AANA see American Association of Nurse Anesthetists
### ART see assisted reproductive technologies

arterial lines
for blood pressure monitoring 63
insertion techniques 63–5, 169–70
arterial stenosis 169–73, 175–6, 202
arteriography 52, 169–71
ASA see American Society of Anesthesiologists
ASA score 35, 49–50, 186
ASGE see American Society for Gastrointestinal Endoscopy
aspiration of gastric contents 142–4, 210–11
assisted reproductive technologies (ART) 281
complications of IVF techniques 282–4, 288–9
of sedation 285
facilities 284–5
IVF techniques 281–4, 287
post-procedure recovery 288–9
sedation for 284–8
Association of periOperative Registered Nurses (AORN), guidelines 5, 81, 247–8
asystole 303–4, 310–12
atipamezole 21
Ativan (lorazepam) 13, 14, 190, 224, 263
atropine 304, 305, 312
automated external defibrillators (AEDs) 302–4, 309–10
automated sphygmomanometers 63
avatar-based simulators 162–4
bag-mask ventilation 301–2, 309
barbiturates 11, 275
in children 234, 237, 243
basic life support (BLS) in adults 300–2
in children 307–10
beards 51
behavioral issues in children/adolescents 51, 233
behavioral pain assessment 34
Behavioral Pain Scale (BPS) 39–40
Benadryl (diphenhydramine) 22
benzocaine 53, 147, 193
benzodiazepines 11
adverse effects 14, 223, 263
in children 241–2
in combination with opioids 14, 140, 206
in dentistry 264, 266, 267, 268
in endoscopy 188
in the ICU 223–4
interactions with other drugs 295–6
in IVF patients 286, 287, 288
for pain management 295–6
pharmacology 12–14, 189–92, 273
reversal agents see flumazenil see also midazolam
Berlin questionnaire (for obstructive sleep apnea) 127–8
biliary tubes 177
biopsy 175
biphasic index (BIS) monitors 68, 153, 226
blood pressure hypertension 60, 122, 126, 145
hypotension 60, 144–5, 219
monitoring 60–3
BLS see basic life support
body mass index (BMI) 123
high 14, 123–9, 137–8
body temperature in the elderly 123
monitoring 65–6
brachytherapy 173
bradycardia 305, 312
brain function adverse effects of drugs 18, 24, 28
in the elderly 121, 123
monitoring of 68, 153, 226–8
OAA/S scale 191, 201–2
breach of duty 88, 89
bronchoscopy 54–5
bronchospasm 131, 141–2
bupivacaine 25–7
CAM-ICU Delirium Assessment Tool 228–7
capnography see carbon dioxide monitoring
CAPS (computer-assisted personalized sedation) 156–7
carbon dioxide monitoring 66–7, 79, 152–3, 185, 303, 310
cardiology suite facilities and equipment 198–201
procedures carried out in 53, 197, 201–3
cardiopulmonary resuscitation (CPR) 300–3
in children 307–12
cardiovascular system adverse effects of medication 122
dexmedetomidine 21
dropindol 189–93
local anesthetics 24–5, 27–8
naloxone 30
opioids 18
cardiac arrest 302–5, 310–13
in children 232, 307–13
complications of sedation 144–5, 182
coronary heart disease 131–2, 139, 302
in the elderly 121–2
monitoring 63–5, 79, 179
in the obese 126
procedures requiring sedation 53, 169–73, 201–3
pre-procedure evaluation and choice of procedure 200–7
resuscitation measures 302–13
cardioreversion 53, 202, 214–15, 305, 312
catheterization arterial 169–73, 175–6
central venous lines 174
for drainage purposes 176–7
intravenous 71–5
urinary 170
catheterization laboratory 53, 201–2
causation, in malpractice cases 89
Centers for Medicare and Medicaid Services (CMS) regulations 91, 94, 116, 209–10
central venous catheterization 174
cerebrovascular accident 302
chemoembolization 173
cHEST compressions 300–1, 303, 307–9
chest drains 178
children
resuscitation 307–13
sedation see pediatric sedation
chin-lift maneuver 142
chloral hydrate 234, 237, 242–3
chronic obstructive pulmonary disease (COPD) 131, 139
chronic pain, management of patients with 34–6, 54
clonidine 23, 243
CMS see Centers for Medicare and Medicaid Services
colloid solutions 70–3
colonoscopy 187
competencies 78–9
complementary medicines 11–12
complications
of arteriography 171
of endoscopy 140–1, 193
of IVF techniques 282–4, 288–9
of radiofrequency ablation 172
of sedation 135
cardiovascular 144–5, 182
in children 137, 146–7, 150–1, 225, 231–2
delirium 146
in dentistry 272, 278
gastrointestinal 145–6
in the ICU 220–1
incidence 150–2, 182, 232, 278
in IVF patients 285
methemoglobinemia 147, 193
in the outpatient setting 251–2
paradoxical sedative excitement 147
patient factors contributing to 137–9, 184, 194
procedural factors contributing to 139–40
propofol and 146–7, 154–5, 225
respiratory see respiratory system
complications of sedation
urine retention 146
see also adverse effects of (drugs)
computer tomography (CT) scans 237
computer-assisted personalized sedation (CAPS) 156–7
computer-based simulation training
high-fidelity mannequin simulators 162–6
screen-based 160–1
Confusion Assessment Method for the ICU (CAM-ICU) 227–8
conscious sedation
see moderate sedation
consciousness
definition of levels of 3–4, 47–8
Inova Sedation Scale 136
monitoring of 68, 153, 226–8, 295–8
OAA/S scale 191, 201–2
Ramsay scale 295
RASS scale 108, 136, 295
