INDEX.

Aberdeen, famine of 1612 30, relapsing fever of 1818 175, typhus of 1838 40 189, 192, relapsing of 1843 264, ratio of enteric in 1864 310, influenza of 1831 370 note, smallpox in 1610 434, menses of 1808 641 2, putrid sore throat in 1790 718, dysentery near 784, cholera in 1832 815
Aberystwyth, cholera in 1849 845
Ackworth bill of mortality 528 note
Acland, Sir H. W., cholera at Oxford in 1854 815 note
Adams, Joseph, cowpox 559, liberty for inoculators 609
Adynamic fever 182
Ague, etymology of, 275, 301, name of typhus in Ireland 301
Agues, epidemic, joined with influenza 300, summary of in 16th and 17th cent. 306 14, of 1678 80 379, in Scotland after the union 341, of 1777 19 341, of 1779 7 366, table of, at Kelso Dispensary 370, of 1826 28 378, of 1827 in Ireland 373, in 1846 47 391, in a Somerset village 393, no record of, during the influenzas of 1890 91 note
Aikin, John, Warrington smallpox 553
Akenhead, Mark, dysentery in London 1762 728, theory of dysentery and rheumatic fever 783
Alderson, John, contagion of typhus 153
Alison, William P., no enteric cases in 1827 187
Althaus, Julius, nervous sequelae of influenza 397 note
Amyand, sergeant-surgeon, inoculations by, 469 70
Andrew, John, formal inoculation 497
Anstruther, enteric fever 1858 39 199
Arbutnot, John, malignant fever in London 67, pestilent air of cities 84, influenza of 1733 347, theory of influenza 303 5
Armagh, smallpox burials at in 1818 572, cholera in a hamlet near 818

Arnot, Hugh, inoculation a complete remedy 516
Arrott, James, fever at Dundee 192 3
Astruc, Jean, history of whooping-cough 666
Asympoma, cholera in 869, 891, dysentery in 787, 791
Aubrey, T., miss mata of Guinea Coast the cause of dengue 474
Aylesbury, gaol typhus 153
Aynho, statistics of smallpox in 1723 530
Ayr, dysentery 787, cholera in 1832 814
Ayrshire, cholera at iron-works 857
Baillou, G. de, first to mention whooping-cough 666
Baker, Sir George, history of cinchona bark 350 note, merits of Talbot 322, epidemic agues of 1780 85 366 7, failure of bark in ditto 368, merits of Jurin 479, Sutton's inoculation 498, cowpox 558, dysentery of 1762 778
Ballard, Edward, occupation of mothers as a cause of infantile diarrhoea 766 note, "healthy" infants have due share of same 768, slight fatality of diarrhoea in adults 769
Banff, inoculation not general 510
Bangor, enteric fever in 1882 220
Barbone, Nicholas, builder in London after the Fire 86
Barcelona, sickness at among the troops in 1705 105
Bard, Samuel, throat-disease in New York 690
Bark, cinchona, use and abuse of in fevers 318 25, failure of in epidemic agues 368
Barker, John, of Sarum, epidemic typhus of 1741 79, 80, 85; Sydenham as philebotomist 450
Barker, John, of Coleshill, type of fever in 1794 157, agues in 1781 367, influenzas of 1788 and 1801 years 370, smallpox a bugbear 517

