Preface	ix
1 Cognitive Psychologists' Approach to Research	1
Introduction	1
Why Make Assumptions?	3
How Did Philosophers and Early Psychologists Study the Mind?	8
How Do Cognitive Psychologists Study the Mind?	25
2 Methods of Cognitive Psychology	36
Can We Use Behavioral Data to Test Cognitive Theories?	38
Can We Use Neuroscientific Data to Test Cognitive Theories?	51
The Five-Minute Brain Anatomy Lesson	64
3 Visual Perception	69
What Makes Visual Perception Hard?	72
How Are Visual Ambiguities Resolved?	76
What Is Vision For?	92
4 Attention	104
How Is Attention Selective and What Is Selected?	106
What Happens to Unselected Stimuli?	112
In What Way Is Attention a Limited Resource?	119
5 Sensory and Working Memory	131
What Is Sensory Memory?	133
What Are the Characteristics of Working Memory?	140
How Does Working Memory Work?	152
6 Long-Term Memory Structure	159
What Are the Different Types of Long-Term Memory?	160
How Is Explicit Memory Organized?	170
7 Long-Term Memory Processes: Memory Encoding	183
What Improves Memory Encoding?	184

What Doesn't Improve Memory Encoding?	193
What Effect Does Prior Knowledge Have on Encoding?	198
8 Memory Retrieval	204
Why Is Memory Retrieval Unreliable?	205
Why Do We Forget?	218
9 Concepts and Categories	229
What Is the Content of Concepts?	231
What Is a Feature?	244
10 Language Structure	250
What Is Language?	251
Is Language Special?	264
11 Language Processing	278
What Makes Language Processing Difficult?	279
How Are Ambiguities Resolved?	284
12 Visual Imagery	299
What Purpose Does Visual Imagery Serve?	301
Are Visual Images Pictures in the Head?	307
How Does Visual Imagery Work?	315
13 Decision Making and Reasoning	325
How Do People Make Decisions?	327
Do People Reason Logically?	339
14 Problem Solving	356
How Do People Solve Novel Problems?	357
How Do People Apply Experience to New Problems?	365
What Makes People Good at Solving Problems?	376
Glossary	386
References	401
Index	444
