The third edition of Child, Adolescent and Family Development provides a comprehensive, readable study of human development from conception to adulthood. It explores the foundations of modern developmental thought, incorporating the latest in international research set within a cultural and historical context.

Richly illustrated and enhanced by a range of practical teaching resources, this clear and engaging text is intended to reach students across a range of teaching, psychology, social science and health science disciplines. By employing a thematic approach within the chronologically ordered chapters, this text offers a systematic and intuitive structure for both learning and teaching.

This new edition features a set of fully updated case studies that consider current trends and issues in developmental theory and practice, as well as end-of-chapter sections that address important stages in the family life cycle.

The text is accompanied by an extensive companion website, www.cambridge.edu.au/academic/development, featuring additional resources including multiple-choice questions, child and adolescent observation activities, worksheets and an easy guide to research design and techniques.

Phillip T. Slee is Professor in Human Development in the School of Education at Flinders University and is a trained teacher and registered psychologist.

Marilyn Campbell is Associate Professor in Educational Counselling at Queensland University of Technology, and is a registered teacher and registered psychologist.

Barbara Spears is Senior Lecturer in Educational Psychology in the School of Education at the University of South Australia and is a registered teacher.
This book is lovingly dedicated to Elizabeth and our three boys – Matthew, Nicholas and Christopher. The book would not have been written without Elizabeth’s patient and loving support. The boys have helped to quietly and gently remind me of the significance of family life.

Phillip T. Slee

I dedicate this book to my partner Brian.

Marilyn Campbell

My heartfelt thanks go to Peter, Mel and Kym for their patience, love and support during projects like these which steal away ‘their’ time. It makes me more aware of how precious being with them is.

Barbara Spears
## Contents

Preface \hspace{1cm} xiii
How to use this book \hspace{1cm} xv
Acknowledgements \hspace{1cm} xvii

### Part 1 The Study of Human Development

#### 1 Seeing children in context

- Introduction \hspace{1cm} 3
- The nature of psychology \hspace{1cm} 4
- Why study child development? \hspace{1cm} 6
- Factors shaping views of children and families \hspace{1cm} 8
- Images of children \hspace{1cm} 19
- Theoretical orientations \hspace{1cm} 27
- Chapter summary \hspace{1cm} 30

#### 2 Concepts of development

- Introduction \hspace{1cm} 33
- Child development concepts \hspace{1cm} 33
- Personal views of human development \hspace{1cm} 41
- The nature of development \hspace{1cm} 41
- Statistics: a very short course! \hspace{1cm} 43
- Approaches to psychological inquiry \hspace{1cm} 47
- Chapter summary \hspace{1cm} 51

#### 3 Theoretical foundations of child development

- Introduction \hspace{1cm} 55
- Theoretical development \hspace{1cm} 55
- Sigmund Freud and psychoanalytic theory \hspace{1cm} 56
- Alfred Adler \hspace{1cm} 60
- Erikson and psychosocial theory \hspace{1cm} 61
- Behaviourism \hspace{1cm} 62
- Humanism \hspace{1cm} 70
- Piaget and cognitive theory \hspace{1cm} 73
- Evolutionary psychology \hspace{1cm} 76
- Bronfenbrenner's ecological model \hspace{1cm} 77
- Social systems theory \hspace{1cm} 79
- Chapter summary \hspace{1cm} 89

### Part 2 Conception and Birth

#### 4 Prenatal development

- Introduction \hspace{1cm} 94
- The genetics of conception \hspace{1cm} 95
Contents

Developmental psychology and genetics 103
Contemporary developmental thinking 108
Genetic defects 110
Genetic counselling 111
Chapter summary 115

5 Birth and the newborn child 117
Introduction 118
Conception 118
Development of the foetus 122
The intra-uterine environment 126
Giving birth 127
Fathers and the birth process 131
The early stages of life 135
Chapter summary 140

Part 3 Infancy 141

6 Physical development in infancy 143
Introduction 144
The principles of normal development 144
The study of physical growth 145
Charting children’s growth 147
Growth in height 149
Growth in weight 150
Motor development 151
Physical development – an emerging order 159
Chapter summary 162

7 Cognitive development in infancy 163
Introduction 164
Theoretical foundations: Piaget 164
Enriching early life – home environment 169
Jerome Bruner and cognitive development 175
Perception 177
Chapter summary 182

8 Social and emotional development in infancy 184
Introduction 185
Theoretical foundations 186
Infancy – intersubjectivity and emotional development 186
Schematicising infant emotional development 191
Part 4 Toddlerhood

