Developing Gratitude in Children and Adolescents

In popular opinion, gratitude means saying “thank you.” While politeness and appreciation are certainly important, gratitude is a larger issue. Appropriately defined, it encompasses the strengthening of human relationships and qualifies as a moral virtue.

This important and timely volume provides the conceptual framework for studying the development of gratitude, with a comprehensive and international set of authors approaching the topic from philosophical, psychological, and educational perspectives. The first section provides the theoretical underpinnings for the study of gratitude as a virtue. In the next section, the authors examine the ways in which gratitude develops, including key cross-cultural variations and some possible effects of its development. The final section then considers the links between parent and child gratitude and the ways in which parents and teachers can help encourage gratitude, both in their everyday practices and by using literary texts.

Jonathan R. H. Tudge is a Professor in the Department of Human Development of Family Studies at the University of North Carolina at Greensboro. He has long been interested in the relations among culture, everyday activities and interactions, and development. His books include The Everyday Lives of Young Children: Culture, Class, and Child Rearing in Diverse Societies (Cambridge University Press, 2008), and he has co-edited two other books related to culture and youth development. With Lia Freitas, he has been studying the development of gratitude in children and adolescents for the past decade, with the generous support of the John Templeton Foundation.

Lia Beatriz de Lucca Freitas is a Professor of Psychology at the Institute of Psychology at the Federal University of Rio Grande do Sul in Brazil. She earned her PhD in psychology from the University of São Paulo. Her main interests are in moral development, specifically moral virtues and the construction of values. She has written The Theory of Morality in Jean Piaget’s Work: An Unfinished Project (2003) and co-edited Reflections on Moral Education (2017), both published in Portuguese. She is currently a co-principal investigator on a multiyear cross-cultural project on the development of gratitude in children and adolescents, funded by the John Templeton Foundation.
Developing Gratitude in Children and Adolescents

Contributors

SAMANTHA BAUSERT is currently a doctoral candidate in Hofstra University’s School-Community Psychology program. She is part of Dr. Jeffrey J. Froh’s Positive Psychological Counseling Institute, which has provided her with the opportunity to contribute to the youth gratitude literature while presenting research at professional psychological conferences. In addition to contributing to the Institute, Samantha is a therapist with the Diagnostic and Research Institute for Autism Spectrum Disorders.

GIACOMO BONO is an Assistant Professor of Psychology at California State University, Dominguez Hills. He is a co-author of Making Grateful Kids: The Science of Building Character (2014), associate editor for the Journal of Positive Psychology, and director of the Youth Gratitude Project. He is currently focused on validating measures of gratitude for youth, testing gratitude curricula for preschool and grades 4 through 12, and advancing knowledge about gratitude, its development, and its promotion in schools.

DAVID CARR is Emeritus Professor at the University of Edinburgh and currently Professor of Ethics and Education in the Jubilee Centre for Character and Virtues of the University of Birmingham (UK). He has written much on the significance of art and literature for educating moral character and on the virtue of gratitude.

JENNIFER L. COFFMAN is a developmental psychologist who studies the development of children’s cognitive and affective skills, with an emphasis on conversations in the home and school contexts that have an impact on developmental change. Jennifer is an Associate Professor of Human Development and Family Studies at the University of North Carolina at Greensboro.

PHILIP R. COSTANZO has been a Professor of Psychology and Neuroscience at Duke University over the last 47 years and is currently a Professor Emeritus in that department. He served as editor of the
List of Contributors

Journal of Personality from 1971–1981. He has co-authored the text, Theories of Social Psychology; co-edited the volumes, Depression in Adolescent Girls and The Social Psychology of Mental Health; and served as psychology co-editor for the International Handbook of the Social Sciences.

LIA BEATRIZ DE LUCCA FREITAS is a Professor at the Institute of Psychology at the Federal University of Rio Grande do Sul in Brazil. She earned her PhD in psychology from the University of São Paulo. Her main interests are in moral development, specifically moral virtues and the construction of values. She has written The Theory of Morality in Jean Piaget’s Work: An Unfinished Project and co-edited Reflections on Moral Education, both published in Portuguese. She is currently a co-PI on a multiyear cross-cultural project on the development of gratitude in children and adolescents, funded by the John Templeton Foundation.

JEFFREY J. FROH received his master's and doctorate in school psychology from St. John's University. He is an Associate Professor at Hofstra University and past associate editor for the Journal of Positive Psychology. He is also the recipient of a million-dollar grant from the John Templeton Foundation to study gratitude in youth, as well as the co-editor of Activities for Teaching Positive Psychology: A Guide for Instructors (2013, APA Press) and co-author of Making Grateful Kids: The Science of Building Character (2014, Templeton Press).

AMY L. GENTZLER, who earned her PhD in experimental psychology from Kent State University, is an Associate Professor of Psychology in the Lifespan Developmental Program at West Virginia University. At WVU, she runs the Individual Differences in Emotions and Adjustment (IDEA) Lab. Amy and her students investigate how and why people regulate emotions, often focusing on positive emotions, and how people’s emotions and emotion regulation develop and change with age.

