<i>Preface</i>	<i>xi</i>
<i>Acknowledgments</i>	<i>xiii</i>
<i>List of abbreviations</i>	<i>xiv</i>
1. Mechanics	1
1.1 Introduction	1
1.2 Idealizations in mechanics	1
1.3 Essence of vector algebra	3
1.4 Laws of mechanics	18
1.5 System of forces	21
1.6 Moment of a force	22
1.7 Equivalent force system (Rigid body model)	30
1.8 Free body diagram (Two dimensional cases)	40
1.9 Equations of equilibrium	44
<i>Miscellaneous Examples</i>	56
<i>Summary</i>	70
<i>Concept review questions</i>	73
<i>Exercise</i>	73
<i>Objective type questions</i>	76
<i>True or false</i>	78
<i>Fill in the blanks</i>	78
<i>Answers</i>	80
2. Friction	82
2.1 Introduction	82
2.2 Nature of sliding friction	82
2.3 Coulomb's law of friction	84
2.4 Angle of friction	84
2.5 Cone of friction	85
2.6 Angle of repose	86
2.7 Rolling friction	91
2.8 Equilibrium	93
2.9 Applications	97
<i>Miscellaneous Examples</i>	118
<i>Summary</i>	132

	<i>Concept review questions</i>	133
	<i>Exercise</i>	133
	<i>Objective type questions</i>	138
	<i>True or false</i>	140
	<i>Fill in the blanks</i>	141
	<i>Answers</i>	142
3.	Shear Force and Bending Moment	144
3.1	Introduction	144
3.2	Terminology	145
3.3	Free body diagram of a beam	146
3.4	Sign convention	149
3.5	Analysis of beam	150
3.6	Shear force and bending moment diagrams	155
3.7	Numerical approach for drawing SFD and BMD	162
	<i>Miscellaneous Examples</i>	174
	<i>Summary</i>	197
	<i>Concept review questions</i>	198
	<i>Exercise</i>	198
	<i>Objective type questions</i>	201
	<i>True or false</i>	204
	<i>Fill in the blanks</i>	204
	<i>Answers</i>	205
4.	Truss	207
4.1	Introduction	207
4.2	Construction of a truss	207
4.3	Dimensionality of truss	208
4.4	Rigidity of truss	208
4.5	Determinacy of truss	210
4.6	Analysis of perfect plane truss	210
4.7	Solution of a just rigid plane truss	212
4.8	Frames	231
	<i>Miscellaneous examples</i>	239
	<i>Summary</i>	259
	<i>Concept review questions</i>	260
	<i>Exercise</i>	260
	<i>Objective type questions</i>	264
	<i>True or false</i>	265
	<i>Fill in the blanks</i>	266
	<i>Answers</i>	267
5.	Central Points and Moment of Inertia	268
5.1	Introduction	268
5.2	Centroid of simple plane curve and area	271

5.3	Centroid of composite areas	272
5.4	Theorems of Pappus and Guldinus	281
5.5	Moment of inertia	291
5.6	Principal axes and principal moments of inertia	304
5.7	Transformation relations	304
5.8	Invariants of inertia	307
5.9	Radius of gyration	310
5.10	Mass moment of inertia	310
5.11	Radius of gyration of a body	310
5.12	Moment of inertia of certain regular solid bodies	310
	<i>Miscellaneous examples</i>	319
	<i>Summary</i>	332
	<i>Concept review questions</i>	334
	<i>Exercise</i>	334
	<i>Objective type questions</i>	336
	<i>True or false</i>	338
	<i>Fill in the blanks</i>	338
	<i>Answers</i>	339
6.	Kinematics of Particle and Rigid Body	340
6.1	Introduction	340
6.2	Kinematics of particle	340
6.3	Straight line motion of particle	340
6.4	Motion on curved path (Cartesian coordinates)	344
6.5	Time derivative of a unit vector rotating in X-Y plane	350
6.6	Motion on curved path (Path variables)	353
6.7	Motion on curved path (Polar coordinates)	359
6.8	Kinematics of rigid body	365
6.9	Pure rotation of rigid body	368
6.10	General plane motion of rigid body	368
6.11	Instantaneous center of rotation	370
	<i>Miscellaneous examples</i>	376
	<i>Summary</i>	388
	<i>Concept review questions</i>	390
	<i>Exercise</i>	390
	<i>Objective type questions</i>	393
	<i>True or false</i>	395
	<i>Fill in the blanks</i>	397
	<i>Answers</i>	397
7.	Kinetics of Particle and Rigid Body	399
7.1	Introduction	399
7.2	Field forces	400
7.3	Potential energy	402
7.4	Work energy principle for a particle	405

