INDEX

Abelson, 10
Abilities, 292 ff.; factors in, 9; in assembling work, 100 ff.; measurable, 74; relations between, 3
Ability, and improbability, 147; individual differences, 119; initial, see initial ability; measurement of, 5, 90; and progress, 152; schoolboys and adults, 154 ff.; terminal, see terminal ability; total, see total ability; training effect on, 167; and variability, 157
Accuracy, of measurement, 17, 25, see also reliability; of movement, 8
Activation of fingers, 225
Active search, 190
Activities, in mechanical assembling, 178 ff.; in routine assembling, 210 ff.
Adults, compared with schoolboys, 154 ff.; practice curves, 107–30; subjects, 26, 36
Akroyd, 3
Alternative procedures in mechanical assembling, 192
Analysis, of assembling work, 100 ff.; chemical, 9; factors in, 68; into factors, 237; into measurable abilities, 74; of mechanical assembling, 18, 50–4, 63, 65–76, 178–206; objective, 49–59, see also objective analysis; of practice curves, 107–40; of routine assembling, 19, 54–66, 77–90, 96, 210–30; of simple manual tests, 96–9; subjective, 178–230, see also subjective analysis; subjects for, 36–7; ultimate, 9, 68; of vocations, 68; weakness in, 10
Anticipatory, characters, 230; knowledge, 218
Apprehension, 194, 197; of attributes in mechanical assembling, 184, 186; of characters of movements, 220; psychological conditions for, 198; of shape, 198, 205, 207
Aptitude, mechanical, see mechanical aptitude; special, 237
Arithmetic, inter-correlations, 62
Assembling, 2, 8, 9, 15, 16; analysis of, 100; compared with stripping, 57 ff., 77, 81 ff.; curves compared with stripping, 198, 194; of electric lampholder, 15, 26; in industry, 17; material illustrated, 51; measurement of, 100 ff.; mechanical, see mechanical assembling; routine, see routine assembling
Attention, direction of, 198
Backward girls, 60, 78; correlation, 62; development, 106; group-factor, 79; measurement of, 60 ff.; norms, 104
Bagley, 10
Bead threading, see simple manual tests
Bickersteth, 10
Binet, 10
Body movements, 4
Bolton, 10
Book, 6
Burt, 10
Characters, 194; anticipatory, 230; correlative, 206; of efforts and movements, 215 ff.; of forces, 224; in mechanical assembling, 197, 204; in routine assembling, 215
Children, appreciation of design, 208; creation, 208; designs, 199, 208
Clariication of thought, 189
Clark, 10
Classification, of engineering occupations, 101; of manual operations, 1, 11
Coefficient, correlation, 28; partial correlation, 29; reliability, 27; validity, 101; see also inter-correlation
Cognitive operations, in general intelligence, 20; meaning of terms, 194 ff.; in mechanical assembling, 197–209; in routine assembling, 20, 218–30
Common sense, 9
Complex movements, 6; operations, 8
Complexity, influence of, 42
Composite curves, assembling, 123 ff.; stripping, 127 ff.
Container test, described, 51, 58; initial ability curves, 129, 144; practice curves, 113, 125, 129, 135, 154, 156, 173, 174; see also mechanical and routine tests
Control subjects, need for, 22; procedure, 25
Correlates, education of, 196, 206
Correlation, interpretation of, 8; see also inter-correlation
Correlative space relations, 206
Cox, 5, 28, 57, 71, 75, 101, 232, 236, 241
Criterion, of ability, 100; of general factor, 69; of group-factor, 69; tetrad-difference, 69
Curves, of initial ability, see initial ability curves; of practice, see practice curves; of terminal ability, see terminal ability curves; of training, see training curves
INDEX

