Introduction: how to use this book 1

1 Essential anatomy and functions of the balance system 2
   Introduction 2
   Anatomy and physiology of the vestibular system 2
   Eye movements 11
   Multisensory integration 15

2 Symptoms and examination of the patient with vertigo and dizziness 19
   Symptoms 21
   Essentials of the clinical examination 28
   Eye-movement examination 29
   Vestibular eye movements 35
   Positional manoeuvres 40
   Frenzel’s glasses 42
   Posture and gait 43
   Clinical assessment of hearing 45
   Orthostatic blood pressure 46
   Laboratory examinations 46
   Separating peripheral from central vestibular lesions 49
   Imaging procedures in dizzy patients 50

3 A single episode of prolonged vertigo 53
   Vestibular neuritis 54
   Brainstem and cerebellar lesions 60
   Herpes zoster oticus (Ramsay Hunt syndrome) 66
   First attack of vestibular migraine 66
   First attack of BPPV 67
   First attack of Ménière’s disease 67

4 Recurrent vertigo and dizziness 70
   Recurrent vertigo 70
   Vestibular migraine 71
   Benign recurrent vertigo 78
   Ménière’s disease 79
   Vertigo due to vertebrobasilar transient ischaemic attack (TIA) 84
   Vestibular paroxysmia: vascular compression of the eighth nerve? 86
   Perilymph fistula 88
   Rare causes of recurrent vertigo 89
   What to do if you don’t have a clue 92

5 Positional vertigo 108
   Posterior canal benign paroxysmal positional vertigo 109
   Horizontal canal benign paroxysmal positional vertigo: canalolithiasis type 117
   Horizontal canal benign paroxysmal positional vertigo: cupulolithiasis type 120
   Anterior canal benign paroxysmal positional vertigo 123
   Vestibular migraine 123
   Central positional vertigo 124

Other causes of acute persistent vertigo 67
What to do if you don’t have a clue 68

Recurrent dizziness 93
Orthostatic hypotension 94
Cardiac arrhythmia 97
Panic attacks 99
Drug-induced dizziness 102
Other causes of recurrent dizziness 106
What to do if you don’t have a clue 106

Tables

1.1 Central vestibular projections and their symptoms 9
1.2 Localisation and structures 9
2.1 Symptoms as a clue to diagnosis 19
2.2 Examination of the dizzy patient 20
2.3 Laboratory investigations for dizzy patients 21
2.4 Oscillopsia: diagnostic algorithm 26
2.5 Sorting out pathological nystagmus 34
2.6 Guide for peripheral versus central vestibular disorders 50
2.7 Guide for peripheral versus central nystagmus 50
2.8 Indications for brain scanning in dizzy patients 51
3.1 Single episode of prolonged vertigo: diagnoses with key features 53
3.2 Vestibular neuritis: key features 54
3.3 Acute vertigo: pointers to posterior circulation stroke 58
3.4 Clinical criteria for requesting magnetic resonance imaging in a patient with acute vertigo 62
3.5 Progression and course of brainstem/cerebellar syndromes as a clue to aetiology 62
3.6 Nystagmus features and associated findings in disorders presenting with acute prolonged vertigo 63
4.1 Recurrent vertigo: diagnoses with key features 70
4.2 Vestibular migraine: key features 71
4.3 International Classification of Headache Disorders (ICHD) criteria for the diagnosis of migraine without aura 72
4.4 Diagnostic criteria for vestibular migraine 73
4.5 Diagnostic criteria for probable vestibular migraine 73
4.6 Pharmacological treatment of vestibular migraine 78
4.7 Ménière's disease: key features 79
4.8 Differential diagnosis of Ménière's disease: disorders which may present with vertigo and cochlear symptoms 82
4.9 Vertiginous transient ischaemic attack: key features 84
4.10 Associated symptoms in 42 patients with vertigo due to vertebrobasilar disease 85
4.11 Proposed diagnostic criteria for vestibular paroxysmia: neurovascular compression of the eighth nerve 87
4.12 Causes of perilymph fistula 88
4.13 Recurrent dizziness: diagnoses with key features 93
4.14 Orthostatic hypotension: key features 94
4.15 Factors causing or aggravating orthostatic hypotension 95
4.16 Typical triggers for neurally mediated syncope 95
4.17 Cardiac arrhythmia: key features 97
4.18 Arrhythmia syndromes that may induce dizziness 98
4.19 Panic attacks: key features 99
4.20 Symptoms of panic attacks 100
4.21 Drugs causing dizziness and imbalance 104
viii | List of tables

