PUBLISHER'S NOTE

Mr Hornell died in February 1949. He had completed a thorough revision of his manuscript, and had passed proofs of his many illustrations. The book has been seen through the press by Professor J. H. Hutton, and every effort has been made to ensure accuracy of detail. But Mr Hornell wrote from unrivalled personal knowledge of his subject: if there are imperfections in the book, it is because he had no opportunity to make them good in proof.
CONTENTS

List of Plates
List of Text-figures

Chapter I Weapons of the Chase borrowed by the Fisherman
   I The Spear and the Harpoon
   II The Fishing-bow, Cross-bow, Blow-gun and Sickle

II Angling of Sorts

III Animals trained to fish and Fishes that angle for their living

IV Shark-fishing

V The Negro as fisherman
   I Sea-fishing off West Africa
   II Notable fishing Methods of Negroes on Inland Waters

VI Kite-fishing

VII Fisheries that ring the World: the Bonito, Albacore and Tunny Industries
   I Bonito-fishing in the Maldive Islands
   II Catching and Curing the Bonito in Japan
   III Bonito-fishing in Polynesia
   IV Crane- or Tira-fishing for Albacore
   V The Tuna fisheries of California
   VI The European Tunny and Bonito fisheries

VIII Baiting for Crocodiles and Alligators

IX Catching and Curing the Bombay-duck

X The Grey Mullet takes Evasive Action

XI Netting for Hilsa, the Indian Shad

LIST OF PLATES

(The plates are bound together at the end of the book between pages 208 and 209)

A Fijian fisher-girl with her prawn-net

Frontispiece

I
A. How the swordfish is lured within reach, Laccadive Islands; a demonstration
B. Harpooners watching for swordfish, Strait of Messina. (Photo by F. G. Croupi, Taormina)

II
A. Shooting fish with a cross-bow, Malabar
B. A Chinese illustration of cormorant-fishing. (From De Thierry)

III
A. Adjusting a cormorant's harness. (By courtesy of Dr E. W. Gudger and the American Museum of Natural History, New York)
B. The head cormorant wearing its harness. (By courtesy of the Field and Stream Magazine, U.S.A.)

IV
A. Night fishing with cormorants, Gifu, Japan. (By courtesy of Dr E. W. Gudger)
B. An experiment with a remora during a pearl fishery, Ceylon

V
A. Negro woman making a bimble-net, Sierra Leone
B. Fishing with a bimble-net, Sherbro, Sierra Leone

VI
A. A Kru fisherman landing with a catch of tarpon
B. A Sierra Leone fisherman using four fishing-lines

VII
A. The Chinese lever dip-net in use in South India, at Beyapore, Malabar
B. Bonito-fishing in Japan; a lookout boat

VIII
A Solomon islander freeing a garfish's beak from the threads of the spider's web lure used in kite-fishing. (By courtesy of Miss B. Blackwood and the Clarendon Press)

IX
A. Collecting bait for the bonito fishery, Maldive Islands
B. The Maldivian bonito fishery; the crew engaged in fishing

X
A. A store-basket for live bait, Minicoy Island
B. A store-basket for bonito live bait as used by the Japanese

XI
A Samoan bonito-boat showing how two men ply three rods. (Photo by Tattersall's Studio, Apia)

XII
A. Doing tots on his thigh; a Gujarati fisherman calculates his earnings
B. Shooting an anchored bag-net off Velan, Kathiawar, India

XIII
A. Stringing ' Bombay-ducks' to dry at Velan, Kathiawar
B. The fishermen's shrine to Madhvar Devi at Diu, Kathiawar, India
LIST OF PLATES

XIV A. Drying the threefold portion of a veranda-net, Mauritius
    B. Egyptian mullet-fishers: their veranda-net is rolled up at the stern of each boat

XV The changodam method of catching mullet in Cochin backwaters

XVI A. Two Italian fishing-boats which trawl in pairs off Port Said
    B. Ancient Egyptians using a primitive trawl. (By courtesy of the Metropolitan Museum of Art, New York)

XVII A. A catamaran used in the flying-fish fishery, Coromandel coast of India
    B. The same catamaran under sail

XVIII A. A prawn trap, Chilka Lake, Ganjam, India. These traps are set in long rows across the current
    B. Quadrangular fish and prawn traps, Kolair Lake, India

XIX A. Hand-traps used in Malabar. Left, a sieving device; centre, a plunge-basket; right, a fishing-scoop
    B. Tubular traps of split cane used in Fiji. Below, an eel-trap; above, two wider woven fish-traps

XX A. Fish-traps (nasse) on the quay, Palermo, Sicily
    B. A large fish-trap (nasse), Malta

