

## Contents

<i>Preface</i>	<i>page</i> xiii
<i>Acknowledgments</i>	xv
1. Policy Analysis: An Overview	1
1.1 <i>What Is Public Policy?</i>	1
1.2 <i>What Is Policy Analysis?</i>	3
1.3 <i>What Is Good Policy Analysis and What Should Be         Its Objective?</i>	5
1.4 <i>How Is Doing Policy Analysis Different from Doing Science?</i>	8
1.5 <i>What Role Does Analysis Play in Making and         Implementing Policy?</i>	11
PART I: MAKING DECISIONS THAT MAXIMIZE UTILITY	15
2. Preferences and the Idea of Utility	17
2.1 <i>Historical Development of the Idea of Utility</i>	18
2.2 <i>Utility in Modern Microeconomics</i>	19
2.3 <i>Is Utility the Same Thing as Happiness?</i>	24
2.4 <i>Measurement Scales for Utility (and Other Things)</i>	30
2.5 <i>The Utility of Chance Outcomes</i>	35
2.6 <i>Can Different People's Utilities Be Compared?</i>	40
2.7 <i>Combining Individual Utilities and the Concept of a         Social Welfare Function</i>	42
2.8 <i>Preferences that Are Not Well Defined, Change over         Time, or Are Inconsistent</i>	44
2.9 <i>Back to the Basic Question: "What Is Utility?"</i>	46
2.10 <i>Limits to the Strategy of Utility Maximization</i>	47
3. Benefit–Cost Analysis	51
3.1 <i>B–C Basics</i>	52

3.2	<i>Pareto Optimality</i>	58
3.3	<i>B–C versus B/C</i>	60
3.4	<i>Simple in Theory, but Often Complicated in Practice</i>	60
3.5	<i>The Rise of B–C Analysis in Government Decision Making</i>	61
3.6	<i>Examples of B–C Analysis Applied to Public Decision Making</i>	67
3.7	<i>Limitations of B–C</i>	73
3.8	<i>Efficiency versus Equity</i>	76
3.9	<i>Going off the Deep End with B–C Analysis</i>	77
3.10	<i>B–C versus Precaution</i>	86
3.11	<i>Final Thoughts on B–C</i>	88
4.	<b>Decision Analysis</b>	93
4.1	<i>DA Basics</i>	93
4.2	<i>A Simple Worked Example</i>	96
4.3	<i>Stages in a Decision Analysis</i>	96
4.4	<i>The Axioms of Decision Analysis</i>	98
4.5	<i>A More Detailed Worked Example</i>	100
4.6	<i>Other Examples of Decision Analysis</i>	108
4.7	<i>Influence Diagrams and Decision Trees</i>	111
4.8	<i>Strengths and Limitations of Decision Analysis</i>	112
4.9	<i>A Note on the History of Decision Analysis</i>	114
5.	<b>Valuing Intangibles and Other Non-Market Outcomes</b>	118
5.1	<i>Inferring People’s Values from the Choices They Make</i>	119
5.2	<i>The “Value of a Statistical Life” or VSL</i>	120
5.3	<i>A Decision-Analytic Approach to Valuing One’s Own Life</i>	122
5.4	<i>Evolution of Approaches to the Economic Valuation of Lost Lives</i>	124
5.5	<i>Use of VSL and Similar Measures in Public Policy</i>	126
5.6	<i>Contingent Valuation (CV)</i>	131
5.7	<i>Computing the Costs of Externalities</i>	134
5.8	<i>Ecosystem Services</i>	135
5.9	<i>What If People Don’t Have Well-Articulated Utility Functions for Everything?</i>	141
5.10	<i>Variations in Basic Values across Different Cultures</i>	143
5.11	<i>Are There Some Values that Should Not Be Quantified?</i>	145
6.	<b>Multi-Attribute Utility Theory and Multi-Criteria Decision Making</b>	155
	<i>With Jared L. Cohon</i>	
6.1	<i>MAUT Basics</i>	156
6.2	<i>Constructing MAU Functions Using Independence Assumptions</i>	158
6.3	<i>Do People Have Multi-Attribute Utility Functions in Their Heads?</i>	160
6.4	<i>Other Multiple Criteria Decision Making (MCDM) Methods</i>	162
6.5	<i>Figuring out What You Care About</i>	165

