

The Science of Language

Noam Chomsky is one of the most influential thinkers of our time, yet his views are often misunderstood. In this previously unpublished series of interviews, Chomsky discusses his iconoclastic and important ideas concerning language, human nature, and politics. In dialogue with James McGilvray, Professor of Philosophy at McGill University, Chomsky takes up a wide variety of topics – the nature of language, the philosophies of language and mind, morality and universality, science and common sense, and the evolution of language. McGilvray's extensive commentary helps make this incisive set of interviews accessible to a variety of readers. The volume is essential reading for those involved in the study of language and mind, as well as anyone with an interest in Chomsky's ideas.

NOAM CHOMSKY is Institute Professor (retired) in the Department of Linguistics and Philosophy at the Massachusetts Institute of Technology.

JAMES MCGILVRAY is Professor of Philosophy at McGill University, Montréal.

Contents

Introduction	<i>page</i> 1
Part I The science of language and mind	
1 Language, function, communication: language and the use of language	11
2 On a formal theory of language and its accommodation to biology; the distinctive nature of human concepts	21
3 Representation and computation	31
4 More on human concepts	33
5 Reflections on the study of language	36
6 Parameters, canalization, innateness, Universal Grammar	39
7 Development, master/control genes, etc.	46
8 Perfection and design (interview 20 January 2009)	50
9 Universal Grammar and simplicity	59
10 On the intellectual ailments of some scientists	65
11 The place of language in the mind	69
12 Chomsky’s intellectual contributions	76
13 Simplicity and its role in Chomsky’s work	80
14 Chomsky and Nelson Goodman	86
Part II Human nature and its study	
15 Chomsky on human nature and human understanding	95
16 Human nature and evolution: thoughts on sociobiology and evolutionary psychology	103
	v

vi Contents

17	Human nature again	108
18	Morality and universalization	113
19	Optimism and grounds for it	118
20	Language, agency, common sense, and science	124
21	Philosophers and their roles	129
22	Biophysical limitations on understanding	132
23	Epistemology and biological limits	133
24	Studies of mind and behavior and their limitations	138
25	Linguistics and politics	152

Appendices

<i>I</i>	<i>I-concepts, I-beliefs, and I-language</i>	153
<i>II</i>	<i>The several uses of “function”</i>	157
<i>III</i>	<i>On what is distinctive about human nature (and how to deal with the distinction)</i>	176
<i>IV</i>	<i>Chomsky on natural science</i>	183
<i>V</i>	<i>Of concepts and misguided theories of them, and why human concepts are unique</i>	186
<i>VI</i>	<i>Semantics and how to do it</i>	206
<i>VII</i>	<i>Hierarchy, structure, domination, c-command, etc.</i>	232
<i>VIII</i>	<i>Variation, parameters, and canalization</i>	239
<i>IX</i>	<i>Simplicity</i>	243
<i>X</i>	<i>Hume on the missing shade of blue and related matters</i>	247
<i>XI</i>	<i>Syntax, semantics, pragmatics, non-Chomskyan and Chomskyan</i>	250
<i>XII</i>	<i>An internalist picture of how concepts ‘work’</i>	255
	<i>Commentaries</i>	262
	<i>Glossary</i>	291
	<i>Bibliography</i>	303
	<i>Index</i>	313