Dart throwing, 7
Data, collected, 25 ff.; treatment of, 27
Development, of manual skill, 6, 238–40; see also practice curves; norms, 104; of thought, 188
Dexterity, see manual dexterity
Diagram, of assembling material, 51; of children’s drawings, 200, 202, 203, 208; of mental processes, 197
Disintegration, functional, 205
Drawing, 8; of children, 200, 202 ff., 208
Drill, 25, 58
Dynamic functions, 18, 107 ff.; relations between, 29, 147–61
Earle, 3
Education, manual training in, 2
Educational guidance, 237
Education, of correlates, 196, 206; of relations, 195, 204, 205; of spatial characters, 219
Effects of practice, 6; see also practice curves and practice effects
Effort, characters of, 216
English, 10
English, inter-correlations, 61, 62
Errors in measurement, 5; see also reliability
Estimates, of incentive, 39; of intelligence, 38; reliability, 45, 47
Experimental method, 9; procedure, 52 ff.
Factor, analysis, 68; defined, 18; distinguished from function, 17; general, see general factor; group, see group-factor
Factors, as elements, 9; in mechanical assembling, 68–76; in motor performances, 4, 9; in routine assembling, 77–93; in simple operations, 3, 96–9; in skilful movement, 216; in static functions, 28; summarized, 235; see also analysis of routine assembling and of mechanical assembling
Failure, sources of, 212; see also subjective analysis
Farmer, 3
Fingers, activation of, 228; efforts and movements, 225; mechanical arrangements; 220; movements of, 217; as tools, 227
Fischer, 10
Forces, knowledge of, 214
Freeman, 10, 13
Function, defined, 17; distinguished from factor, 17
Functional, disintegration, 205; relations, 8, 186; selection, 209
Functions, dynamic, 18; measurement of, 23; in mechanical tests, 49–54, 63–7; in routine tests, 54–67; static, 18
Fundaments, 195
‘g’, see general factor
Games, 25, 38
Garfield, 4, 6, 12
Gates, 6, 7, 13
Gaw, 3
General factor, 4, 19 ff.; 232, 235; criterion, 69; in mechanical tests, 52, 73, 74 ff.; in routine tests, 80, 91, 96
General intelligence, 9; data, 25; see also general factor and intelligence
General summary, 231–42
Gesell, 10
Gilbert, 10
Girls, backward, see backward girls
Glenn, 10
Goodenough, 13
Group-factor, criterion, 69; in mechanical tests, 52, 67, 70 ff., 84 ff.; in routine tests, 67, 77 ff., 84 ff., 91; in simple tests, 96, 99; summarized, 235 ff.
Hand and eye co-ordination tests, 3
Hand-work compared with routine assembling, 61, 62, 67
Harter, 6
Ideal curve, 108, 113
Improvability, 18; and ability, 147 ff.; absolute, 147; adults compared with schoolboys, 157; effect of training, 168; and intelligence, 159; percentage, 147; and variability, 157; see also ability
Improvement, measurement of, 168; relative rates of, 171
Incentive, and energy, 39; estimates of, 39; and intelligence, 56; and routine tests, 56, 67; and will, 39
Individual practice curves, adults, 107–22; schoolboys, 150–4
Initial ability, 6; curves of, 128 ff., 143 ff., 165, 169; and improvability, 147; at mechanical assembling, 82; at routine assembling, 34; as static function, 18; and terminal ability, 189; see also ability and initial measures
Initial measures, inter-correlations, 57
Initial phase, in practice curves, 110, 112, 118
Intelligence, estimates, 38; and improvability, 159; rôle in training, 174; see also intelligence tests and general factor
Intelligence tests, 4, 17, 25; correlation with incentive, 56; correlation with mechanical
INDEX

245
tests, 51 ff.; correlation with routine
tests, 57 ff.; reliability, 45; subjects, 37; see also general factor and intelligence
Inter-correlation, of mechanical tests, 51,
55; of mechanical with routine tests, 64,
65, 87; of routine tests, 55, 57, 58, 60,
61, 62; of routine and simple tests, 98
Introspections, 24; method, 178
Introspective analysis, see subjective analysis
Judd, 7
Kirkpatrick, 10
Knowledge of efforts, 225; of finger move-
ments, 226; of forces, 214; influence of,
in mechanical assembling tests, 49 ff.; of
movements, 210 ff.; of signals, 218; see also cognitive operations
Learning, motor, 13; non-motor elements
in, 6; phases in, 110, 112, 119; and
re-learning, 110; transfer, 118; see also practice and training
Limb movements, 4
'm', see mechanical factor
McDougall-Schuster dotting test, 3
Major conclusions, 231 ff.
Manual activities, see manual operations
Manual dexterity, 5, 11; measurement of,
5; see also manual operations and manual skill
Manual factor, see routine assembling factor
Manual operations, classes of, 2; in educa-
tion, 2; general character, 15 ff.; im-
portance and variety, 1 ff.; in industry, 1;
relations between, 8, see also objective analysis; subjective analysis, criticized, 10;
see also subjective analysis of me-
chanical and of routine assembling; see also manual dexterity, manual skill and manual work
Manual skill, criteria, 2; development of,
6, 176, 238–40, see also practice and training; mental processes in, 241; organiza-
tion of, 8; transfer of, 7, 141 ff., 162 ff.,
238; see also manual dexterity, manual operations and manual work
Manual training, in education, 2; in in-
dustry, 176; methods, 6, 176, 239 ff.; see also practice, training and transfer
Manual work, 30; mental activity in, 210;
see also manual dexterity and manual skill
Measurement, of ability, 5, 90; of backward
girls, 60 ff.; of dynamic functions, 23;
effect of complexity and repetition, 42;
errors in, 5; see also reliability; of
functions, 23; of improvement, 163; of
manual dexterities, 5; of mechanical
aptitude, 182; of mechanical factor, 76;
mental, 238; of motor operations, 47;
practical requirements, 102; random
errors, 42 ff.; reliability of, 238, see also
reliability; of routine assembling, 182;
of static functions, 23; of variability, 46
Measures, of intelligence, 37; of mechanical
aptitude, 57; trustworthiness of, 27; see also estimates and tests
Mechanical aptitude, 19, 28, 37, 59, 101;
compared with intelligence, 50 ff.; com-
pared with mechanical assembling, 50 ff.;
compared with routine assembling, 63 ff.,
84 ff.; 102; correlation with 'g', 51, 53;
data, 25; factors summarized, 235; group-
factor in, 70; reliability of tests, 46;
saturation with 'm', 74; tests of, 16
Mechanical assembling, cognitive proce-
desses, 194–209; data, 25; defined, 8, 16;
factors in, 68–76, summarized, 235;
functions in, 18 ff.; and mental develop-
ment, 105; nature of, 183; objective
analysis, 74–86; saturation with 'g', 51,
53, 72 saturation with 'm', 78; sub-
jective analysis, 178–209; see also mechanical assembling
Mechanical assembling tests, 26, 30;
compared with intelligence, 50 ff., 66;
compared with one another, 50 ff.; com-
pared with routine assembling tests, 63–65, 102;
correlations with routine tests, 64–5, 84;
influence of knowledge and interest, 49;
inter-correlation tables, 51–4, 73; pro-
cedure, 52; saturation with 'g', 51, 53, 72;
saturation with 'm', 73; see also mechanical assembling
Mechanical characters, 217
Mechanical factor, 232, 235, 236; differen-
tiated from routine factor, 86; relation to
mechanical assembling, 46
Mechanical interests, 25
Mechanical relations, 186
Mental activity, in mechanical assembling,
178–209; in routine assembling, 210–
30
Mental construction, 208
Mental development, 105
Mental measurement, 232, 236; see also
measurement
Mental organization, 231; theories, 236
Mental processes in manual skill, 241; see also analysis
Monday effect, 110
INDEX