<i>Contents</i>	vii
6.6 <i>Example Applications of MAUT and MCDM</i>	167
6.7 <i>Limitations to the Use of MAUT and MCDM</i>	171
6.8 <i>Multiobjective Programming</i>	173
7. Preferences over Time and across Space	185
7.1 <i>A Simple Example of When Time Differences Do and Do Not Matter</i>	185
7.2 <i>Exponential Discounting in the Evaluation of Projects and Investment Opportunities</i>	189
7.3 <i>The Orthodoxy of Exponential Discounting</i>	192
7.4 <i>The Use of Real Options as an Alternative to Net Present Value</i>	192
7.5 <i>The Pure Rate of Time Preference (PRTP) and the Consumption Discount Rate (CDR)</i>	194
7.6 <i>Discount Rates that Decline over Time</i>	195
7.7 <i>Empirical Studies of the Time Preferences that People Display: A Look Ahead to Part III</i>	198
7.8 <i>Hyperbolic Discounting</i>	200
7.9 <i>Preferences that Change over Time</i>	201
7.10 <i>How Different Are Space and Time?</i>	202
PART II: SOME WIDELY USED ANALYSIS TOOLS AND TOPICS	207
8. Characterizing, Analyzing, and Communicating Uncertainty	209
8.1 <i>Describing Uncertainty</i>	210
8.2 <i>The Importance of Quantifying Uncertainty</i>	217
8.3 <i>Cognitive Challenges in Estimating Uncertainty</i>	222
8.4 <i>Methods and Tools for Propagating and Analyzing Uncertainty</i>	222
8.5 <i>Making Decisions in the Face of Uncertainty</i>	224
8.6 <i>Scenario Analysis</i>	228
8.7 <i>Precaution</i>	230
8.8 <i>Communicating Uncertainty</i>	231
8.9 <i>Some Simple Guidance on Characterizing and Dealing with Uncertainty</i>	235
9. Expert Elicitation	244
9.1 <i>Are There Any Experts?</i>	245
9.2 <i>The Interpretation of Probability</i>	245
9.3 <i>Qualitative Uncertainty Words Are Not Sufficient</i>	246
9.4 <i>Cognitive Heuristics and Bias</i>	247
9.5 <i>Ubiquitous Overconfidence</i>	248
9.6 <i>Developing a Protocol</i>	251
9.7 <i>Computer Tools to Support or Perform Elicitation</i>	254
9.8 <i>Uncertainty about Model Functional Form</i>	255
9.9 <i>Confidence, Second-Order Uncertainty, and Pedigree</i>	256
9.10 <i>Diversity in Expert Opinion</i>	257

viii	<i>Contents</i>
9.11 <i>Combining Expert Judgments</i>	260
9.12 <i>Concluding Thoughts and Advice</i>	263
10. Risk Analysis	274
10.1 <i>A Framework for Thinking about Risk</i>	275
10.2 <i>Risk Is Inherently Uncertain</i>	276
10.3 <i>Risk Is a Multi-Attribute Concept</i>	279
10.4 <i>Models of Exposure and Effects Process</i>	281
10.5 <i>Causes of Death</i>	289
10.6 <i>Managing Risk</i>	291
10.7 <i>The Risk of Worrying (Too Much) about Risk</i>	303
11. The Use of Models in Policy Analysis	309
11.1 <i>Types of Models Commonly Used in Technically Focused Policy Analysis</i>	311
11.2 <i>Simple Engineering, Economic, and Policy Models</i>	312
11.3 <i>Models for Environmental Impact Assessment</i>	314
11.4 <i>Life Cycle Methods</i>	315
11.5 <i>Models of the Economy</i>	316
11.6 <i>Models of Energy Supply and Use</i>	319
11.7 <i>Integrated Assessment Models</i>	323
11.8 <i>Limits of Standard Analytical Tools</i>	331
11.9 <i>Using Large Research and Scientific Models in Policy Applications</i>	332
11.10 <i>Some Thoughts on “Large” and “Complex” Models</i>	335
11.11 <i>Model Complexity Should Match the Analyst’s Level of Understanding</i>	337
PART III: HOW INDIVIDUALS AND ORGANIZATIONS ACTUALLY MAKE DECISIONS	343
12. Human Mental Processes for Perception, Memory, and Decision Making	345
12.1 <i>Two Kinds of Thinking</i>	346
12.2 <i>Framing Effects and Prospect Theory</i>	347
12.3 <i>Ubiquitous Overconfidence</i>	351
12.4 <i>Cognitive Heuristics and Biases</i>	353
12.5 <i>Hindsight Bias</i>	358
12.6 <i>Scenarios and Scenario Thinking</i>	360
12.7 <i>(Not) Honoring Sunk Costs</i>	363
12.8 <i>Order Effects in Search</i>	365
12.9 <i>The Power of Simple Linear Models</i>	367
12.10 <i>Individual and Social Dilemmas</i>	368
12.11 <i>Wrapping Up</i>	369
13. Risk Perception and Risk Ranking	373
13.1 <i>Starr on Acceptable Risk</i>	374
13.2 <i>Public Assessment of Causes of Death</i>	376

