Progress in Neurotherapeutics and Neuropsychopharmacology
2007

Published annually, volumes in this series provide readers with updates of recent clinical trial results, impacts of trials on guidelines and evidence-based practice, advances in trial methodologies, and the evolution of biomarkers in trials. The series focuses on trials in neurotherapeutics, including disease-modifying and symptomatic agents for neurological diseases, psychopharmacological management of neurological and psychiatric illnesses, and non-drug treatments. Each article is authored by a leader in the area of neurotherapeutics and clinical trials, and the series is guided by an Editor-in-Chief and Editorial Board with broad experience in drug development and neuropsychopharmacology. Progress in Neurotherapeutics and Neuropsychopharmacology is an essential update of recent trials in all aspects of the management of neurological and neuropsychiatric disorders, and will be an invaluable resource for practising neurologists as well as clinical and translational neuroscientists. Articles also available at http://www.cambridge.org/jid_PNN

1 Progress in Neurotherapeutics and Neuropsychopharmacology 2007
   Jeffrey L. Cummings

13 A Randomized Trial Comparing Unilateral Pallidotomy with Bilateral Subthalamic Nucleus Stimulation in PD: Perspectives for Future Implication in Clinical Practice
   Rianne A.J. Esselink, Rob M.A. de Bie, Rob J. de Haan, P. Richard Schuurman, Pepijn van den Munckhof and Johannes D. Speelman

27 The Phase II Futility Clinical Trial Design
   Bernard Ravina and Yuko Palesch

39 Clinical Trials in Dementia
   Encarnita Raya-Ampil and Jeffrey L. Cummings

79 Comparative Neuropsychological Effects of Lamotrigine and Topiramate in Healthy Volunteers
   Kimford J. Meador

97 Pilot Clinical Trial of NT-3 in CMT1A Patients
   Zarife Sahenk

109 New Directions in Pediatric Neuro-Oncology Practice: Impact of the Children’s Cancer Group Study 9933, a Phase II Study of High-Dose Chemotherapy Before Radiation in Children with Newly Diagnosed High-Grade Astrocytoma
   Tobey J. MacDonald

123 Chemoradiotherapy for primary CNS lymphoma
   Antonio M.P. Omuro, Joachim Yahalom and Lauren E. Abrey

137 A Double-Blind, Randomized Clinical Trial to Assess the Augmentation with Nimodipine of Antidepressant Therapy in the Treatment of “Vascular Depression”
   F.E. Taragano, P.M. Bagnati and R.F. Allegri
155 Repetitive Transcranial Magnetic Stimulation: A Novel, Noninvasive Add-on Treatment for Medication-Resistant Depression

Tung-Ping Su and Chih-Chia Huang

173 The NIMH MATRICS Initiative: Development of a Consensus Cognitive Battery

Robert S. Kern, Michael F. Green and Stephen R. Marder

187 Review of a Randomized-Controlled Trial of Adjunctive Bupropion in the Treatment of SSRI-Induced Sexual Dysfunction

Anna Lembke and Charles DeBattista

193 Trial-Based Advances in the Treatment of Bipolar Depression

David E. Kemp, Keming Gao, David J. Muzina, Prashant Gajwani and Joseph R. Calabrese

213 Symptomatic Remission in Patients with Bipolar Mania: Results from a Double-Blind, Placebo-Controlled Trial of Risperidone Monotherapy

Srihari Gopal, John L. Beyer, David C. Steffens and Michelle L. Kramer

225 Olanzapine as Maintenance Therapy in Patients with Bipolar I Disorder

Mauricio Tohen and Daniel Yen Lin

239 Can Quality of Life be Improved in Schizophrenia? Results From A Pragmatic, Randomized, Controlled Trial Comparing Olanzapine with First Generation Antipsychotics

Maurício Silva de Lima, Alan Breier and Jair de Jesus Mari

251 Combined Behavioral and Pharmacological Treatment of Opioid-Dependent Adolescents: A Randomized, Controlled Trial

Lisa A. Marsch