XXI A. A hooded fisherwoman and her fish-trap. Aramia river, Papua. (Photo by Capt. Frank Hurley)
    B. A small type of nasse (fish-trap) hung from a buoyed rope, Malta

XXII A. A stellate five-way fish-trap, Kilakarai, South India
    B. Heart-shaped fish-traps, Madeira

XXIII A. A two-way fish-trap (unwea), Mbau, Fiji (1939)
    B. A one-way fish-trap (rusu) with entrance on top, Mbau, Fiji (1939)

XXIV A. Eel-trap of unwea type, Fiji (1939)
    B. A shark-fisher of Aua Island, Melanesia. (Photo by courtesy of G. Lane-Fox Pitt-Rivers)

XXV A. Walled enclosures used to trap fishes on the Darling River, Australia. (Photo by Test and Rohn, Sydney, Australia)
    B. A screen-barrier, trapped at the centre in a Cochin backwater, South India

XXVI A. Outer view of a cordate terminal fish-trap used at Comacchio, Italy
    B. View of the same from within

XXVII A. A poisoning fish-drive at Ovalau Island, Fiji: hauling in the net. (By courtesy of Dr Isaac, Suva)
    B. The end of the drive; hauling the net aboard, Ovalau, Fiji

XXVIII A fish-drive for shoal of hilsa at the Lower Anicut, Kaveri River, South India

XXIX A. Divers at work on the pearl banks, Ceylon
    B. Divers from Tuticorin at work on the South Indian pearl banks
LIST OF PLATES

XXX  A. Muhammadan divers with their catches of chank shells in net-bags; Rameswaram, South India (1914)
     B. A Japanese woman diver on the pearl bank, Bay of Agu, Japan

XXXI A. Three Japanese women divers and their male attendant
      B. The same family group at work, Toba, Japan

XXXII A. Life appearance of an edible sea-urchin (*Echinus esculentus*)
       B. Shells of *Pteroceras* (five-fingered chank) used as octopus-traps, Palk Strait, India

XXXIII A. The common octopus; attitude when resting
       B. A large catch of octopus drying outside a village in Mauritius

XXXIV A. The ‘ormer’ (*Halostis tuberculata*) of the Channel Islands. Above, the inner surface of an empty shell; below, the under surface of the animal and (right) the outer surface of the shell. Jersey
       B. A number of the Brachiopod *Lingula* dug out of sand, Fiji

XXXV  Baskets of the Fijian river-clam, *Batissa violacea*, on sale in Suva market, Fiji (1939)

XXXVI Strings of crabs on sale on the roadside in Fiji (1939)

[Where no acknowledgement is made in the list above, the photograph is by the author.]
LIST OF TEXT-FIGURES

1. Indian multidentate fishing-spears; in order from above they are: A, the ordinary form of Bengal konch. B, the Nadiya konch. C, the Jutiyā, a harpoon variety. D, the Pacho of Patna and Mymensingh. (Original)  

2. An Egyptian nobleman of dynastic times spearing fish with a bident. (After Mascaro)  

3. A fishing canoe of Menado in the Celebes; a Trident spear rests in crutches on the outrigger. (Original)  

4. Types of the ornamentation of the wooden ‘bonito’ lures used in the Laccadive Islands in the swordfish fishery. The two figures at the bottom are side-views of the tails of two of these lures. (Original)  

5. A, the butt of a turtle spear from the north coast of New Guinea, fancifully carved. (Original) B, head of another, armed with two barbed spearheads. (Original)  

6. A, propeller-shaped ‘retarder’ or brake used in the islands off the north coast of New Guinea when fishing for turtle or large fishes. B, longitudinal section through the retarder to show its curvature. (Original)  

7. A, retarder in the form of an ox-ray, Woi Bay, New Guinea. (Original) B, other forms of retarders used by New Guinea fishermen; pieces of china plates are inserted into the lobes of $b$.  

8. The simple form of bow and arrow-harpoon used to shoot fishes in Malabar backwaters. (Original)  

9. An Andaman islander shooting a fish with bow and arrow  

10. A simple form of the Malayali cross-bow from Arathinkal, Travancore; the line receptacle is omitted. (Original)  

11. The ordinary type of the Malayali cross-bow. Note the elongated stock and the stout bow formed of four plates or leaves. The arrow groove and the line pocket are shown but not the arrow; from Valapad, South Malabar. (Original)  

12. Crossbow arrows used in South India. A is a bird bolt; B and E are the forms of fish-arrow in general use; C and D being rarer varieties of the same. (Original)  

13. Varieties of the Malayali blow-gun differing in the form of the mouth-piece. A is a plain reed tube without added mouth-piece. In B, the mouthpiece is a disk of coconut shell; in C, it is turned out of wood, whilst in D and E, it is built up of layers of gummed cloth, painted over. The butt end of E is ornamented with lacquered bands of yellow and red on black. The barrels of all these are made of the stems of the ita reed. (Original)