7.5	Mechanical energy conservation principle	407
7.6	Kinetics of rigid body	414
7.7	Kinetic energy of a rigid body	418
7.8	Work energy principle	419
7.9	Linear momentum of a rigid body	420
7.10	Angular momentum of a rigid body	422
	<i>Miscellaneous examples</i>	430
	<i>Summary</i>	445
	<i>Concept review questions</i>	446
	<i>Exercise</i>	447
	<i>Objective type questions</i>	450
	<i>True or false</i>	452
	<i>Fill in the blanks</i>	452
	<i>Answers</i>	453
8.	Method of Virtual Work	455
8.1	Introduction	455
8.2	Degrees of freedom	455
8.3	Virtual displacement	458
8.4	Displacement center	460
8.5	Virtual work	461
8.6	Principle of virtual work	461
8.7	Procedure for applying the virtual work method	462
	<i>Summary</i>	475
	<i>Concept review questions</i>	477
	<i>Exercise</i>	477
	<i>Objective type questions</i>	480
	<i>True or false</i>	482
	<i>Fill in the blanks</i>	483
	<i>Answers</i>	483
9.	Mechanical Vibration	485
9.1	Introduction	485
9.2	Characteristics of simple harmonic motion	485
9.3	Differential equation governing the simple harmonic motion	486
9.4	Elements of vibrating systems	487
9.5	Free vibration	487
9.6	Mathematical model representing the ideal system	487
9.7	Solution of differential equation of vibrating system	489
9.8	Forced vibration	492
9.9	Combination of springs	494
9.10	Simple pendulum	496
9.11	Compound pendulum	497
	<i>Summary</i>	506
	<i>Concept review questions</i>	508

<i>Exercise</i>	509
<i>Objective type questions</i>	510
<i>True or false</i>	512
<i>Fill in the blanks</i>	512
<i>Answers</i>	513
10. Simple Stress and Strain	514
10.1 Introduction	514
10.2 Definitions	514
10.3 Elastic constants	516
10.4 Deflection of bars	524
10.5 Strain energy in members due to static loading (gradually applied load)	532
10.6 Stress strain diagram	540
<i>Miscellaneous examples</i>	543
<i>Summary</i>	554
<i>Concept review questions</i>	556
<i>Exercise</i>	556
<i>Objective type questions</i>	558
<i>True or false</i>	559
<i>Fill in the blanks</i>	560
<i>Answers</i>	560
11. Bending and Shear Stresses in Beams	562
11.1 Introduction	562
11.2 Assumptions in pure bending	563
11.3 Bending stress in beams	565
11.4 Shear stress in beams	577
<i>Miscellaneous examples</i>	584
<i>Summary</i>	593
<i>Concept review questions</i>	594
<i>Exercise</i>	595
<i>Objective type questions</i>	596
<i>True or false</i>	598
<i>Fill in the blanks</i>	598
<i>Answers</i>	599
12. Torsion of Circular Shaft	601
12.1 Introduction	601
12.2 Analysis of shear stress in a shaft subjected to pure torque	601
12.3 Polar modulus	606
12.4 Power transmission	606
<i>Miscellaneous examples</i>	613
<i>Summary</i>	619
<i>Concept review questions</i>	620
<i>Exercise</i>	620