C. II. 55
Bartholin, Thomas, transplantation of disease 474
Bateman, Thomas, decline of fever 1864–65, epidemic fever of 1816–19 168, cause of differences of type 169, ratio of relapsing cases 172, fatal smallpox in Shoe Lane 247, 268, measles of 1807 65a, dysentery rare 785
Bath, rumour of plague etc. in 1725 34, 458, influenza of 1785 364 note, of 1788 372, of 1803 375, smallpox of 1837 66a, age-incidence of same 694
Beddoes, Thomas, influenza of 1803 375
Belfast, mortality in military hospital 1689–90 234, fatality of fever and dysentery 1846 194, recent enteric fever 299, cholera in 1823 818, in 1849 839, in 1853 4 856
Bent, Thomas, crystalline smallpox at Derby in 1818 577
Berkeley, Bishop, queries on Irish economics 139, dysentery and fever at Cloyne, etc. 1740–41 241–2, tar water in smallpox 546
Berkeley, relapsing fever in 1794–5 186
Berkhamstead, general inoculation at 509
Bernoulli, saving of life by inoculation 629
Bilge-water a cause of ship-fever 165, 166 note
Bideford, incidence of influenza in 1803 376, cholera in 1848 851 note
Bilston, cholera in 1832 824, in 1849 845
Birmingham, scarlatina in 1778 710
Black, William, safety of inoculation 608
Black Assizes at Taunton in 1730 95, alleged at Laurenceston in 1742 95, at the Old Bailey in 1759 92, at Dublin in 1776 98
“Black Death,” Irish name of cerebrospinal fever 863
Black Fever, Irish name of relapsing fever 289
Blackmore, Sir Richard, hysterical or little fever 68, against inoculation 479
Blagden, Charles, matters of influenza 406
Blakiston, Payne, influenza of 1837 287
Blandford, effects of inoculation on smallpox at 513
Boate, Gerard, fluxes and fevers of Ireland 216
Boerhaave, Hermann, antidotes to smallpox 494
Bolton, dysentery in 1832 789
Borrirogen, Lord, Vaccination Bills in 1813 and 1814 509
Borlace, Edmund, dysentery of Ireland 238
Boston, U. S., inoculation 483, 486, smallpox epidemic of 1721 485, tar water in smallpox 546, adult cases in the smallpox of 1721 and 1752 626, throat-distemper of 1735–6 688
Boston, Eng., agues in 1780 367, 368, statistics of smallpox 18th cent. 535, 540, 557
Boulliers, Madame de, smallpox after inoculation 498, 500
Bowel-hive, meaning of 728 note
Boyle, Robert, influenza not due to the weather 399, hypothesis of subterraneous miasmata 400–1, 408, agues rare in Scotland 341
Boyton, Zachiel, inoculations at Boston 483, 485
Brest, malignant typhus in 1727 113
Bridgenorth, epidemic agues in 1784 368
Bright, Richard, enteric fever in London in 1825–6 186
Bristol, fever in 1696 46, types of the fever of 1817–19 173, fever-cases in general wards 179, type of fever in 1834 301, cholera of 1832 818, of 1849 849 note
Bromfield, William, against Sutton's inoculations 499, abandons inoculation 515
Bromley, malignant sore-throat in 1746 696
Brown, Andrew, fevers of the seven ill years in Scotland 48
Browne, Sir Thomas, urn-burial and Norwich churchyards 38
Brownrigg, William, nature of Leyden fever of 1699 19 note, contagion of fever in ships of war 114
Buchanan, Andrew, state of the poor in Glasgow 1830 598, Edinburgh New Town epidemic of 1828 988 note
Buchanan, Sir G., desires definition of “influenza proper” 307 note
Buckie, cholera of 1832 815
Budd, William, epidemic fever of 1839 at North Twon 106
Burial in relation to plague 36–39
Burke, Edmund, death of 1795 158 note
Burns, Robert, distress and fever of 1783 154
Bury St Edmunds, smallpox in 1874 593
Butler, William, infantile remittent fever 7
Buying the smallpox, in Wales 471, in Africa 473, in Poland 473
Caithness, inoculation in 510, 542
Calabria, earthquakes and disease 413, 419
Cambridge, plague of 1666 34 note, gaol fever 96, false rumour of smallpox 458, inoculations near 392
Cameron, James, scarlatina from milk 734 note
Campbell, David, typhus in cotton-mills 151, few children die of typhus 152
Canterbury, smallpox in 1824 581, inoculations 584
Cardiff, diphtheria 743, cholera of 1849 845, 847
Carleton, William, tales of Irish famines, 254 note
Carlisle, typhus in 1781 147, smallpox of infants 558, rate of fatality 555, measles 646, scarlatina 712, 723, cholera of 1832 829
Cambroon, winter cholera in a mining township 837
Carrick, Dr. fevers of Bristol 201
Carter, H. W., smallpox and inoculation at Canterbury 1824 451, 884
Castlebar, gaol-fever in 1847 592
Cats, throat-distemper of in 1798 719
Ceely, Robert, cowpox near Aylesbury 601 and note
Cellar dwellings make typhus in Liverpool 141, in Manchester 149, in Whitehaven 151
Cerebro-spinal fever, question of diagnosis of in Irish epidemic of 1771 247, at Cork and Dublin in 1804 297, two recent periods of 862, statistics of valueless 863, instance of its being overlooked after autopsy and inquest 863
Chalmers, Thomas, state of Glasgow in 1819 599
Chambers, W. F., enteric fever in London 1826 185
Chandler, John, throat-distemper of in 1739 692
Charles II., patronizes Talbot 319, 322, his ague treated by bark 323, his fatal illness 334, visits his mistress after smallpox 454
Charleston, inoculation at in 1738 486, 490, fatal measles 646
Chelmsford, Sutton's trial at 499, 608
Cheshire, epidemic agues 313, 368
Chester, public health in plague-times and after 40-42, typhus among military prisoners in 1716 60, 66, typhus endemic in suburbs 143, smallpox in 1824 436, inoculation 508, 511, 516, smallpox in 1774 537. 544 note, compared with Warrington 551-555, cholera in 1806 857
Cheyne, George, on fevers in 1701 52
Chichester, mild smallpox in 17th cent. 425, smallpox in 1821 581, inoculation and vaccination in 1821-23 591
Children, nervous fever of in 1661 5-8, epidemics among after the Great Plague 18, typhus in 182, 276, 271-2, smallpox of in 17th century 434, 436, alleged mildness of same, 447-2
Cholera, Asiatie, Anglo-Indian writings on before 1831 795, preparations for in 794, diagnosis of from cholera nostras in 1831 795-6, first case of in England 797, the Sunderland epidemic 797-883, extension to the Tyne 803-5, to Scot land 803, the Glasgow epidemic in 1832 808, the Edinburgh epidemic 812, table of the epidemic in Scotland 813, among the fishing population 814, the 1832 epidemic in Ireland 816, table of same 819, the outbreak in London 820, table of 1832 epidemic in England 821, exempted towns 823, Bilton 824, in Liverpool shipping 826, at Manchester 826, exemption of cotton mills 827, micobic hypothesis in 1832 837 note, chief season of 830, season of in Paris 831 note, localities of 830, susceptible persons 831, question of contagion 831, means of transmission 832, sanitary lessons 833, revivals of in 1833-34 and 1837 834
Third epidemic 1853–4: outbreak at Newcastle and Gateshead 849, Commissioners' report on 849, suspected water-supply 850, the epidemic partial in England in 1854 851, table of same and of 1866 epidemic 852, supposed connexion with water in South London 55—2
Index.

