THE WONDERS OF THE WORLD

An amazing place

They eat wild animals, plants, berries, nuts, and insects. They hunt with bows and arrows. There are lots of dangerous snakes, spiders, and scorpions. There are lions, leopards, cheetahs, and hyenas. It’s one of southern Africa’s hottest places, and there is often no water. Then they have to get their water from plants, for example, from desert melons. When they are sick, there are no hospitals. The people have to get their medicine from plants, too.

They are the San, the last people living in the Kalahari. The San people have another name – “bush people.” Their lifestyle is very simple, but they know more about animals and plants than most people do. The San people live in small groups of twenty-five to fifty. They live in huts – little houses that they make from wood and grass. There are no schools for the children. Children learn from the older people in the group. There are lots of things they have to learn so that they can live in a dangerous place like the Kalahari. In the evenings, the groups of people often sit around a fire and tell stories. Many of the stories are about animals and how to hunt them.

The Kalahari is a big area of bushland in southern Africa. It has two parts. There is less rain in the southern part than there is in the northern part, so the south is drier. There are fewer plants and animals there, and it’s a lot more difficult for people to live. But when it rains at the end of the summer, the land becomes greener and more beautiful. For a few weeks, there are millions of little flowers and even butterflies!

The tourists stay in small huts called “lodges.” They have comfortable beds and showers, but there is no electricity in the huts. When they go out of their hut, they have to be very careful. READING

1 Read the article. Where’s the world’s driest place?

Could you live there?

1 The hottest place on Earth
Death Valley is one of the world’s hottest areas, but the place with the record for the highest temperature is El Aziziya in Libya. There, the temperature reached a record of 57.8°C in 1922. Death Valley’s highest temperature on record is 56.7°C. That’s not a lot cooler!

2 Antarctica – extreme weather records
Antarctica is the most fascinating place for extreme weather. It’s the world’s coldest place. And it’s the wettest but also the driest place. Are you surprised? Well, here are the facts. People cannot live in Antarctica all year round because it’s too cold. In 1983 scientists recorded the lowest temperature ever: -89.4°C! It’s also the wettest place on earth, but not because of rain or snow. It’s the wettest place because 98% of Antarctica is covered in ice. But it’s also the driest place because it never rains there – it only snows! Antarctica holds another record, too. One area has the world’s thickest ice: it’s 2,555 meters deep!

3 The world’s best and worst weather
So, where are the best and worst places in the world for weather? That’s a difficult question. What’s good for one person may be bad for another. In 2012 an organization called International Living came up with a list. Their number 1 for the best weather was Italy, their number 2 was France, and Mexico was number 3! Where do you think your country would rank?