<i>Contents</i>	ix
13.3 <i>Factors that Shape Risk Judgments</i>	377
13.4 <i>Comparing and Ranking Risks</i>	383
13.5 <i>Recent Summaries of Work on Risk Perception</i>	386
14. Risk Communication	389
14.1 <i>What Information Do People Need to Know about a Risk?</i>	391
14.2 <i>Mental Models Interviews</i>	394
14.3 <i>Structured Interviews Followed by Closed-Form Surveys</i>	400
14.4 <i>Development and Evaluation of Communication Materials</i>	401
14.5 <i>Are the Results Any Better?</i>	402
14.6 <i>Communication to What End?</i>	405
15. Organizational Behavior and Decision Making	409
15.1 <i>Different Views through Different Windows</i>	411
15.2 <i>The Carnegie School of Organizational Decision Making</i>	416
15.3 <i>Garbage Can Models of Organizational Decision Making</i>	422
15.4 <i>The Importance of Negotiation</i>	424
15.5 <i>Exit, Voice, and Loyalty</i>	424
15.6 <i>Normal Accidents versus High-Reliability Organizations</i>	428
15.7 <i>Agent-Based Models of Social Processes and Organizations</i>	430
15.8 <i>Studies of the Behavior of Individuals within Commercial Organizations</i>	433
15.9 <i>Wrapping Up</i>	437
PART IV: THE POLICY PROCESS AND S&T POLICY (MAINLY) IN THE UNITED STATES	441
16. Analysis and the Policy Process	443
16.1 <i>Policy Windows</i>	443
16.2 <i>Policy Making as a Process of Punctured Equilibrium</i>	446
16.3 <i>Adaptive Policy and Learning</i>	450
16.4 <i>Diversification as a Policy Strategy</i>	451
16.5 <i>Social Control through Norms, Legal Prohibitions, Command, and Markets</i>	453
16.6 <i>The Science of “Muddling Through”</i>	457
16.7 <i>We Can’t Always Just Muddle Through</i>	460
16.8 <i>The Technology of Foolishness</i>	461
16.9 <i>Implementation</i>	462
17. The Period Prior to World War II	469
17.1 <i>Thomas Jefferson and the Lewis and Clark Expedition</i>	472
17.2 <i>Creation of the Coastal Survey</i>	474
17.3 <i>The Smithsonian Will and the Creation of the Smithsonian Institution</i>	476
17.4 <i>Appropriation of Federal Funds for Technology Demonstration</i>	478
17.5 <i>The Extended Saga of Regulations to Prevent Steam Boiler Explosions</i>	479
17.6 <i>The United States Exploring Expedition, 1838–1842</i>	482

17.7	<i>The Establishment of the U.S. National Academy of Sciences</i>	483
17.8	<i>The Great Western Exploring Expeditions</i>	486
17.9	<i>The Creation of the U.S. Geological Survey</i>	488
17.10	<i>World War I and the Creation of the National Research Council</i>	489
17.11	<i>Herbert Hoover as Secretary of Commerce</i>	491
18.	U.S. Science and Technology Policy from World War II to 1960	497
18.1	<i>Vannevar Bush and U.S. Defense Research and Development during World War II</i>	498
18.2	<i>Science the Endless Frontier and the Creation of the National Science Foundation</i>	508
18.3	<i>The Office of Naval Research: Filling the Gap between OSRD and NSF</i>	514
18.4	<i>Civilian Control of Atomic Energy and Weapons</i>	516
18.5	<i>IGY, Sputnik, the Space Race, and the (Phantom) Missile Gap</i>	517
19.	Science and Technology Advice to Government	521
19.1	<i>Science and Technology Advice to the President</i>	521
19.2	<i>The Administrative Procedure Act</i>	526
19.3	<i>Examples of Science and Technology Advice to Executive Branch Agencies</i>	529
19.4	<i>The NRC and the National Academies</i>	532
19.5	<i>Think Tanks and Consulting Firms</i>	535
19.6	<i>The Congressional Office of Technology Assessment</i>	536
19.7	<i>Science and Technology Advice to the Judiciary</i>	543
19.8	<i>Science and Technology Advice in the U.S. States and Regional Governments</i>	545
19.9	<i>Science and Technology Advice to European Governments and to the European Union, with Inês Azevedo</i>	547
19.10	<i>Science and Technology Advice to Government in Japan</i> Jun Suzuki	556
19.11	<i>Science and Technology Advice to Government in China</i> Xue Lan	559
19.12	<i>Science and Technology Advice to Government in India</i> Anshu Bharadwaj and V.S. Arunachalam	562
	<i>Appendices</i>	567
A1.	<i>A Few Key Ideas from the History and Philosophy of Science</i>	567
A1.1	<i>Francis Bacon and the Empirical or Scientific Method</i>	567
A1.2	<i>Karl Popper: “Falsifiability,” and Deduction versus Induction</i>	569

<i>Contents</i>	xi
A1.3 Hypothesis	571
A1.4 Thomas Kuhn: Paradigms and Scientific Revolutions	572
A2. <i>Some Readings in Technology and Innovation</i>	577
A3. <i>Some Readings in Science and Technology Studies</i>	579
<i>Index</i>	581