853, and in Soho 854, the epidemic in Scotland, 855, in Ireland 856.

In India before 1817 860, causes of endemicity since 1817 861

*Cholera infantum*, see Diarrhoea.

*Cholera nostras*, fatal to adults chiefly in old age 769, historical references to 770, distinction of from bilious colic 771 note; Willis's symptoms of 772, in and near Leeds in 1825 773, diagnosis from Asiatic in 1831 795-6

Christison, Sir Robert, relapsing fever of 1819 774, 775, fever cases in general wards 779, relapsing fever of 1827-29 779, heat of 1826 785, rarity of enteric fever in Edinburgh 1877, relapsing fever of 1842 793, agues at Kelso dispensary 18th cent. 796, ague in 1827 796, dysentery in and near Edinburgh 787, 791

Christleton, village smallpox 56

Churchill, Fleetwood, influenza in Dublin 1847 389

Circassia, procuring of smallpox in 472, Voltaire's legend of 473 note

Clann, W. R., Sunderland cholera 798, 801 note

Clark, John, ship fever 117, Newcastle typhus 142, influenza of 1782 364, agues 369, inoculation of infants 507, scarlet fever of 1778 713, dysentery 784

Clarke, James, typhus at Nottingham in 1807 163, ague in 1808 378 note, gangrene in measles 706

Clayton, M., describes cowpox in the cow 560

Cleggorn, George, influenza in Minorca 384, mild and severe smallpox 547

Clemow, F., origin of influenza in 1889 393 note

Cleveland, miliary fever or scarlatina in 1750 137, 702

Clifton, see Bristol

Clouton, T. S., dysentery in asylum 791

Clowes, William, calls *variola* measles 633

Clowye, dysentery in 1741 241

Clutterback, Henry, exemplary effluvia in houses 87 note, 172

Cobbett, William, the potato in Ireland 285

Cockburn, William, on "little fever" 68, sickness in navy 103

Cockermouth, typhus 114, cholera 846

Coffins, at Tewkesbury to prevent plague 36, supersedes cerecloths 37, advantages of 38, burials without in a Scots parish 51, and in cholera 814 note, 818

