978-1-107-67883-5 – Cambridge Mathematics NSW Syllabus for the Australian Curriculum Year 9 5.1 and 5.2

Stuart Palmer David Greenwood Sara Woolley Jenny Vaughan Jenny Goodman David Robertson Georgia Sotiriou and Voula Sotiriou
Frontmatter[More information](#)

Vol (water)
 $= 5000000 \text{ m}^3$
 $= 5 \times 10^6 \text{ m}^3$

Area (kite) = $l \times w + 2 \times \frac{1}{2} \times b \times h$
 $= 3 \times 1.5 + 1 \times 1 \times 5 \times 1$
 $= 6 \text{ m}^2$

Carnival profit
 $P = 20x - 4000$
 $P > 0 \Rightarrow 20x - 4000 > 0$
 $20x > 4000$
 $x > 200$

Win | Loss | Draw
 38 | 17 | 7

$P(\text{win}) = \frac{38}{38+17+7}$
 ≈ 0.613
 $= 61.3\%$

$y = -0.02x^2 + 2$
 $\text{if } x=0, y=2$

Table of Contents

Strand and content description

<i>About the authors</i>	<i>viii</i>
<i>Introduction and guide to this book</i>	<i>x</i>
<i>Acknowledgments</i>	<i>xiv</i>

1 Integers, decimals, fractions, ratios and rates 2

	Pre-test	4
1A	Adding and subtracting positive and negative integers REVISION	5
1B	Multiplying and dividing positive and negative integers REVISION	9
1C	Decimal places and significant figures	13
1D	Rational numbers and irrational numbers REVISION	18
1E	Adding and subtracting fractions REVISION	23
1F	Multiplying and dividing fractions REVISION	27
1G	Ratios REVISION	32
1H	Rates and direct proportion	37
	Puzzles and games	42
	Review: Chapter summary	43
	Multiple-choice questions	44
	Short-answer questions	45
	Extended-response questions	46

Number and Algebra

Measurement and geometry
 Computation with integers (S4)
 Fractions, decimals and percentages (S4)
 Ratios and rates (S4, 5.2)
 Numbers of any magnitude (S5.1)
 MA4-4NA, MA4-5NA, MA4-7NA,
 MA5.2-5NA, MA5.1-9MG

2 Financial mathematics 48

	Pre-test	50
2A	Percentages, fractions and decimals REVISION	51
2B	Applying percentages REVISION	56
2C	Percentage increase and decrease REVISION	59
2D	Profits and discounts REVISION	64
2E	Income	70
2F	Taxation	75
2G	Simple interest	79
2H	Applications of simple interest	84
	Puzzles and games	88
	Review: Chapter summary	89
	Multiple-choice questions	90
	Short-answer questions	91
	Extended-response questions	92

Number and Algebra

Fractions, decimals and percentages (S4)
 Financial mathematics (S4, 5.1)
 MA4-5NA, MA4-6NA, MA5.1-4NA

3 Expressions and equations

94

Number and Algebra

	Pre-test	96
3A	Algebraic expressions REVISION	97
3B	Adding and subtracting algebraic expressions REVISION	103
3C	Multiplying and dividing algebraic expressions REVISION	107
3D	Expanding algebraic expressions REVISION	111
3E	Linear equations with pronumerals on one side REVISION	116
3F	Solving linear equations involving fractions	120
3G	Linear equations with brackets	124
3H	Equations with pronumerals on both sides REVISION	127
3I	Using linear equations to solve problems	131
3J	Using formulas	136
	Puzzles and games	141
	Review: Chapter summary	142
	Multiple-choice questions	143
	Short-answer questions	143
	Extended-response questions	145

Algebraic techniques (S4)

Equations (S4, 5.2)

MA4-8NA, MA4-10NA, MA5.2-8NA

4 Right-angled triangles

146

Measurement and Geometry

	Pre-test	148
4A	Exploring Pythagoras' theorem REVISION	149
4B	Finding the length of the hypotenuse REVISION	153
4C	Finding the lengths of the shorter sides REVISION	158
4D	Using Pythagoras' theorem to solve two-dimensional problems REVISION	162
4E	Introducing the trigonometric ratios	167
4F	Finding unknown sides	173
4G	Solving for the denominator	178
4H	Finding unknown angles	183
4I	Using trigonometry to solve problems	188
	Puzzles and games	192
	Review: Chapter summary	193
	Multiple-choice questions	194
	Short-answer questions	195
	Extended-response questions	197

Right-angled triangles

(Pythagoras and trigonometry)

(S4, 5.1/5.20)

MA4-16MG, MA5.1-10MG,

MA5.2-13MG

5 Linear relationships 198 **Number and Algebra**

	Pre-test	200
5A	Introducing linear relationships	201
5B	The x -intercept and y -intercept	208
5C	Graphing straight lines using intercepts EXTENSION	214
5D	Lines with only one intercept	218
5E	Gradient	225
5F	Gradient and direct proportion	232
5G	Gradient–intercept form	237
5H	Finding the equation of a line using $y = mx + b$ EXTENSION	242
5I	Midpoint and length of a line segment from diagrams	248
5J	Linear modelling FRINGE	253
5K	Introducing non-linear relationships	258
	Puzzles and games	265
	Review: Chapter summary	266
	Multiple-choice questions	267
	Short-answer questions	269
	Extended-response questions	271

