[More information](#)

Index

- Allee model, 31
- autonomous difference equation, 1
- autonomous differential equation, 5
- Beverton–Holt equation, 28
- bifurcation points, 83
- birth rate, 25
- blow up of solutions, 13, 69
- carrying capacity, 28
- Cauchy problem, 7
- causality property, 93
- chaotic dynamics, 84, 90, 108
- characteristic equation, 3
- conversion period, 19
- cycle, 82, 84, 90
- death rate, 26
- effective interest rate, 20
- equilibrium, 7
- equilibrium of a difference equation, 75
- equilibrium of a differential equation, 66
- equilibrium point, 67
- Euler method, 92
- eventual equilibrium, 107
- flow, 67
- general solution, 7
- global Lipschitz continuity, 17, 70
- half-life, 41
- homogeneous type equation, 9, 60
- hyperbolic equilibrium, 78
- inhomogeneous linear equation, 40, 55
- initial condition, 7
- initial value problem, 7
- integrating factor, 8, 56
- intrinsic growth rate, 25
- linear differential equation, 8
- Lipschitz condition, 12
- logistic differential equation, 46, 47
- logistic discrete equation, 29, 30
- Malthusian equation, 25
- maximal interval of existence, 12
- net growth rate, 26
- nonstandard numerical scheme, 97
- orbit, 82, 106
- Peano theorem, 11
- periodic orbits, 84, 90
- periodic solutions, 82, 99, 107
- Picard theorem, 12
- reducible equation, 9
- reduction of order in differential equation, 9, 51, 55
- semeparous, 24
- semigroup property, 93
- separable equation, 7, 14, 48, 52
- solution to difference equation, 2
- stability in difference equations, 76, 77, 81, 83, 105
- stability in differential equations, 68, 105
- stationary solution, 7, 66, 67
- terminal velocity, 53
- time-one map, 93
- unrestricted growth rate, 29