Coke family, typhus in 31, 53, smallpox in 435

Cohen, Caddell, throat-distemper in New York 689

Corderidge, S. T., merits of inoculation and vaccination as poetic subjects 588 note

Colic, bilious, distinguished from cholera nostras 771 note

Collieston, cholera of 1832 812, 833 note

Comatose fever, 5, 20, 75

Conmara, famine and fever of 1821-22 268

Constantinople, inoculation at 463-467, 475

Copenhagen, adult smallpox in 1833 612

Cork, types and causes of fever 18th cent. 254-6, state of workhouse in 1846 286, fever of 1846 297, cholera of 1832 816, of 1849 839

Cormack, John Rose, relapsing fever 204

Cotton mills, typhus in 154, effects of on married women 727, adverse to cholera 817

Country disease, name of dysentery in Ireland 256-7

Coventry, infantile diarrhoea 765 and note

Covey, John, formal inoculation 205

Cowman, Robert, Glasow typhus 191, little smallpox among Irish adults 691

Cowpox, matter from used to inoculate with 528, Jenner's advocacy of 528, its properties used by Adams to illustrate phagedena 529, accounts of by Jenner, Pearson and Clayton 560, circumstances of its origin in a cow 661, case of in a milkmaid 561, obsolete opinions concerning 562, called by Jenner "smallpox of the cow" 563, attempts to manufacture it out of smallpox 564, see also Vaccination

Cox, Daniel, fever of 1741 83 note

Craigie, David, Edinburgh enteric fever 187, cholera at Newburn 1832 844, at Edinburgh 812, history of cholera 860 note

Cromarty, cholera of 1832 814

Cromwell, Oliver, dies of epidemic ague 303

Crook, John, sells bark in 1689 290

Crookshank, Edgar, describes cowpox 561 note, witnesses contamination of milk 735
Index

Dogs attacked by influenza 354, 361, 371 note, 372, 398
Donoughmore, fever in 1826 277
Dorset, epidemic ague in 1780 269
Douglas, James, post-mortem on case of fever 55
Dover, Thomas, fever at Bristol 1666 46, agues in Glo’steshire 74, treated for smallpox by Sydenham 46 note, his success in smallpox in 1730 449, mildness of measles 641 note
Drage, William, epidemic agues of 1638 315, transplantation of agues 474 note, incubation of measles 655 note
Drogheda, dysentery at siege of, in 1649 237, cholera in 1832 88, in 1849 839
Drunkenness in London 18th cent. 84

Industrial Revolution, the, 145
Influenza Remittent Fever 5–8
Influenza, historically mixed with epidemic ague 300, probable etymology of 304, names of before 1743 305, retrospective of influenza to 1650 306–313, influenza of 1675 326, of 1679 328, of 1688 335, of 1693 337, of 1712 339, of 1729 345, probable in 1728 346, of 1733 346, of 1727 348, of 1743 349, of 1728 353, of 1729 in Peru 354, of 1762 356, of 1757 358, of 1775 359, of 1782 363, of 1788 376, of 1805 374, of 1831 359, of 1833 386, of 1837 389, of 1847–48 390, minor epidemics 391, of 1889–94 393, antiquity and sameness of 398, views of Willis and Sydenham 399, miastmatic hypothesis of Boyle 399–402, theory of Arbuthnot 401, theory of Noah Webster 405, a phenomenal cause needed 407, relation to epidemic agues 409, the epidemic of 1761 at Barbados and the earthquake 409, the earthquake of Lisbon and influenza 411, earthquakes and the influenza of 1753 413, miastmatic sickness following earthquakes in Jamaica 415, in Amboina 418 note, and in Sicily 419, possible
sources of miasmas of influenza in 1693 420, epidemic of 1688 and the earthquake of Lima 421, possible sources of American epidemic in 1720, direction in which the true theory lies 426, outbreaks at sea 425-431, strange 433. See also Hales.

