SUBJECT INDEX

Actinoloba, 135
Aggregation of Spirochaets, 119
Alectria obsoleta, movement of, 66, 123
Amotosia, 14
Anaerobic cilia, 104
Anodin, cells of typhlosole (fig.), 7
Astrophytium, 140
Axial filament, 51
Axis of contraction, 50
Axopodia, 14
Basal granules, 9, 13
Bending forces, 48
Calcium salts, effects on cilia, 100 seq.
Cardiac muscle, 113
Caryophyllia, 134
Centrosomes, 13
Cilia, effect of electric currents on, 81
effect of ions on, 79, 96 seq.
effect of temperature, 75
efficiency of, 91
force exerted by, 85 seq.
frequency of beats, 73
movement of excised, 47
nervous control of, 122 seq.
of Alectria, 123
of Ctenophores, 118, 120, 124 seq.
of Metridium, 57 seq.
of Paramecium, reversal of, 61
of Physa, 121
on palps of Molluscs, 59, 60
optical properties of, 9
Paramecium (fig.), 3
sensitivity to pH, 81
size of, 2
work done and oxygen consumed by, 88
work done by, 85 seq.
Ciliary circulation, Aurelia, 137 seq.
Ctenophores, 138
Ciliary currents, methods of observing, 65
pressure of, 67
velocity of, 67
Ciliary mechanism, theory of, 54
Ciliary movement, models of, 55
role of glycogen, 108
types of, 17 seq.
Ciliary rootlets, 9
Ciliated cells, movement of proto-
plasm in, 47
oxygen consumption of, 105 seq.
Ciliated organs, types of, 6
Ciliated tubes, conditions of flow in, 81
Cilium, active unit, 46
passive unit, 41 seq.
Cirri, 2
Euplotes, 10
Stylonychia (fig.), 3
Codostega, currents of, 70
Cyanide, effects of, 106
Cyclopid glaucoma, kinetic energy of, 92
Distribution of cilia in Coelenterates, 132 seq.
in Echinoderms, 139
in Man, 151
in Mollusca, 141
in Mytilus, 141 seq.
in Protochordata, 147
in Protozoa, 130
in Rotifers, 146, 147
in Vertebrates, 149 seq.
Dog, cells of epididymis (fig.), 7
Elasticity of cilia, 36
Epiphydysis, 18
Euglena, flagellum of (fig.), 3
Excitation of cilia, 120
Flagellum, active unit, 46
fibrous structure of, 12
geometry of undulations, 51 seq.
of Anisomina, 31
of Bicentria, 30
of Euglena (fig.), 3
of Heteromastix, 31, 32 (fig.)
of Monas, movement of, 22 seq.
of Noctiluca, 12
of Spongilla, movement of, 26
of Trachelomonas (fig.), 9
passive unit, 41 seq.
sensory functions of, 31
structure of, 9
Flame-cells, 30
Flexural movement of cilia, 18
Form of ciliary movement, 19 seq.
## Subject Index

- **Frog**, palatine epithelium, 1
- Glycogen in ciliated tissues, 108
- Heidenhain's hypothesis, 37
  - *Helix*, cells in hepatic duct (fig.), 8
  - Henneberg-Lenhossek theory, 13
- Inhibitory control, 4, 121
- Intercellular fibrils, 129
- Ions, effect of, 95 seq.
- Kinoplasm, 46
- Locomotion, velocity of ciliary, 5
- Magnesium salts, effects on cilia, 101 seq.
- Membranella, 2
  - *Blepharisma*, 10
  - *Stentor* (fig.), 3
- Metabolic cycle of ciliary movement, 108 seq.
- Metachronal rhythm, 117 seq.
  - *Metridium*, 132, 135
- Microdissection of cilia, 10
- Movement, rotatory, 35
- Muscle, comparison of cilia with, 112 seq.
  - *Mytilus* cilia, effect of ions on, 96 seq.
  - *Mytilus*, latero-frontal cells, 7 (fig.), 10
- Narcotics, on oxygen consumption and movement, 107
- Nervous control of cilia, 122 seq.
  - Neuromotor apparatus, *Euplotes*, 131
  - *Paramecium*, 130
  - *Noctiluca*, flagellum of, 12
  - Orbit of flagellar movement, 19
  - *Paramecium*, cilia of (fig.), 3
  - work done by, 90
  - Pendular movement of cilia, 17
  - *Porania*, 140, 141
  - Potassium salts, effects on cilia, 99
  - Propagation of flagellar waves, 42 seq.
  - Propulsion, theories of, 32 seq.
  - *Protanthea*, 132
  - Protozoa, number of cilia on, 2
  - Pseudopodia of *Mastigella*, 14
- Rest, position of ciliary, 56, 57
- Reversal of cilia, 57 seq.
  - by KCl, 62
  - *Sagartia*, 132
- Schäfer's hypothesis, 38
- Sodium salts, effects on ciliated epithelium, 96 seq.
  - Spermatozoa of *Paludina*, 51
  - *Spirillum*, movement of, 27
  - *Spirillum volutans* (fig.), 50
  - *Spirochaeta plicatilis* (fig.), 49
  - Sponges, currents in, 68 seq.
  - *Stentor*, membranellae of (fig.), 3
  - peristomial currents, 68
  - Stützchenzellen, 32
  - *Stylonychia*, cirri of (fig.), 3
  - *Taelia*, 134
  - Temperature, 75 seq.
  - Theory of ciliary mechanism, 54
    - Heidenhain, 37
  - Schäfer, 38
  - Theory of propulsion, 32 seq.
  - *Tractella*, 48, 49
  - *Treponema pallidum* (fig.), 49
- Undulatory movement, 18, 26
- Veliger, cilia of, 10
- Velocity of moving cilia, 16
  - Vibratile organs, morphological structure of, 6 seq.
    - types of, 2
  - *Vorticella*, kinetic energy of, 91
