

Index

- aardvark, 70
Abi, 117, 125, 192
Acacia spp., 47
Acadia, 133
 acrobatic ants (*Crematogaster* spp.), 71–72
 adolescent stage, 86
 females, 113–115
 males, 111–113
 adult chimpanzees, 86, 120–124
 death, 122–124
 old females, 120–122
 old males, 122
 social play, 149–150
Aeschynomene sp., 35
 African giant rat, 14
 African ginger (*Aframomum* spp.), 35, 46
Afrosersalisia cerasifera, 35, 50
 ageing in chimpanzees, 120–124
Al, 192
Aji, 210, 220, 224, 243, 244, 251, 252, 253, 254
Ako, 192
Albizia glaberrima, 11
 algae-eating, 276–277
 alien plant species removal, 268–269
 alloparental care of younger siblings, 116
Alofu, 64, 126, 149, 152
 M-group alpha male, 259–261, 264
 alpha males, 225–261
 Alofu (M-group), 259–261, 264
 attaining alpha status, 265–267
 Fanana (M-group), 255–260, 264
 Kajugi (M-group), 236, 237, 238
 Kalunde (M-group), 238, 240–261, 264, 265
 Kamemanfu (K-group), 235–236, 237
 Kasonta (K-group), 225, 227, 228–236, 237
 meat sharing, 261–265
 Nsaba (M-group), 248–251, 254, 259, 264
 Ntologi (M-group), 220, 221, 226, 236–241, 246, 264, 265
 options for ex-alpha males, 268
 Pim (M-group), 260–261
 power turnover mechanism, 265–269
 Sankaku (M-group), 236–237
 Sobongo (K-group), 228–236, 237
 why challengers win battles, 267–268
 alpine bamboo (*Arundinaria*), 12
 ant fishing, 277, 278
 learning technique, 93
 tool use, 72–73
Anthonotha sp., 288
 anthropocentrism, 271
 ants
 as food, 71–74
 carpenter ants (*Camponotus* spp.), 71, 72–73, 93
 Crematogaster ant eggs, 96
 Crematogaster spp., 71–72
 local differences in ant eating, 74–75
 Monamorium spp., 78
 Tetramorium spp., 78
 weaver ants (*Oecophylla longinoda*), 74
 weaver ants (*Oecophylla*), 93
Arbotrys monteirode, 35
 Asou, Tamotu, 194
Aspilia leaves
 possible medicinal use, 57–59, 60
 Azuma, Shigeru, 16
 baboons, 29, 60, 148
 babysitters, 116, 147–148
Bakali, 64, 210–211, 239, 240, 241, 259, 265
 banana provisioning, 25–26
 baobab trees, 289

- Baphia capparidifolia*, 35, 57
Baphia sp., 42
 belly slap 273–274
Bembe, 69, 111, 118, 119, 210, 221, 243, 251, 254
Beni, Congo, 3
Bertolani, Paco, 67
B-group, 75, 76
bilia, 2 *See* bonobo
Binti, 119
 bitter food, 53–54
 black kite (*Milvus migrans*), 66
Blepharis sp., 38, 47
 blue duiker, 14, 64, 69, 109
Boesch, Christophe, 63, 84, 89, 163
Bongo, 118
Bonobo (name of male chimpanzee), 111, 123, 221, 259, 260
 bonobo (pygmy chimpanzee), 2, 3, 4–5, 34, 76, 144, 148, 153, 160, 246, 257, 281
Bossou, Guinea, 36, 128, 159, 163, 169
Brachystegia bussei, 47
Brachystegia sp., 42
 bracken fern (*Pteridium aquilinum*), 46
 brush-tailed porcupine, 14
Brutus, 180
Budongo, Uganda, 3, 159, 163
 buffalo bean (*Mucuna* spp.), 162
Bunde, 118
Bunengwa, Hamisi, 252
Bunengwa, Moshi, 177, 240, 250
 bushbuck, 69
 bushpig, 21, 64