Intermittent Fevers, Sydenham's view of 11, in Ireland after the relapsing fever of 1826 573, and of 1847-9 591. See also Ague.

Inverness, typhus at 110, cholera of 1832 814, of 1849 838.

Ipswich, ship typhus at 110, scarlatina in 1771 708.

Jamaica, sickness after earthquake 416.

Jenner, Edward, relapsing fever in his house 156, inoculates with crude matter 501, collects failures of inoculation 515, inoculates with swinepox 558, proposes to inoculate with cowpox 558, indicates umberous characters of cowpox 566, his opinion on origin of smallpox and cow- pox 561, calls cowpox varicela vaccine 563, tests the virtue of cowpox 565, makes interest with the great 566, demands prohibition of inoculation 609, opposes Watt's doctrine of measles 607.

Jenner, J. C., epidemic ague in 1784 369.

general inoculation 509, why smallpox malignant 550.

Jesty, Benjamin, inoculates with cowpox 558.

Johnstone, James, Kidderminster fevers 1753-56 124, sequelae of measles 660 note, sore-throat and fever 701, 704, the scarlet eruption, 710.

Johnstone, James, junior, dies of gaol fever 153, writes on the scarlatina of 1778 710.

Jolly rant, name of influenza in 1675 327 note, 328.

Jones, Jane, fevers of the Greeks not in our climate 301, agues of 1528 307.

Jones, John, dysentery in Wales 272.

Jurin, James, arguments for inoculation 479, his authority 480, biographical sketch of 481 note.

Kanturk, incidents at in famine of 1818 365.

Katharine, Queen of Charles II., her fever in 1663 13.

Kell, John Butler, cholera at Sunderland 1831 798.

Kelway, Simon, measles and smallpox 633.

Kelso, agues in 18th cent. 600, cholera in 1848-9 838.

Kennel, vaccination 1819-21 684.

Kennedy, Henry, type of Dublin fever in 1847 589, in 1862 596.

Kennedy, Peter, inoculation at Constantine 464, procuring smallpox in Scotland 471.

Kerr, George, fever in Aberdeen 176.

Kidderminster, fevers in 1727-29 134 note, in 1751-56 124, sequelae of measles 660, sore-throat and fever in 1748 701, 704, in 1778 710.

Kilgour, Alexander, typhus one of the exanthemata 189, ratio of spotted cases 103.

Kilkenney, sickness in 1846 582.

Kilmarnock, 18th cent. smallpox 536, cholera of 1832 814, of 1849 838.

Kiltarn, paupers in 1695 51 note, smallpox in 18th cent. 541.

Kingsley, Charles, cholera of 1854 851 note.

Kinc, old name of whooping-cough 666.

Kirkmaiden, smallpox and fever in 18th cent. 548.

Kirkpatrick, or Kilpatrick, J., inoculates at Charleston 96, in London 491, 493.