LIZ GULLIFORD has a long-standing interest in human strengths and currently works as a Research Fellow at the Jubilee Centre for Character and Virtues, University of Birmingham, UK. She undertook her doctorate, a critical, interdisciplinary evaluation of positive psychological approaches to strengths and virtues, at Queens’ College, Cambridge. Since joining the Jubilee Centre, Liz’s interdisciplinary research has been published in philosophical, psychological, and educational journals.
List of Contributors

**Amy G. Halberstadt** received her PhD from the Johns Hopkins University and is Professor of Psychology at North Carolina State University. Funded by NICHD, NSF, and most recently the WT Grant Foundation, she studies socioemotional development, with a focus on parental and cultural socialization of children’s emotion experience, expression, and understanding and the subsequent impact on children’s coping and sibling/peer relationships. Her model of affective social competence (with Denham and Dunsmore) is now a classic in the field.

**Tom Harrison** is the Director of Education in the Jubilee Centre for Character and Virtues and Director of the MA degree program in character education at the University of Birmingham, UK. Recent books include *Educating Character through Stories* and *Teaching Character in Primary Schools*. He completed his PhD on the influence of the internet on character virtues.

**Kerry Howells** is an academic and teacher educator in the Faculty of Education at the University of Tasmania. Her research spans the last two decades of critical inquiry into the role of gratitude in education. Her book, *Gratitude in Education: A Radical View*, has been heralded by reviewers as “groundbreaking” and has become the core text for Master of Teaching students and in her Gratitude in Education postgraduate course. Kerry has presented her research and approach to teaching and learning through gratitude in invited presentations at numerous universities, schools, and other contexts across five continents.

**Andrea M. Hussong** is the director of the Center for Developmental Science and a professor in the Department of Psychology and Neuroscience at the University of North Carolina at Chapel Hill. Her research focuses on the processes of risk and resilience that create pathways traversed by children and youth over the early life course. Her work on children’s gratitude is motivated by a desire to help parents in particular to cultivate gratitude in their children.

**Lisa Kiang** is a Professor of Psychology at Wake Forest University. She received her PhD from the University of Denver. As a developmental psychologist, her primary area of research is in cultural identity formation and social relationships, with an emphasis on positive well-being in immigrant and ethnically diverse adolescents.

**Yves de la Taille** is a professor in the Institute of Psychology at the University of São Paulo, Brazil. He teaches developmental...
HILLARY A. LANGLEY is an Assistant Professor of Psychology at Sam Houston State University in Huntsville, Texas. She obtained her PhD in developmental psychology from the University of North Carolina at Chapel Hill before completing an NIH-funded postdoctoral fellowship, also at UNC Chapel Hill. She is currently an investigator on a John Templeton Foundation-funded project designed to examine the development of gratitude in children and how parents work to cultivate gratitude in their children and adolescents.

EBONY D. LEON is a first-year MS/PhD student in the Human Development and Family Studies program at the University of North Carolina at Greensboro. She is currently working as a research assistant on the More than Thank You: Developing Gratitude project under the mentorship of Dr. Jonathan Tudge. Ebony has also worked with Dr. Amy Halberstadt on the Raising Grateful Children study, and she is particularly interested in the development of morality and prosocial behaviors in Black youth.

YUE LIANG is a doctoral student at the University of North Carolina at Greensboro (UNCG). After completing her master’s degree in psychology at Beijing Normal University, she moved to the United States to pursue a doctoral degree. She is currently working with Dr. Jonathan Tudge at the Department of Human Development and Family Studies at UNCG, studying the development of gratitude among Chinese and Chinese immigrant children and adolescents.

TERRANCE MCCONNELL is Professor Emeritus at the University of North Carolina at Greensboro. He is the author of Gratitude (Temple University Press, 1993), Moral Issues in Health Care (Wadsworth Publishing, 2nd edition, 1997), and Inalienable Rights (Oxford University Press, 2000). He has also published numerous articles on topics in ethical theory and biomedical ethics. He is currently working on another book on gratitude and moral psychology.

SARA ETZ MENONCA has a Master of Education degree from the University of Illinois and a Master of Science degree in Human Development and Family Studies from the University of North Carolina at Greensboro where she currently is a research assistant working on her doctorate with Dr. Jonathan Tudge. She has written several journal articles and book chapters on the topic of gratitude.
List of Contributors

ELISA A. MERÇON-VARGAS earned her master’s degree in psychology at the Federal University of Espírito Santo, in Brazil, and recently completed her doctorate in Human Development and Family Studies at the University of North Carolina at Greensboro. Under the supervision of Dr. Jonathan Tudge, she studied cultural influences on the development of gratitude among children from various cultural groups, including Brazilian immigrants in the United States.

IRINA L. MOKROVA is a Research Scientist at the Frank Porter Graham Child Development Institute at the University of North Carolina at Chapel Hill. Dr. Mokrova received her bachelor’s degree in psychology from Moscow State University in Russia and her PhD from the University of North Carolina at Greensboro. Her work encompasses several areas of child development, including student engagement, academic achievement, parental beliefs and values, cross-cultural issues, and advanced educational research methodology.