9 Physical development of toddlers
Introduction 214
Physical growth 214
Children and play 221
Deaths and accidents in the early years 233
Chapter summary 240

10 Cognitive development of toddlers
Introduction 242
Cognitive development and intelligence 242
Theoretical foundations: Piaget 243
Vygotsky and intellect 247
Intelligence 251
Language development 257
Chapter summary 267

11 Social and emotional development of toddlers
Introduction 270
Emotional regulation 270
Children's relationships within the family context 271
Theoretical foundations 271
Psychoanalytic views of development 274
A transactional view of development 276
Social development 277
Toddlers and day-care 285
Behavioural problems 287
Hospitalisation of young children 288
Chapter summary 292

Part 5 The Pre-school Years

12 Physical development of pre-schoolers
Introduction 298
Physical growth: dynamic systems and all jazzed up! 298
Motor development 299
| Contents |
|-------------------------------|-------|
| Toilet training               | 301   |

| Chapter summary               | 339   |
| **14 Social and emotional development of pre-schoolers** | 340   |
| Introduction                  | 341   |
| Theoretical foundations       | 341   |
| Who am I? The developing sense of self | 344   |
| Children's developing understanding of selfhood | 346   |
| Conflict                      | 346   |
| Adjusting to school           | 348   |
| Child abuse and neglect       | 350   |
| School bullying               | 354   |
| Chapter summary               | 366   |
| **Part 6 Middle Childhood**   | 369   |
| **15 Physical development in middle childhood** | 371   |
| Introduction                  | 372   |
| Gross motor development       | 372   |
| Somatotype                    | 375   |
| Girls and sport               | 377   |
| Food and physical activity    | 382   |
| Promoting physical activity   | 384   |
| Health in middle childhood – mental health | 389   |
| Chapter summary               | 392   |
16 **Cognitive development in middle childhood**

- Introduction 395
- Theoretical foundations 395
- Theory of mind 397
- Children’s humour 398
- Learning – motivation to learn 400
- Approaches to learning/learning style 402
- Moral development 408
- Children’s understanding of death 419
- Chapter summary 423

17 **Social and emotional development in middle childhood**

- Introduction 426
- Theoretical foundations 426
- Friendship in middle childhood 431
- Stress 435
- Effects of divorce 443
- Behaviour management in school 445
- Chapter summary 450

**Part 7** **Adolescence**

18 **Adolescent physical development and health issues**

- Introduction 456
- Adolescence 456
- Images of adolescence 457
- Physical development 458
- Sex differences 461
- Overview of gender identity 467
- Adolescent health issues 467
- Eating disorders in adolescents 469
- Adolescent risk taking 472
- Schools as sites for mental health promotion 476
- Chapter summary 479

19 **Cognitive development in adolescence**

- Introduction 482
- Brain development 482
- The nature of adolescent thinking 484
- Adolescent language development 489

Preface

Introduction
As for the second edition, the third edition of *Child, Adolescent and Family Development* is written for all those who entertain an interest in children's and adolescents' lives, and for all those who appreciate the curiosity, strength and resilience of growing children and young people. It is a book about the richness and diversity of children's and adolescents' lives, considered in the context of the family. In turn, the family and its individual members are viewed in the broader historical context of society and culture. This book is also about change. All that it discusses is considered to be in a process of flux and change.

In planning and writing the third edition we have taken note of the feedback received from tertiary teachers and their students regarding the content of the book. A number of features in the second edition were consistently endorsed by readers including the ‘broad sweep’ of the book as it placed human development in an historical, philosophical and cultural context. Readers also commented favourably on the Australasian flavour which considered child development in an international context. Finally, appreciation was expressed for the ‘readability’ of the text.

In preparation for the third edition a number of anonymous reviewers responded to the proposed content and we are particularly grateful for their opinions. Where possible, we have taken into account their suggestions in this edition, but obviously the final responsibility for the content is ours.

The foundation for the text
This text draws on a number of inter-related elements.

- The book is embedded in theory and, again, for this we make no apology. In the book’s inception, its theoretical base reflects our prevailing belief that all our dealings with young people in whatever role, whether as parent or teacher or in some other capacity, are bounded by theory, either implicit or explicit.

- Human development is seen through the lens of philosophy, history and culture. The writings of this text strongly reflect the manner in which the philosophy of science shapes and influences our thinking about children and their development, and particularly the nature of research conducted to better understand development. Our intent in placing the study of child development in an historical context is consistent with the belief that history provides a framework for helping interpret and understand behaviour. Our travel and research in other cultures has strongly impressed upon us how deeply our development is steeped in culture and how significantly different and tantalisingly similar cultures are from one another.
The text reflects an abiding commitment to a broad based systemic and socio-cultural view of development. In this regard the first author owes a depth of gratitude for several sabbaticals in Calgary, Canada, where, in studying and practising family therapy, he had the fortunate opportunity to explore the basic ideas and practice of systems theory.