LIST OF TEXT-FigURES

14. A is a very massive wooden blow-gun in the Trichur Museum, Cochin. The butt is encased in a turned brass mouthpiece; the barrel is spirally wrapped with strips of fibre, painted black. B is an old blow-gun from Valapad in South Malabar; it is made of wood and spirally wrapped with animal membrane. C shows a retrieving hook on the muzzle of the Trichur blow-gun. (Original) page 18

15. Blow-gun darts used when shooting fishes. 1, dart ready for use; 2, details of: (a), the shaft; (b), the steel-barbed head; (c), the mop-like wad, its base not yet pulled down into the cavity at the head of the shaft; 3, a longitudinal section through the head of the shaft, showing the oblique perforation through which the retrieving line is passed. (Original) 19

17. The common sucker-fish, Echeneis naucrates. (Original) 35

18. A deep-sea angler-fish, Lophodetus dinema. A phosphorescent light is emitted from the bulbous tip of its fishing-rod. (After Rogen and Trewavas) 38

19. The small Indian angler-fish, Antennarius hispidus. (Original) 39

20. The Uringale, a barrier weir-trap used at Mala in the French Cameroons. (After Monod.) A, diagram of the fence in optical section. B, upstream face view 56

21. A lever dip-net (ndambé) used in the French Cameroons on the River Faro. (After Monod) 58

22. Canoes of the Kotoko people, fitted with the lever dip-net (ndem). A, the net raised; B, the net being lowered; C, transverse section of the canoe hull, made of two dugout hulls sewn together longitudinally and with the sides raised by sewn-on wash-strakes. The net is suspended from two long antennae, which take the place of the oval frame used in the ndambé. (After Monod) 58

23. A fishing kite used in Buka, North-west Solomon Islands. A, apex, where the mid-ribs of the median and outer sections meet; B, the control of flying line; C, the tail line carrying the lure; D, made of reeled filaments from a spider's web; E, E, E, the three strengthening cross-ribs; a, a, points where the line C is tied to the free end of the median mid-rib. (From an example in the Pitt-Rivers Museum, Oxford, collected by Miss B. Blackwood who kindly lent this block) 63

25. Two examples of Polynesian bonito hooks. (Original) 76

26. The two-rod fishing gear used on the Californian coast in the bonito and tunny fishery 83

27. Method of hooking an alligator in South America. (After C. Waterson) 92

28. A hilsa fisherman floating downstream on the River Kaveri, supported upon a wooden float. (Original) 109

29. A fishing dingi drifting down the Ganges with its thāngla-jāl lowered into position to catch hilsa. (Original) 111
LIST OF TEXT-FIGURES

30 Egg of an Indian flying-fish (Cypselurus sp.) undergoing fertilization. The short, sinuous-tailed bodies are spermatozoa; the long filaments are the means whereby the eggs are attached to floating seaweeds. (From a drawing by Dr M. Ramaswami Naidu)  

31 Diagram showing how the madi valai is operated. (Original)  

32 Ground baiting of a bush-filled enclosure on the River Benue, Cameroons. (After Monod)  

33 A Samoan example of the ‘rat-lure’ used to catch octopus in Polynesia. (Original)  

34 A small species of octopus numerous on the Zostera beds in Palk Strait, South India, × 3. (Original)  

35 Shell of the five-fingered chank (Pterocerat) used in South India as an octopus-trap, × 1. (Original)  

36 The common squid, Loligo, × 1. (Original)  

37 A common squid-fishing device in use in the north of Ceylon. On the right is the jigger used to hook the squid. (Original)  

38 A tubular trap used in India to capture murrel (Ophicephalus), × 1. (Original)  

39 Thorn-lined traps. A, a floating variety used to catch prawns, Fiji; B, another from the Duke of York group, Bismarck Archipelago, with the thorns completely covered. (Original)  

40 The two components of a South Indian three-way basket trap. A, woven basketry shaped to form the top and sides; B, the part to form the floor of the same trap; C, the trap completed. (Original)  

41 Diagrammatic sections through four types of Fijian fish-traps. A, the suva type; B, the uwea type of Mbau; C, the uwea of Rewa; D, an eel-trap of uwea type. (Original)  

42 Plans of typical fishing-weirs or pounds, Oceania. A, as used in Vitilevu Bay; B, one seen east of Savu-savu Bay; C, a type with two double pens. (Original)  

43 Plan of a labyrinth for the capture of eels and mullet at Comacchio, Italy.  

44 Nose-clip used by Arab divers. (Original)