Cadmus, 133, 140, 142, 269, 273–274
Caesalpinia sepiaria, 52
Caesar, 151, 273
Calliope, 120
Canarium schweinfurthii, 11
 cane rat, 21
 cannibalism, 193–197
Canthium sp., 44, 46
 capuchin monkey, 270
 carpenter ants (*Camponotus* spp.), 71, 72–73, 93
 carpenter bees (*Xylocopa* sp.), 71
Carter, 260
 charging display, 217–220
Chausiku, 29, 59, 66, 80, 83, 88, 179, 193, 199, 212, 258
 chimpanzee
 distribution of populations, 31
 relationship to humans, 4–6
 taxonomy, 2
 chimpanzee forest
 Mahale Mountains, 8–15
 chimpanzee research
 beginnings of, 3–6
 significance of, 281–283
 Chopin, 179, 199, 221
 Cinnamomum camphora, 52
 Cocos, 192
 co-evolutionary relationship with plants, 44–45
 colobus, 14
 colobus hunting, 40, 42, 60–63, 109, 111
 local differences, 174
 Commelina sp., 59
 communication
 gestural and postural, 150–153
 local differences in, 157
 solicitation of play, 150–153
 vocal communication, 173–174
 community
 loss in human society, 282–283
 significance of chimpanzee research, 282–283
 community conservation
 ecotourism, 285–286
 congregation
 purpose of, 39–41, 129–130
 conservation, 281
 human exploitation of chimpanzees, 289
 human responsibility for, 289–292
 impacts of deforestation, 289
 management of national parks, 286–288
 preservation of the chimpanzee, 289–292
Cordia africana, 35
Cordia millenii, 35, 43, 44
Coriaria japonica, 52
 courtship, 167–173
 idiosyncratic displays, 172
 juvenile or infant males, 173
 leaf-clipping display, 167–169
 locality-specific gestures, 167–173
 shrub-bend display, 169–171
 universal gestures, 167
Crematogaster ant eggs, 96
Crematogaster ants, 71–72, 74
 crested guinea fowl, 14
Croton sp., 288
 crutching behaviour, 88
 culture, 270–280
 algae-eating, 276–277
 anthropocentrism, 271
 belly slap, 273–274
 chimpanzee culture, 270–271
 eating cultivated items, 272
 enculturation versus propagation, 277
 habituation to humans, 271–272

- human and chimpanzee compared, 278–280
- imitation in chimpanzees, 277–278
- imitation in humans, 279–280
- innovations forgotten and rediscovered, 274–275
- innovations that failed to spread, 275–277
- innovations that spread, 271–275
- leaf sponge, 274
- local differences in social behaviour, 157–175
- observational learning, 277–278
- probe to clear blocked nostril, 275–276
- ratchet effect in humans, 280
- reasons for spreading or not, 277–278
- role of instinct, 270
- role of learning, 270
- teaching, 278–279
- water play, 274
- wipe and rub behaviour, 272–273
- culture hunting
 - social behaviour, 163–164
 - social scratch, 164–167
- Cynthia*, 151, 200
- daily activity rhythm, 78–81
- Dart, Raymond, 2
- Darwin*, 113, 125, 260
- Dawkins, Richard, 162
- dead adult leopard carcass
 - response to, 126–128
- death in chimpanzees, 122–124
- deforestation
 - impacts on chimpanzees, 289
- developmental stages
 - adolescence, 86, 111–115
 - adulthood, 86, 120–124
 - ageing, 120–124
 - classification, 86
 - infancy, 86–92
 - juvenility, 86, 108–111
 - learning ant fishing technique, 93
 - learning plant food gathering techniques, 92
 - learning techniques for eating insects, 92–93
 - newborn, 86–88
 - peaceful mother–infant relationship, 88–92
 - sibling relationships, 116–120
 - weaning, 98–108
- diet *See* food
- disease transmission from humans, 283–284