Finally, this text reflects our enduring commitment to translating research into knowledge and practice with a strong practical application.
How to use this book

The text is presented in chronological order so as to provide the reader with a clear understanding of the complexity of the individual’s developing capacities. The drawback of this approach is that it may compartmentalise child development, but this is not an intended outcome of the book. Indeed, it has been our concern to show the interrelatedness of the child’s development wherever possible. An alternative, more topical approach is described below.

The book is divided into eight parts, comprising a total of 21 chapters. Parts 1 and 2 deal with the study of human development, and parts 3–7 examine the development of the child from infancy to adolescence. Part 8 considers a life-span perspective.

In part 1, the first three chapters reflect a concern with the theoretical issues underpinning the study of child and adolescent development. Chapter 3 is an overview of theoretical contributions to developmental psychology and can be used either as a ‘stand alone’ chapter or as a reference for other chapters. Chapters 4 and 5 (part 2) deal with the beginnings of life, taking us through to the newborn period. Part 3 (chapters 6–8) is devoted to infancy, highlighting different components of the infant’s development. Part 4 (chapters 9–11) examines the toddler’s place in the world, emphasising the active and constructive nature of toddlers’ learning and development. In chapters 12–14 (part 5) the pre-schooler’s enlarging world, which draws on wider social contact, is discussed. Middle childhood is addressed in chapters 15–17 (part 6), focusing on the child’s place in school and society, and on broader issues facing the family, such as the birth of a second child. In part 7 (chapters 18–20) the rich, complex and diverse world of adolescence is explored, together with the adolescent’s moves towards independence from the family. In part 8, chapter 21 draws together the themes discussed throughout the text and places child and adolescent development in a life-cycle perspective.

The family life-cycle is a series of 21 items, one at the end of each chapter, dealing with different aspects of the family. These may be studied in the context of each chapter, or as a separate topic. Throughout the book, boxed features are devoted to items of special interest related to topics discussed in the main text. These Special Interest Boxes are grouped under headings of (i) parents, (ii) culture, (iii) health, (iv) teachers, (v) research, (vi) case-studies, and (vii) policy. As an aid to study, each chapter concludes with discussion questions and activities. A separate website will provide (a) details of research methodology, (b) 10 practical child observation activities, (c) expanded review tests and answers.

For those who wish to teach a topical course on child development, the following chapter sequence will work well:
How to use this book

THE STUDY OF HUMAN DEVELOPMENT
Chapter 1: Seeing children in context
Chapter 2: Concepts of development
Chapter 3: Theoretical foundations of child development
  Family life-cycles 1–3

THE BEGINNING OF LIFE
Chapter 4: Prenatal development
Chapter 5: Birth and the newborn child
  Family life-cycles 4–5

PHYSICAL DEVELOPMENT
Chapter 6: Physical development in infancy
Chapter 9: Physical development of toddlers
Chapter 12: Physical development of pre-schoolers
Chapter 15: Physical development in middle childhood
Chapter 18: Adolescent physical development and health issues
  Family life-cycles 6–10

COGNITIVE DEVELOPMENT
Chapter 7: Cognitive development in infancy
Chapter 10: Cognitive development of toddlers
Chapter 13: Cognitive development of pre-schoolers
Chapter 16: Cognitive development in middle childhood
Chapter 19: Cognitive development in adolescence
  Family life-cycles 11–14

SOCIAL AND EMOTIONAL DEVELOPMENT
Chapter 8: Social and emotional development in infancy
Chapter 11: Social and emotional development of toddlers
Chapter 14: Social and emotional development of pre-schoolers
Chapter 17: Social and emotional development in middle childhood
Chapter 20: Social and emotional development in adolescence
  Family life-cycles 15–18

A LIFE-SPAN PERSPECTIVE
Chapter 21: Towards a lifespan perspective
  Family life-cycle 19
Acknowledgements

Once again our special thanks go to all who contributed to the book.

Photographs, many from family albums, were kindly provided by the Lawson and Korcz families.

Nina Sharpe, Commissioning Editor, Academic and Professional, at Cambridge University Press, deserves special thanks for her expert help and guidance in commissioning and shaping the text. We would also like to express our gratitude to Gemma Tiernan, Development Editor, Academic and Professional, for her endless patience with editing. Finally, the tireless efforts of Kath Harper in copy editing the text are gratefully acknowledged.