Movement, accuracy of, 8; characters of, 210, 217, 219; speed of, 6; see also subjective analysis
Myers, 7, 8, 162, 201

National Institute of Industrial Psychology, 5, 49
Norms, 103

Objective analysis, 8 ff.; of mechanical assembling, 18, 49–54, 63–7, 68–76; of routine assembling, 54–67, 77–94, 94–9
Operations investigated, 26; see also mechanical assembling, mental operations and routine assembling
Organization, of assembling work, 100–2, 231–8; of manual skill, 8, 231, see also objective analysis; of mind, 231, 236

Packing, 2
Painting, 8
Pear, 13
Perrin, 8, 10
Phases in practice curves, 112
Plastic arts, 8
Plateaux, 113, 116
Porcelain test, described, 31, 33; initial ability, 129, 148, 165, 169; practice curves, 110, 129, 129, 133, 155, 143, 154, 156; terminal ability, 143, 165, 169; see also mechanical and routine tests
Practice curves, 29; composite adult, 122–30; composite boys, 154–9; ideal type, 108; individual adult, 107–22; individual boys, 130–4; phases in, 112; plateaux, 113, 116
Practice, distinguished from training, 162; effect on ability, 21; see also practice curves; effect on reliability, 47; procedure, 34

Practice effects, 6, 238; transfer of, 29, 163, 259
Practice groups, 34 ff.
Previous research, 2–5
Procedure, for mechanical assembling, 52–8; for routine assembling, 34–6
Programme of research, 35–30
Purposive activity, 187, 209
Pyle, 7

Random errors, 42 ff.
Range, of operations, 26; of subjects, 26
Rao, 4
Rate of progress, 147–56; see also practice curves
Reaction-time experiments, 4