5.1 Positional vertigo: common diagnoses with key features 108
5.2 Posterior canal benign paroxysmal positional vertigo: key features 109
5.3 Differential diagnosis of positional nystagmus 113
5.4 Horizontal canal benign paroxysmal positional vertigo of the canalolithiasis type: key features 117
5.5 Horizontal canal benign paroxysmal positional vertigo of the cupulolithiasis type: key features 120
5.6 Central positional vertigo: key features 124
5.7 Brainstem and cerebellar signs associated with central positional vertigo 125
6.1 Chronic dizziness: diagnoses with key features 131
6.2 Approach to the patient with chronic dizziness 133
6.3 Key features of the syndrome of persistent perceptual dizziness (PPD) 136
6.4 Relevant questions and investigations in the patient with chronic disequilibrium 144
7.1 Dizziness in the elderly: diagnoses with key features 147
7.2 Symptoms, signs and mechanisms of drug-induced dizziness 150
7.3 Essential investigations for falls in the elderly 160
7.4 Specific disorders leading to falls 161
7.5 'Funny turns': additional neurological symptoms as a clue to causes of falls 161
8.1 Key elements in the treatment of dizzy patients 167
8.2 Essentials of rehabilitation assessment 170
8.3 Factors interfering with clinical recovery following vestibular lesions 170
8.4 Movements typically included in vestibular rehabilitation programmes 173
8.5 Pharmacological profile of commonly used vestibular suppressants 177
8.6 Evidence for treatments of dizziness and vertigo 181
Video clips on accompanying website

Chapter 2
02.01 Oscillopsia due to bilateral vestibular failure 27
02.02 Clinical examination: convergence and search for spontaneous and gaze-evoked nystagmus 29
02.03 Examination for convergence and search for spontaneous and gaze-evoked nystagmus 30
02.04 Examination for gaze limitation 30
02.05 Clinical examination of smooth pursuit 30
02.06 Normal smooth pursuit 30
02.07 Clinical examination of saccades 30
02.08 Normal saccades 30
02.09 Clinical examination of the vestibulo-ocular reflex (VOR) with the head-thrust manoeuvre 30
02.10 Normal head thrust (or head-impulse test) 30
02.11 Doll’s head-eye manoeuvre 30
02.12 Normal doll’s head-eye manoeuvre 30
02.13 Abnormal head-thrust test to the right 31
02.14 Bilaterally abnormal head-thrust test 31
02.15 Normal VOR suppression 31
02.16 Clinical examination: Hallpike to the left 31
02.17 Clinical examination: Hallpike to the right 31
02.18 Clinical examination: sideways, or variant, Hallpike to the left 31
02.19 Clinical examination: sideways Hallpike to the right 31
02.20 Positional downbeat nystagmus 31
02.21 Acquired pendular nystagmus 31
02.22 Gaze-evoked nystagmus 32
02.23 Abnormal pursuit 32
02.24 Abnormal VOR suppression 32
02.25 Saccadic hypometria in Parkinson’s disease 32
02.26 Saccadic hypermetria in cerebellar disease 32
02.27 Slow saccades 32
02.28 Internuclear ophthalmoplegia (INO) 32
02.29 Normal postural reflexes 49

Chapter 3
03.01 Left-sided vestibular neuritis 55
03.02 Abnormal head-thrust test to the left 56
03.03 Small skew deviation 58
03.04 Large skew deviation 58
03.05 Pure torsional nystagmus 64
Chapter 5
05.01 Right-sided posterior canal BPPV  111
05.02 Treatment of posterior canal BPPV: Semont left  116
05.03 Treatment of posterior canal BPPV: Semont right  116
05.04 Treatment of posterior canal BPPV: Epley left  118
05.05 Treatment of posterior canal BPPV: Epley right  118
05.06 Canalolithiasis of the right horizontal canal  120
05.07 Barbecue manoeuvre for left horizontal BPPV  120
05.08 Barbecue manoeuvre for right horizontal BPPV  120
05.09 Gufoni manoeuvre for left horizontal BPPV  121
05.10 Gufoni manoeuvre for right horizontal BPPV  121
05.11 Cupulolithiasis of the right horizontal canal  123
05.12 Positional downbeat nystagmus  125
05.13 Positional downbeat nystagmus (video-oculography)  125
05.14 Atypical (central) positional nystagmus  126

Chapter 7
07.01 Sensory neuropathy: Romberg test  154
07.02 Downbeat nystagmus  155
07.03 Gait in a patient with downbeat nystagmus  155
07.04 Finger–nose test in a patient with downbeat nystagmus  156
07.05 Impaired postural reflexes  157
07.06 High level gait disorder (freezing and hesitation)  157
07.07 Early PSP: eyes  157
07.08 Early PSP: gait  157
07.09 Early PSP: Romberg  157
07.10 Early PSP: postural reflexes  157

Chapter 8
08.01 Vestibular rehabilitation: seated exercises  172
08.02 Vestibular rehabilitation: standing exercises  172
