PREFACE

The symposium entitled "Scientific Basis for Nuclear Waste Management XXIII" was held November 29–December 2 at the 1999 MRS Fall Meeting in Boston, Massachusetts. This year's symposium attracted 142 abstracts, and this proceedings volume contains 114 written contributions from the Meeting. The papers have been organized into 12 separate sections covering various topics in nuclear waste management.

The organizers of this symposium would like to acknowledge the contributions of the following individuals who chaired topical sessions and helped review the manuscripts published in this volume. Their efforts and insights into the various scientific and engineering disciplines associated with this program greatly contributed to the success of the symposium and the quality of the proceedings volume.

Ken R. Czerwinski	Swami V. Raman
Darrell S. Dunn	George D. Redden
William L. Ebert	Donald T. Reed
Rodney C. Ewing	Surendra P. Shah
Melinda A. Hamilton	Eric R. Siegmann
Larry C. Hull	Kastriot Spahiu
Brian M. Ikeda	Dennis M. Strachan
Carol M. Jantzen	Lou Vance
Lawrence H. Johnson	John D. Vienna
Fraser King	Lars O. Werme
Michelle A. Lewis	David J. Wronkiewicz

The efforts of many anonymous reviewers are also gratefully acknowledged. We also acknowledge the generous financial support of The Idaho National Engineering Laboratory. We would like to extend a special thank you to Margaret A. Knecht for editorial assistance, and to the staff of the Materials Research Society for essential organizational assistance.

Robert W. Smith
David W. Shoesmith
