
   for goodwill, 15, 38, 39, 102, 111, 113, 115, 118, 119, 245, 247  
   for market share, 102, 104, 107–110, 112, 243  
   for sales, 40, 102, 104, 105, 116, 117, 119, 139  
   informative –, 101, 119, 126, 128, 130  
   persuasive –, 101, 102, 138, 139  
 Arrow vs Schumpeter debate, 112, 152, 188, 204  
 Autarky, 217, 224, 225
- Backstop technology, 203, 205  
 Backward induction, 17, 49, 134, 236, 246  
 Bellman equation, 7, 8, 10, 13, 15, 16, 19, 28, 29, 35–37, 60–62, 69–72, 74–76, 87, 107, 129, 154, 157, 189, 191, 192, 200, 201, 214, 215, 222, 226, 228, 241, 242, 248, 249  
 Bequest function, *see salvage value*  
 Bertrand competition, 85, 235  
   and advertising, 103, 113, 114  
   and costly adjustment, 82  
   and intraindustry trade, 215, 217, 218, 220, 221  
   and process innovation, 154, 168, 169  
   and product innovation, 168, 169  
   and resource extraction, 195  
   in the Ramsey model, 77, 217, 221  
   under vertical differentiation, 134  
 Best reply function, 17–19, 56, 84, 89, 186, 219, 220, 222, 235–237  
 Brand equity, *see advertising for goodwill*  
 Brownian motion, 92
- Capacity accumulation, 24, 25, 27, 45, 72, 73, 77, 92, 108, 187, 202, 223  
   under feedback rules, 75, 82  
   under open-loop rules, 74  
 Capacity constraint, 25, 44, 60  
 Cartel behaviour, 63, 64, 70, 88, 154, 156–159, 163  
   and resource exploitation, 184, 196, 198–200
- Catching-up optimality criterion, 192  
 Carrying capacity, 31, 33, 40, 117  
 Cauchy problem, 2  
 Coase conjecture, 24, 44, 47–49  
 Command optimum, 183, 225, 229, 250  
 Competitive fringe, 90, 198, 200  
 Conjectural variation, 73, 84, 119, 213, 215  
 Consumer  
   environmental awareness, 181, 187  
   surplus, 81, 110, 157, 170, 183, 187, 195, 205, 217, 221, 223  
   taste for variety, 82  
 Control equation, 5, 26, 46, 58, 69, 91, 131, 156, 165, 183, 184, 219, 220, 244  
 Control variable, 3, 5, 7, 9, 13, 16  
 Controllability, 19, 237, 239, 240, 243  
 Cooperative equilibrium, 63  
 Corporate social responsibility (CSR), 81  
 Costate equation, 4, 5, 12, 13, 26, 33, 39, 43, 46, 58, 65, 78, 85, 132, 136, 155, 163, 186, 188, 213, 238  
   and controllability, 237, 240  
 Costate variable, 4, 5, 12, 14, 18  
   and controllability, 237  
 Cournot competition, 69, 71, 72, 86, 137, 170, 182, 235  
   and advertising, 103, 114, 138  
   and costly adjustment, 85  
   and intraindustry trade, 212, 215–217, 219, 221, 222  
   and pollution, 181, 183, 187  
   and process innovation, 155, 158, 159, 168, 169  
   and product innovation, 162, 168, 169  
   and resource extraction, 181, 190, 195, 200, 203, 225, 226  
   in the Ramsey model, 77–81, 86, 217, 219, 221, 243  
   in the Stackelberg model, 17, 234–236  
   under sticky prices, 56, 59, 61, 66, 212  
 Critical mass, 42
- $\delta$ -strategies, 89  
 Delegation, 80–82, 195

- Demand effect, 127  
 Demand function  
   hyperbolic –, 55, 66–68  
   nonlinear –, 80  
   sluggish –, 68, 71, 142  
 Determinant, 1, 6, 27, 46, 59  
 Diffusion model, 40, 102, 116, 117, 126  
 Discrete choice theory, 125, 126  
 Dorfman-Steiner condition, 38  
 Double marginalization, 244, 245  
 Durable good  
   monopoly, 44, 45, 47–49, 116  
   oligopoly, 82, 83, 214  
 Dynamic programming, 6, 7, 15, 19, 30, 35, 38, 234  
 Eigenvalue, 6  
 Elasticity  
   goodwill –, 39  
   price –, 39  
 Entry  
   barriers, 90, 92, 171  
   process, 125, 133  
 Environmental damage, 30, 183, 197, 224, 225, 227  
 Equilibrium  
   closed-loop –, 11, 13, 15, 56, 65, 67, 72, 85, 137, 213  
