<i>Preface</i>	page xi		
<i>Acknowledgements</i>	xiii		
1 Introduction	1		
2 Fossils and fossilisation	5		
2.1 Fossils	5		
2.2 The fossilisation process (taphonomy)	5		
2.3 Collection of fossils	7		
2.4 Classification and identification of fossils (systematic palaeontology or taxonomy)	11		
2.5 Description and illustration of fossils (palaeontography)	14		
2.6 Preparation, conservation and curation of fossils (museumology)	15		
3 Principal fossil groups	17		
3.1 Bacteria	18		
3.2 Plant-like protists or algae	20		
3.3 Animal-like protists or protozoans	48		
3.4 Plants	77		
3.5 Fungi	90		
3.6 Invertebrate animals	91		
3.7 Vertebrate animals	190		
3.8 Trace fossils	217		
4 Palaeobiology	221		
4.1 Palaeoecology and palaeoenvironmental interpretation	221		
4.2 Discrimination of non-marine and marine environments	224		
4.3 Bathymetry and palaeobathymetry	224		
		4.4 Biogeography and palaeobiogeography	230
		4.5 Palaeoclimatology	237
		4.6 Quantitative and other interpretive techniques in palaeobiology	239
		5 Key biological events in earth history	241
		5.1 Evolution and extinction	241
		5.2 Proterozoic	247
		5.3 Palaeozoic	249
		5.4 Mesozoic	255
		5.5 Cenozoic	259
		6 Biostratigraphy and sequence stratigraphy	282
		6.1 Biostratigraphy	282
		6.2 Biostratigraphic technologies	285
		6.3 Allied disciplines	286
		6.4 Stratigraphic timescales	288
		6.5 Sequence stratigraphy	297
		7 Case histories of applications of palaeontology	306
		7.1 Petroleum geology	306
		7.2 Mineral exploration and exploitation	348
		7.3 Coal mining	349
		7.4 Engineering geology	353
		7.5 Environmental science	355
		7.6 Archaeology	356
