

Index

- actomyosin molecular motor, 70–71
- additive character, 2
- balance equations for densities of fluids, 85–89
- Bruhat–Tits buildings
 - affine, 13
- cascade model of turbulence, 78–81
- characteristic relaxation in complex systems, 116
- clustering
 - cluster networks, 12
 - ensemble clustering, 8
 - multiclustering, 8, 12
- coherent state, 22, 28
- complex energy landscapes, 67
- complex system, 63
- disconnectivity graph, 64
- distributions, 4
 - convolution, 5
 - direct product, 5
 - Fourier transform, 5
 - multiplication, 6
 - positive-definite, 136
 - wavelet transform, 40
- elliptic
 - operator, 121
 - polynomial, 121
- energy
 - barrier, 67
 - Helmholtz-energy functionals, 124
- ergodic
 - construction of ergodic functions, 110
 - dynamical systems, 105
 - 1-Lipschitz functions, 108
- Euclidean random fields, 190
- Fourier transform
 - of a distribution, 5
 - of a test function, 4
- function
 - Bruhat–Schwartz, 3
 - Green function, 180
 - 1-Lipschitz functions, 94
 - locally constant, 3
 - positive-definite, 137
 - scaling, 21, 43, 44
 - test, 3
- fundamental solution, 121, 174
- genetic code, 73
- Haar measure, 94
- heat
 - kernel, 118, 121
 - trace, 203
- hierarchical kinetics, 66
- Markov
 - chains, 127
 - processes, 115, 118, 121
- measure preserving 1-Lipschitz functions, 99–104
- noise
 - Gaussian, 138
 - white, 81
- operator
 - integral operators, 55
 - Klein–Gordon pseudodifferential operator, 186
 - on ultrametric space, 59

- pseudodifferential operators, 54, 159, 168, 179
- Taibleson operator, 120
- Vladimirov operator, 6
- W , 122
- p*-adic
 - Bochner–Schwartz theorem, 136
 - Brownian motion, 81
 - Brownian sheet, 195
 - diffusion, 66
 - dynamical systems, 94
 - fractional part, 2
 - heat equations, 135
 - multiresolution analysis, 21
 - norms, 1
 - numbers, 1
 - order, 1
 - parabolic-type pseudodifferential equations, 134
 - parametrization of the Parisi matrix, 65
 - scaling function, 48
 - Shannon–Kotelnikov theorem, 53
 - wavelets, 20, 46
- Parisi matrix, 65
- porous medium equation, 90–92
 - explicit solution, 92–93
- quasilinear diffusion, 89–90
- reaction–ultradiffusion equations, 123
- space
 - Lizorkin spaces, 6
 - \mathcal{H}_∞ , 156–158
 - dual space of \mathcal{H}_∞ , 159–168
 - \mathcal{W}_∞ , 165–167
 - dual space of \mathcal{W}_∞ , 167
- spin glass, 65
- stochastic
 - heat equations, 133
 - integrals, 138
 - pseudodifferential equations, 148
- tree
 - absolute of a tree, 11
 - groups acting on trees, 17
 - of basins, 67
- ultrametric models in geophysics, 83–84
- ultrametric space, 9, 59
- Van der Put Series, 96
- wavelet
 - Haar basis, 20, 41
 - multidimensional wavelets bases, 33, 51
 - multiresolution frames, 49
 - on ultrametric spaces, 59
- zeta function
 - Igusa’s local zeta function, 172
 - spectral zeta function, 202, 210