Kite, Charles, second inoculations 503, failures of inoculation 515.
La Condamine, M. de, case of Timion’s daughter 488 note, advocates inoculation 494, estimates saving of life by same 516
La Motraye, M. de, procuring smallpox in Circassia 472
Lamport, fever in Hampshire 1680 51, his success in smallpox 453
Lamprey, Jones, types of famine sickness in Skirl 1846 287, 288
Lancaster, typhus in 1792 151
Langton, William, opposes formal inoculation 500
Lansdowne, Marquis of, inoculation and vaccination 666, 667
Launceston, gaol typhus 93, 97, diphtheria 740
Laurie, J. S., claim, statistics of Glasgow cholera hospital in 1832 811
Laycock, Thomas, influenza at York 389 note
le Cat, Claude Nicolas, the Rouen fever of 1753 121
Leith, cholera of 1832 844, of 1848 836
Lettsom, John Conkleley, gaol fever 97, London fevers in 1773 135, inoculation of infants 557, general inoculation at Ware 441, London smallpox more than in the Bills 534, smallpox in 1808 570, inoculation not contagious 608, saving of life in typhus 628, scarlatina in 1793 718
Levett, Robert, amateur in medicine 134
Levison, George, scarlatina in 1777 708
Leyburn, fever in 1813 167
Lind, James, desires history of British fevers 11, ventilation of gaols 95, ship fever 111, Sutton’s pipes 119, smallpox in the ‘Royal George’ 543, cholera nostras at Portsmouth 772
Linnæus, Carolus, as nosologist 670
Lipcombe, Dr., his prize poem on Inoculation 588
Lisbon, ship fever at 105
Liskeard, diphtheria in 1748 694
Liverpool, typhus in 18th cent. 140, enteric in 1836 201, the Irish fever of 1847 206, recent typhus 214, influenza atmosphere in 1837 388, general inoculations 504, 508, 511, 18th cent. smallpox 537, age-incidence of same in 1837 624, diarrhoea 765, dysentery in the Irish fever 790, cholera of 1835 826, of 1849 847, of 1824 841, of 1866 857
Livingston, Dr., Aberdeen sore-throat in 1790 718, dysentery in 1798 784
Lombard, H. C., enteric fever in Britain 188 note, 201
London, Asiatic cholera of 1832 820, of 1833 834, supposed in 1837 855, epidemic of 1849–9 841, 847, of 1854 853, of 1866 857
London, cholera nostras in, in Sydenham’s time 769, every autumn 770, in 1699–70 771, described by Willis 777, London, diphtheria in 741–2
London, dysentery in, of names in the Bills 774, symptoms of in 1669 776, epidemic of 1761 779, of 1779–81 783
London, fever in, endemic 13, in Sydenham’s time 18–22, epidemic of 1805–6 22, identified as typhus 27, statistics of at end of 17th cent. 43, epidemic of 1694 45, statistics of 1701–20 54, epidemic of 1709–10 54, 57, sample case of 55, a case of relapsing in 1710 57, epidemic of 1714 59, in 1718 64, statistics of 1724–50 63, weekly maxima 1726–30, hysterical or little 67, relapsing 69, identified as enteric 79, epidemic typhus of 1744–47 78–81, in Marshalsea prison 91, at Old Bailey in 1750 93, in gaols 97, slow remittent of 1751–55 122, typhus from 1770 to 1800 133–140, localities of 140 note, hospital for in 1801 160, slight prevalence of from 1803 to 1816 163, possible enteric cases in 1808 165, epidemic of 1816–19 168, bred by insanitary state of houses 170, relapsing in 1817 172, cases of mixed in general hospitals 175, relapsing in 1826–28 181, enteric in 1826 183, change of type to spotted 188, purely typhus in 1837–38 194, epidemic typhus of 1847 206, in part relapsing 208, relapsing in 1808 211, ratios of typhus and enteric at Fever Hospital 213, season of enteric 217
London, Fire of, supposed effect on plague 43
London, infantile diarrhoea in, entered as ‘grunting in the guts’ 747, Harris on in 1689 749, weekly bills of in 17th cent. 750, 751, 753, annual deaths 1667–1720 753, some 18th cent. weekly bills 754 755, conditions favouring 755, 19 cent. statistics 759–60, recent death-rates moderate 761, reasons of greater fatality in former times 765
London influenza weekly mortalities, of
1580 310, of 1672 326, of 1679 379, of 1688 336, of 1693 338, of 1729 343, of 1732 and 1737 349 of 1743 350, of 1762 377, of 1765 399 note, of 1782 363, of 1803 375, of 1831 379, of 1853 380, of 1857 384, of 1897 390, of 1900- 

London, smallpox, in deaths from in 17th cent. 634, 655, 660, epidemic of 1670 623, epidemic of 1674 656, indirect effects of same contrasted with those of smallpox 628-9, deaths from in 18th cent. 641, 643, epidemic of 1705-6 641, fatalities one-tenth of those of smallpox 644, ratio of to all deaths 647, epidemic of 1807-8 650-1, compared with Glasgow 652, deaths from 1813 to 1837 660, in 1837-39 661, two seasonal maxima 664

London, sanitary state of under George II. 84, improvement in after 1756 133, of workmen’s houses in 1819 170

London, scarlatina or diphtheria in, Morton’s cases 681, cases 1739 692, Foolsey’s cases 696, Fordsyce’s cases 707, Leverton’s cases 708, Sims’ cases 713, Willan’s cases 714, in 1796-1802 719, Bateman’s notes of 727, mild in 1822 733, recent range of fatal 730, fatalities in home and in hospital 739, seasonal maximum 731