Regulation and control of energy, 40
Relations, between abilities, 3; between dynamic functions, 29, 147–61; between factors, 68–9; between static functions, 28, 49–67; correlative, 206; eduction of, 195, 204; functional, 8, 186; in mechanical assembling processes, 205
Reliability, 5, 41–8; influence of complexity, 42; influence of practice, 27, 42, 47 ff.; influence of random errors, 42; influence of repetition, 42, 43; of intelligence tests, 45; of mechanical tests, 46; of routine tests, 41–5
Reproductive processes, 197, 209, 219
Reynert, 4
Ring test, see simple manual tests
Routine assembling, cognitive processes, 20, 218–30; data, 25; defined, 8; distinguished from mechanical assembling, 16; factors, 77–93, 96, summarized, 255; functions, 19, 54–67; improbability, 147 ff.; measures of, 19; and mental development, 3; objective analysis, 77–99; practice curves, 107–40; subjective analysis, 210–30; test procedure, 35; variability, 157
Routine assembling factor, 77–83, 96; relation to mechanical factor, 84–95; in simple tests, 96
Routine assembling tests, compared with incentive, 56; compared with intelligence, 56 ff., 66; compared with mechanical tests, 63–7, 84–93, 102; compared with one another, 54 ff., 77 ff., 96 ff.; compared with stripping, 81 ff., 96; correlations with mechanical tests, 64–5, 87; correlations with simple tests, 98; described, 26, 33–4; inter-correlation tables, 55–62, 79–80, 98; procedure, 34–6
Ruediger, 7
Saturation coefficients, ‘g’, 51, 53, 72, 91; ‘m’, 73, 75; routine factor, 79, 92; summary, 235
School subjects, 25; ability at, 38; inter-correlations, 61, 62
Schoolboys, compared with adults, 134 ff.; practice curves, 130–40
Screw test, adult practice curves, 108, 124, 129, 154, 156; described, 38; initial ability curves, 129, 143, 165, 169; procedure, 34–6; schoolboy practice curves, 131, 135; terminal ability, 145, 165, 169; see also routine assembling tests
Selection, of workers, 4; functional, 209
Sensory-motor tests, 3
Sex differences, 103
INDEX

Shape, apprehension of, 198 ff., 205, 207; disintegration, 205; of movement, 211
Signals, 213, 214, 217, 221
Simple manual tests, 2, 8, 16; correlation coefficients, 98; described, 95; group-factors, 96-9; objective analysis, 96 ff.; specific factors, 97
Simple movements, 6
Simultaneous activities, 8
Skilful movement, factors in, 216
Soap wrapping, 11
Sources of failure, 212
Spatial characters, education of, 219; of movements, 210
Spearman, 4, 28, 69, 73, 96
Special aptitude, 237
Specific correlation, in mechanical tests, 75, 87; in routine tests, 79, 80, 87
Specific factors, in mechanical tests, 74; in routine tests, 93; in simple tests, 97
Speed of movement, 8
Speed tests, 10
Squire, 7
Star puzzle test, 38; inter-correlations, 54
Static functions, 18; problems in, 28; relations between, 28, 49-67, 94-9; reliability, 41-8
Stripping tests, 26; compared with assembling, 57 ff., 79 ff.; compared with mechanical tests, 89 ff.; group-factor in, 81, 89, 96; inter-correlations, 57-62; procedure, 34; see also routine assembling tests
Subjective analysis, 10; criticized, 11 ff.; meaning of terms, 194; of mechanical assembling, 178-209; of routine assembling, 210-30; significance, 236
Subjective characters, in efforts and movements, 217
Subjects, adults, 26; for analysis and practice, 36; for intelligence tests, 37; for mechanical and routine tests, 36 ff.; range of, 196; schoolboys, 26; schoolgirls, 26; for simple manual tests, 96; for training experiment, 37
Summary, of data on simple manual tests, 99; general, 231-42; of relation between dynamic functions, 161; of relations between static functions, 69
Tap test, 38; inter-correlations, 53, 65
Taylor, 6, 13
Telegraphy, 6
Terman, 10

Terminal ability, curves, 130, 145, 165, 169; procedure, 36
Tests, accuracy, 10; classification of, 12; of hand and eye co-ordination, 3; of intelligence, 4, 16, 19; of mechanical assembling, 30; motor, 4; procedure, 30; of routine assembling, 15; sensori-motor, 3; simple manual, 2, 94-9; speed, 10; star puzzle, 38; of stripping, 15; tap, 38; tapping, 6; see also separate test names
Tetrad-difference criterion, 28; equation, 69
Theories of mental organization, 236
Thornike, 7
Thought, clarification and development, 188
Total ability, inter-correlations, 58; see also ability
Trained subjects, 37; curves of, 169-74
Training, 6, 11; advantages, 176; curves, 29, 169-74; distinguished from practice, 6, 162; plan of experiment, 164; procedure, 26; rôle of intelligence, 174; scheme, 165; subjects, 37; transfer of, 22, 30, 162-77
Transfer, of manual skill, 7; of practice effects, 22, 29, 141-61, 163; of training, 6, 22, 30, 162-77
Transition stage, 33
Trial and error, 13, 38, 193
Turnbuckle test, see simple manual tests
Typing, 6
Validity coefficients, 101
Variability, 6; and ability, 148; and improbability, 157; reliability of measurement, 46
Vaschide, 10
Vocational guidance, 237

Wedges test, described, 33; initial ability curves, 129, 144, 165, 169; practice curves, 117, 126, 129, 135, 170, 172; terminal ability, 144, 165, 169; see also routine assembling tests
Wiring test, described, 33, 34; initial ability curves, 129, 144, 165, 169; terminal ability curves, 144, 165, 169; see also mechanical and routine assembling tests