   feedback –, 8, 11, 13, 15, 16, 30, 35–37, 56, 61, 63, 64, 69, 70, 72, 74, 75, 82, 108, 130, 174, 189, 192–195, 205, 216, 217, 228, 239, 242, 243  
   Markovian –, 56, 89, 137  
   open-loop –, 8, 11–13, 15, 19, 56, 58, 59, 63, 69, 72, 74, 87, 104, 105, 130, 131, 135, 150, 155, 158, 182, 187, 200, 239–241, 243, 244  
 Exponential game, 14, 150  
 Extinction, 3, 32, 34  
 Feedback strategy, 10, 60, 114, 118, 119, 129, 154, 156, 162, 185, 189, 191, 222, 224, 241, 242  
   linear –, 15, 16, 60, 63, 71, 82, 85, 133, 190, 191, 194, 196, 215, 226–228  
   nonlinear –, 16, 55, 56, 60, 62, 69, 103, 190, 228  
 Finiteness property, 137  
 Fiscal policy, 234  
 Focus, 6, 67  
 Folk theorem, 48, 61  
 Free trade, 215–217, 219, 221–225  
 Gibrat's law, 93  
 Global warming, 212, 225  
 Globalization, 225  
 Golden rule, 77–81, 218, 219  
 Goodwill, *see advertising*  
 Green paradox, 197, 205, 229  
 Green technology, 185, 188, 196, 225  
 Habit, 221–223  
 Hamiltonian function, 4, 8, 12–14, 17, 37, 39, 43, 50, 57, 67, 74, 85–88, 109, 111, 113, 136, 151, 155, 156, 162, 165, 182, 186, 220, 228, 237–240, 243  
   current value –, 12, 26, 32, 45, 90  
 Hamilton-Jacobi-Bellman (HJB) equation, *see Bellman equation*  
 Harvest, 2, 189, 194, 202  
 Hazard rate, 150, 152, 153  
 Health care, 142  
 Hedonic preferences, 134, 138, 139  
 Hold-up problem, 173, 245  
 Horizon  
   finite –, 5, 47, 48, 169  
   infinite –, 17, 48, 84, 88, 90, 128, 155, 172, 189, 227  
 Horizontal differentiation, 125, 126, 128, 140, 173  
 Hotelling  
   model, 41, 126–129, 173  
   rule, 194, 196–200, 205, 228  
 Industry evolution, 73, 93, 152  
 Information  
   closed-loop –, 10–12  
   feedback –, 10, 11  
   open-loop –, 9, 11  
 Initial condition, 2, 4, 7, 9–13, 18  
 Innovation  
   and industry structure, 150, 152  
   drastic –, 150, 152  
   green –, 185, 205  
   non drastic –, 150, 152  
   process –, 154, 159, 162, 168, 172  
   product –, 126, 131, 161, 162, 168, 171  
   race, 149, 150, 152–154, 173  
 International trade  
   and import tariffs, 212, 214, 215, 218, 219, 222, 227  
   and pollution, 224, 225, 227, 228  
   and quotas, 214, 215, 218, 219, 222  
 Jacobian matrix, 1, 6, 27, 32, 58, 74, 235  
 Knowledge  
   accumulation, 153  
   stock, 153, 154, 158  
 Lanchester model, 107, 119, 126, 142  
 Learning by doing, 149, 152, 153, 158, 170, 171  
 Limit price, 56, 90, 91, 200  
 Linear quadratic (LQ) game, 7, 8, 13, 15, 16, 29, 32, 60, 72, 74, 77, 129, 135, 165, 181, 183, 242  
 Linear state game, 13, 14, 109, 151, 182, 244  
 Logistic growth, 2, 117, 189

- Managerial firm, 79, 81  
 Mark-up, 105, 106, 109, 110, 115, 187  
 Market growth model, 102, 116  
 Marketing channel, 245, 249, 250  
 Markov  
   complementarity, 85  
   perfection, 7, 13, 93, 184  
   substitutability, 85  
 Maximum principle, 4, 119  
 Maximum sustainable yield, 31  
 Monetary policy, 234  
 Merger, 73, 159  
   in the Ramsey model, 79, 80  
 Monopolistic competition, 125, 212  
 Monopoly  
   natural –, 135  
   persistence of –, 172  
 Nash equilibrium, 1, 11, 12, 15, 17, 18  
 Natural resource  
   non-renewable –, 31, 47, 196, 198, 204, 205, 227  
   renewable –, 31, 32, 38, 182, 195, 198, 223, 225, 226, 240  
 Nerlove-Arrow model, 38, 40, 72, 102, 111, 112, 129  
 Network externality, 41, 42  
 Node, 6, 67  
 Non-address approach, 125  
 Optimal control problem, 1, 4, 5, 8  
 Optimality principle, 6, 7, 236  
 Pareto, 88, 228  
 Patent  
   – portfolio, 173  
   – protection, 150, 153, 173  
 Perfect competition, 44, 49, 51, 59, 61, 75–77, 79, 83, 199, 200, 225  
 Perfect game, 13, 14, 239  
 Phase diagram, 27, 50, 78, 79, 81, 162, 164, 218