London, smallpox of 1628 in 435, annual deaths 1635-61 436-437, epidemic of 1641 437, after the Restoration 437, ratio of adult cases 17th cent. 444, mild type in 1667-9 452, compared with that of 1711 453, estimate of proportion of faces marked by 454, epidemic of 1694-458, of 1710 461, annual deaths 1701-20 461, private hospitals for 463, public hospital for 502, 533, prevalence in middle of 18th cent. 539, table of weekly deaths in 1725 531, smaller mortality of infants from than in in provincial towns 534, annual deaths 1761-1800 536, in the Foundling Hospital 550, annual deaths 1801-37 568, epidemic of 1817-18 580, in Christ’s Hospital in 1818 581, epidemic of 1815 593, annual deaths 1837-1839 613, excessive incidence of from 1871 to 1885 616, age, sex and fatality of in epidemic 1871-72 618, varying fatality of from 1871 to 1893 619, fatality at each age-period in 1893 619, ages at death from in 1848 624

London, whooping-cough, ratio of to all deaths 1731-1831 647, annual mortality 1701-1750 669, same from 1783 to 1812 665

Londonderry, sickness in siege of 229, cholera in 1834 818

Louis, P. Ch, As. A. fierve typhoide 196 note
Lower, Richard, against bark in fever 333, his advice to Queen Mary 459
Lucas, James, typhus in Leeds 466, smallpox and inoculation 510, 555
Lucretius, air-borne infection 408
Lynn, smallpox in 1807 449, smallpox in 1710-14 462
Macaulay, Lord, on the Soho plague-pit 38, eloquent on smallpox 454, on the death of Queen Mary 460 note
McCarthy, Alexander, state of Skibbereen in 1846 274
Maidstone, gaol fever at 153, diphtheria and ground-water 744
Maitland, Charles, inoculation 467-71
Mallet, Mr, catalogue of earthquakes 407
Malthus, T. R., population and potatoes 253, 284, 285 note, one infection will replace another 639
Manchester, military fever becomes rare 131, increase of population 146, typhus in end of 18th cent. 149, statistics of fever hospital 164, distress and typhus 1839-41 197, amount of enteric fever in 1836 201, typhus in 1847-57, in 1865-3 209, smallpox in 18th cent. 536, extent of early vaccination 538, mortality by smallpox in 1826 593, measles in 18th cent. 644, scarlatina in 1805 733, cholera nostras in 1839 773, cholera in 1838 826, in 1849 846
Manningham, Sir Richard, on “little” or hysterical fever 70
Mapletoft, Dr, his experience of smallpox 546
Mary, Queen of William III, dies of smallpox 459
Marsh fever, distinct from epidemic ague 302, 367, 369
Marshalsea prison, state of in 1739 91
Mason, Simon, on aqua-curae 325
Massey, Isaac, smallpox seldom fatal in schoolboys 545
Mather, Cotton, instigates to inoculation 495
Maty, M. defends Gatti’s inoculations 496, proposes general inoculation of infants 666
May, William, fever and influenza in Cornwall 373
Mead, Richard, the Dunkirk rant 340, no failures of inoculation 487, 488
Measles, etymology of 632, variolae translated by 633, in 17th cent. 634, 640, Sydenham on 635, indirect mortality from in 1674 636, in 18th cent. 641, at Manchester 644, at Northampton 645, in the Foundling Hospital 646, increased fatality at end of 18 cent.
Index

647, anomalous at Uxbridge 649, the great epidemic of 1827–8 651, the epidemic in Glasgow 652, comparison of in London and Glasgow 655, Watt's doctrine of substitution 655–7, reception of same 657, sequelae of 659, recent statistics of 666, recent highest death-rates from 663, progression of epidemics 665, season of 664, age-incidence of 664, an illustrative epidemic of 669.

Methyr Tydfil, enteric fever 219, cholera in 1849 845–6, 847, in 1854 851, in 1866 857.

Miasmatic infection, Sydenham's and Boyle's doctrine of 29, 400, of enteric fever 227–3, of endemic ague 302, of influenza in 401–2, after earthquakes 413–20, of dengue 424, not excluded in scarlatina 732, of diphtheria 745, of dysentery 788, of cholera 842.