BLAIRE MORGAN obtained a PhD in psychology from the University of Birmingham (UK) and now works as a Senior Lecturer at the University of Worcester. Previously, Blaire worked on an internationally recognized project, An Attitude for Gratitude, at the Jubilee Centre for Character and Virtues, University of Birmingham. Her work can be seen in several edited volumes and in peer-reviewed journals, such as the Journal of Personality and Individual Differences, the Journal of Moral Education, and the Journal of Positive Psychology.

LIA O’BRIEN received her PhD in developmental psychology from Temple University. She was the project coordinator of the Developing Gratitude Research Group at the University of North Carolina at Greensboro. Currently, Lia is an Assistant Professor of Psychology at West Chester University.

FERNANDA PALHARES is a psychologist with a master’s degree in psychology from the Federal University of Rio Grande do Sul, Porto Alegre, Brazil. She is currently doing her doctorate at the same institution under the guidance of Dr. Lia Freitas. Her research area is the development of morality and values among children and adolescents.

AYSE PAYIR completed her BA at Yeditepe University (Turkey), her MA at New York University, and her PhD on the development of counterfactual thinking at the University of North Carolina at Greensboro. While working on her PhD in psychology, she also studied the development of the virtue of gratitude under the supervision of Dr. Jonathan Tudge. Currently she is a postdoctoral research associate at Boston University examining children’s religious cognition under the
supervision of Kathleen Corriveau (Boston University) and Paul Harris (Harvard University).

UZAMA S. PRICE is originally from Jamaica and is the proud mother of two adult sons. She earned her master's degree and doctorate in education from Argosy University. In 2017 she began a graduate certificate course in Applied Behavior Analysis at Capella University and is completing the requirements to take the examination to become a board-certified behavior analyst.

MEAGAN A. RAMSEY completed her PhD in lifespan developmental psychology at West Virginia University and a postdoctoral fellowship in developmental health at the University of Utah. She is currently a grant development specialist and scientific editor at the University of Michigan.

RACHEL ROSE-ZORNICK is currently a doctoral candidate in Hofstra University’s School-Community Psychology program. She works with Dr. Jeffrey J. Froh in the Positive Psychological Counseling Institute. She has participated in an array of research and clinical internships, focusing on research in the areas of efficacy of teachers in the classroom; interventions for children with cerebral palsy and eating disorders (obesity and satiation); and spatial orientation in schizophrenic inpatients.

ZACHARY ROSE recently received his master's degree in school-community psychology from Hofstra University. He is currently a doctoral candidate in the same program, with specialized interests in autism spectrum disorders and evaluative assessment. This is his first publication.

JONATHAN R. H. TUDGE was educated at the Universities of Lancaster and Oxford (UK) and Cornell (USA) and is a Professor of Human Development at University of North Carolina at Greensboro. His books include The Everyday Lives of Young Children: Culture, Class, and Child Rearing in Diverse Countries (Cambridge University Press), and he has co-edited two other books related to culture and youth development. With Lia Freitas, he has been studying the development of gratitude in children and adolescents for the past decade, with the generous support of the John Templeton Foundation.

BOGLARKA “KATIE” VIZY is currently a doctoral student at West Virginia University in the Lifespan Developmental program. She works in a lab that conducts research on numerous aspects of emotional development in children and adolescents. Currently she is examining
Selin Zeytinoğlu is a doctoral student in the Human Development and Family Studies program of the University of North Carolina at Greensboro. She received her MS degree in clinical community counseling from Johns Hopkins University and her bachelor’s degree in early childhood education from Boğaziçi University. Currently, she is working with Drs. Susan Calkins and Esther Leerkes on understanding how culture and social interactions, particularly caregiver-child interactions, influence children’s cognitive and emotional development.
We would like to express our gratitude to all of the authors who contributed so well to this book. It was a pleasure working with you all, not only because of the quality of your contributions but also for the timely manner in which you met each and every deadline. We would also like to thank the various members (undergraduates, graduate students, and postdocs) of our two research groups, who contributed greatly with your ideas and critiques during the past several years. We also owe a debt of gratitude to the following people: Terry McConnell, for writing the first book on the topic to really influence our thinking; Dan Perlman, for introducing us to the John Templeton Foundation; Terri Shelton, for easing our path through numerous financial thickets; Denise Ruschel Bandeira, for providing unfailing support; Richard Bollinger, of the John Templeton Foundation, for always being ready to meet and exchange ideas; Janka Romero, for expressing excitement at the prospect of this book and guiding us well throughout the process; and the anonymous reviewers of the book at different stages, for being unfailingly encouraging. We are also extremely grateful to the following for their generous support for our research: the John Templeton Foundation, Conselho Nacional de Desenvolvimento Científico e Tecnológico (CNPq), the School of Health and Human Sciences and the Department of Human Development and Family Studies at the University of North Carolina at Greensboro, and Dr. Frances Cope.
