## CONTENTS

**Chap. I. INTRODUCTION**  
Conditions affecting the growth of marine plants 5  
Artificial culture of diatoms 18  
Conditions affecting the growth of marine animals 19  
Bibliography 32

**II. CHEMISTRY OF SEA WATER**  
The saline constituents 36  
Gases in solution 54  
Alkalinity, carbon dioxide pressure and hydrogen ion concentration 63  
Determination of hydrogen ion concentration 76  
Biological effects of hydrogen ion concentration 79  
Sea water as a chemical medium for plant and animal life 80  
Bibliography 81

**III. WATER MOVEMENTS**  
Tides 84  
Tidal streams 94  
Ocean currents 96  
Forces derived from wind 101  
Archimedean forces in the sea 110  
Currents in the North Atlantic 114  
Submarine waves and Seiches 120  
Bjerknes’ circulation theory and its application 122  
Bibliography 130

**IV. TEMPERATURE OF THE SEA**  
Gain and loss of heat 133  
Distribution of temperature with depth 139  
Surface temperature 144  
Influence of currents 145  
Temperature of adjoining or partially enclosed seas 149  
Fluctuations of temperature and currents 152  
Bibliography 154
CONTENTS

Chap. V. COLOUR AND ILLUMINATION OF SEA WATER page 155

Bibliography 163

VI. CHEMICAL AND PHYSICAL FACTORS CONTROLLING THE DENSITY OF POPULATION 164

Growth and consumption of algae 164
Cycle of life in the sea 167
Upwelling and vertical mixing 168
Fertility of coastal areas 173
Fertility and latitude 176
Regeneration of phosphates and nitrates 179
Fluctuations in Fertility 181
Bibliography 188

INDEX 189