Middleborough, enteric fever 221.

Millary fever, 72, 76, 114, 127, 128–131

Milk, a vehicle of enteric fever 222, of scarlatina 734, of diphtheria 745.

Millar, Dr., isolation of fever patients 178.

Miller, Hugh, Crompton cholera 814.

Mode, the influenza of 1688 356, of 1693 373.

Moorca, localized influenza of 1748 355, mild and severe smallpox 647.

Population, increase of North of Trent 144, in Ireland 150, after potato famine 283, principle of 637
Port Royal, earthquake of 1692 415
Potterton, H., dysentery in crews in 1666 104, ship fever in 1779 116, influenza in new arrivals in 1788 372, agues and fluxes 771
Pose, old name of influenza or catarrh 305 note, 308 note
Potatoes, in Ireland 241, 252, 284
Preston, infantile diarrhoea 765, suffers little from cholera 813
Prices, in 18th cent. 57, 131, in 1801 150, in second half of French war 162, 258–7, effects of fall of in Ireland 560
Prichard, J. C., Bristol fever 1817–19 173, cases not isolated 179
Pringle, Sir John, ventilation of Newgate 94, war dysentery and typhus 108–10, nosology of continued fevers 130, improved state of London 135, little smallpox in campaigns 445, dysentery rarely epidemic in London 779 note
Prisons, state of early in 18th cent. 90–92, Howard’s visitations of 95, Lettou’s cases of fever in 97, fever in 1788–88 153, little smallpox in 544, Nell’s reforms of 618
Putney, M. Blandford smallpox 513
Purples, meaning of 680
Putrid fever, in the sense of Willis 16, in 18th century sense 130–8, 139–30, 683, 700
Putrid measles 705
Pylarini, Jacob, on transplantation of smallpox 405, 476
Quarantine, for plague pressed on the Ministry by Swift 58 note, in the cholera of 1831–32 754, 798, 799, 814, 820
Queensferry, North, vaccinations during an epidemic 588
Radcliffe, John, attends Queen Mary in smallpox 450 note
Ranby, John, his pamphlet against Jurin 481 note, his inoculation practice 504
Reid, John, enteric fever at Edinburgh 199
Reid, Seaton, relapsing synocha 177
Remittent fever, 68, 69 note, 72, in London in 1755–56 121, Cormack on 393 note
Reynolds, Revell, epidemic agues of 1780 566
Rhenmatic fever, its relation to dysentery 792
Rickets in London 18th cent. 766, relation to of infantile diarrhoea 766
Rigby, Edward, vaccinations at Norwich 584
Ripon, fever at in 1726–28 72
Robertson, John, vaccination at Manchester 583, smallpox after vaccination 597 note, measles in Edinburgh 1808 611, criticism of Watt 628
Robertson, Robert, ship fever 114, influenza of 1782 in the fleet 416, no fatalities in smallpox 546
Rochdale, fever of 1818 171
Rogan, Francis, slaughter-houses not noxious 236 note, population in Tyrone 1817 253, cottiers in same 255, famine of 1817 257, dysentery and fever of 1788–89 253, smallpox in same 255, in the famine of 1817 257
Rogers, James E. Thorold, starvation wages 18th cent. 61, Malthus and high standard of living 85 note
Rogers, Joseph, criticism of Sydenham 16, epidemic in Wadhams College 59, fevers in Cork 18th cent. 234
Roeoola, epidemic, supposed the scarlatina of Sydenham 681
Ronen, epidemic fever of 1753–4 131
Royston, William, epidemic agues of 1780 and 1808 378 note
Rowney, Henry, epidemic sore-throat in Chesham 715, “the croup” in the same 716
Rush, Benjamin, smallpox after inoculation 488, infantile diarrhoea 738
Russell, Lord John, cost of Irish potato famine 282
Russell, James B., scarlatina from cows’ milk 734 note
Ruston, Thomas, antitoxis to smallpox 494 note
Rutty, John, “putrid” fevers in Dublin 137, 245, nervous and relapsing fevers 239, 240, 243, famine fever of 1740 244, agues and horse-colds 354, smallpox in Ireland 543, malignant during typhus 549, throat-dis TEMPER of 1743 693
Ryan, Dennis, dysentery in transports 784
Index.
