- CIC family, 57  
   consistent members are the CIC\* rules, 288  
   is closed under duality, 164  
   only *self-dual* member is reverse Talmud rule, 159  
 CIC relations, 59  
 CIC rule, 57  
   Lorenz compared, 348  
 CIC\* family, 288  
   characterized, 288  
   is closed under duality, 438
- claim, 3  
*claims boundedness*, 66  
   dual is *nonnegativity*, 165  
*claims continuity*, 63  
   *component-wise*, 63  
   appears in characterization, 263, 328, 329  
*claims convexity*, 188  
*claims decrease invariance*, 197  
*claims increase invariance*, 198  
*claims monotonicity*, 105  
   *strict*, 106  
   appears in characterization, 114  
   dual is *linked claim-endowment monotonicity*, 166  
 claims problem, 3  
   simple, 390  
   with priority classes, 82  
   with weights, 82  
   without transferable utility, 397  
*claims separability*, 185  
*claims truncation invariance*, 119  
   *weak*, 119  
     appears in characterization, 146, 303  
     appears in characterization, 126, 127, 144, 178, 258, 303, 306  
     dual is *minimal rights first*, 167  
 claims truncation operator, 201  
   commutes with attribution of minimal rights operator, 211  
   dual is attribution of minimal rights operator, 201  
   properties not preserved under, 216  
   properties preserved under, 215, 216  
*claims uniformity*, 186  
*claims-and-endowment separability*, 185  
   appears in characterization, 338  
*claims-and-endowment uniformity*, 186  
   appears in characterization, 338  
 Clarke–Groves rule, 63  
 classical exchange economy, 108, 182, 330, 336, 370  
 closedness of a class of problems under the reduction operation, 232  
 closedness of a family of rules under duality, 164  
 coalition, 367  
 coalitional game, 367  
 Colonel Blotto game, 380  
*composition down*, 132  
   *conditional*, 133  
   *strong*, 139  
   appears in characterization, 134, 137, 147, 151, 174, 175, 258, 262, 299  
   dual is *composition up*, 167  
   its implications, 134  
*composition up*, 140  
   *conditional*, 143  
   *from midpoint*, 263  
   appears in characterization, 342  
   *strong*, 143  
   appears in characterization, 144, 146, 151, 172, 177, 256, 299, 303  
   dual is *composition down*, 167  
*concavity*, 101  
   *strict*, 101  
   dual is *convexity*, 167  
 concede-and-divide, 29  
   characterized, 126, 177, 178, 181, 194, 210  
   constructing its *consistent* extension, 276  
   corresponds to Perles–Maschler bargaining solution, 362  
   weighted, 85  
   characterized, 127  
*conditional full compensation*, 76

*full compensation*, 238  
 dual is *null compensation consistency*, 249  
*max* (for TU games), 374  
*null claims*, 237  
 appears in characterization, 256, 306, 338, 342  
 is *self-dual*, 248  
*null compensation*, 237  
 dual is *full compensation consistency*, 249  
 appears in characterization, 260–263, 292, 299, 303, 305–307, 315, 439  
 constructing *consistent* extensions, 270  
 of concede-and-divide, 276  
 of members of family  $\mathcal{D}$ , 299  
 of two-claimant *endowment monotonic* rule, 272  
 of two-claimant *strictly endowment monotonic* rule, 272  
 of two-claimant CIC rules, 288  
 of two-claimant ICI rules, 285  
 of two-claimant weighted constrained equal awards rules, 276  
 of weighted concede-and-divide rules, 292  
 of weighted average of constrained equal awards and constrained equal losses rules, 278  
 of weighted average of proportional and constrained equal awards rules, 282  
 of weighted average of proportional and constrained equal losses rules, 282  
 for correspondences, 238  
 is *self-dual*, 248  
*consistent* extension, 245  
 constrained egalitarian rule, 36  
 characterized, 357  
 is a Young rule, 48  
 its dual, 164  
 is obtained as limit of certain process of lower bounds assignment, 388  
 constrained equal awards rule, 23, 132  
 characterized, 98, 114, 144, 146, 147, 256, 258, 304, 306, 315, 340, 354, 355  
 constructing *consistent* extension of its two-claimant weighted version, 276  
 corresponds to Dutta–Ray solution, 373  
 corresponds to lexicographic egalitarian bargaining solution, 362  
 corresponds to Nash bargaining solution, 361  
 dual is constrained equal losses rule, 162  
 is a CIC rule, 59, 420  
 is a Young rule, 48  
 is an ICI rule, 56  
 operated from minimal rights, 203  
 way of calculating, 25  
 weighted, 84  
 composed with sequential-priority rule, 303  
 constrained equal losses rule, 27, 388  
 characterized, 172, 175, 177, 195, 256, 341, 356  
 dual is constrained equal awards rule, 162  
 is a CIC rule, 59, 420  
 is a Young rule, 48  
 is an ICI rule, 56  
 is limit under replication of minimal overlap rule, 332  
 is obtained as limit of certain process of lower bounds assignment, 388  
 operated from truncated claims, 202  
 corresponds to extended equal loss bargaining solution, 362  
 way of calculating, 27  
 weighted, 84  
 composed with sequential-priority rule, 307  
 contested garment problem, 10  
 contested garment rule, 34  
*continuity*, 63  
*claims*, 63  
*component-wise claims*, 63  
 appears in characterization, 261, 262, 306, 307, 319, 338  
*contraction invariance*, 196  
 appears in characterization, 304  
 its dual, 196  
 appears in characterization, 304  
*converse consistency*, 239  
*strong*, 241  
*weak*, 241  
 appears in characterization, 329  
 for correspondences, 241  
 is *self-dual*, 248