Linear relationships (S4, 5.1, 5.2)
 Ratios and rates (S4, 5.2)
 MA4–11NA, MA5.1–6NA, MA5.2–9NA,
 MA5.2–5NA

Semester review 1 272

6 Length, area, surface area and volume 278 **Measurement and Geometry**

	Pre-test	280
6A	Length and perimeter REVISION	281
6B	Circumference of circles and perimeter of sectors REVISION	286
6C	Area of quadrilaterals and triangles REVISION	290
6D	Area of circles REVISION	295
6E	Perimeter and area of composite shapes	299
6F	Surface area of prisms	304
6G	Surface area of cylinders	309
6H	Volume of prisms	313
6I	Volume of cylinders	319
	Puzzles and games	323
	Review: Chapter summary	324
	Multiple-choice questions	325
	Short-answer questions	326
	Extended-response questions	328

Area and surface area
 (S4, 5.1, 5.2, 5.3)
 Volume (S4, 5.2)
 MA4–13MG, MA5.1–8MG,
 MA5.2–11MG, MA4–14MG

7 Indices 330 **Number and Algebra**

	Pre-test	332
7A	Index notation	333
7B	Index laws for multiplying and dividing	339
7C	The zero index and power of a power	345
7D	Index laws extended	350
7E	Negative indices	356
7F	Scientific notation	361
7G	Scientific notation using significant figures	365
	Puzzles and games	370
	Review: Chapter summary	371
	Multiple-choice questions	372
	Short-answer questions	373
	Extended-response questions	374

Measurement and geometry
Indices (S4, 5.1, 5.2)
MA4-9NA, MA5.1-5NA, MA5.2-7NA
MA5.1-9MG

8 Properties of geometrical figures 376 **Measurement and Geometry**

	Pre-test	378
8A	Angles and triangles REVISION	379
8B	Parallel lines REVISION	386
8C	Quadrilaterals REVISION	391
8D	Polygons	396
8E	Congruent triangles	400
8F	Enlargement and similar figures	406
8G	Similar triangles	412
8H	Applying similar triangles	418
	Puzzles and games	422
	Review: Chapter summary	423
	Multiple-choice questions	424
	Short-answer questions	425
	Extended-response questions	428

Properties of geometrical figures
(S4, 5.1, 5.2, 5.3§)
MA4-17MG, MA5.1-11MG,
MA5.2-14MG, MA4-18MG

**9 Quadratic expressions and algebraic fractions 430****Number and Algebra**

	Pre-test	432
9A	Reviewing algebra REVISION	433
9B	Expanding binomial products	437
9C	Expanding perfect squares EXTENSION	442
9D	Difference of two squares EXTENSION	446
9E	Factorising algebraic expressions	449
9F	Simplifying algebraic fractions: multiplication and division	453
9G	Simplifying algebraic fractions: addition and subtraction	458
	Puzzles and games	462
	Review: Chapter summary	463
	Multiple-choice questions	464
	Short-answer questions	465
	Extended-response questions	466

Algebraic techniques (5.2, 5.3\$)
MA4-8NA, MA5.2-6NA

10 Probability and single variable data analysis 468**Statistics and Probability**

	Pre-test	470
10A	Probability review REVISION	471
10B	Venn diagrams and two-way tables	478
10C	Using arrays for two-step experiments	487
10D	Using tree diagrams	494
10E	Using relative frequencies to estimate probabilities	499
10F	Using range and measures of centre (mean, median and mode) REVISION	504
10G	Interpreting data from tables and graphs	509
10H	Stem-and-leaf plots	518
10I	Grouping data into classes FRINGE	525
	Puzzles and games	532
	Review: Chapter summary	533
	Multiple-choice questions	534
	Short-answer questions	535
	Extended-response questions	537

Probability (S5.1, 5.2)
Single variable data analysis (S5.1, 5.2)
MA4-21SP, MA5.1-13SP, MA5.2-17SP,
MA4-20SP, MA5.1-12SP,
MA5.2-15SP, MA4-19SP

Semester review 2 539

	<i>Answers</i>	548
	<i>Index</i>	603

About the authors

Stuart Palmer was born and educated in New South Wales. He is a high school mathematics teacher with more than 25 years' experience teaching boys and girls from all walks of life in a variety of schools. Stuart has taught all the current NSW Mathematics courses in Stages 4, 5 and 6 many times. He has been a head of department in two schools and is now an educational consultant who conducts professional development workshops for teachers all over NSW and beyond. He also works with pre-service teachers at the University of Sydney and the University of Western Sydney.

David Greenwood is the head of Mathematics at Trinity Grammar School in Melbourne and has 20 years' experience teaching mathematics from Years 7 to 12. He has run numerous workshops within Australia and overseas regarding the implementation of the Australian Curriculum and the use of technology for the teaching of mathematics. He has written more than 20 mathematics titles and has a particular interest in the sequencing of curriculum content and working with the Australian Curriculum proficiency strands.

Sara Woolley was born and educated in Tasmania. She completed an Honours degree in Mathematics at the University of Tasmania before completing her education training at the University of Melbourne. She has taught mathematics in Victoria from Years 7 to 12 since 2006 and has a keen interest in the creation of resources that cater for a wide range of ability levels.

Jenny Goodman has worked for 20 years in comprehensive state and selective high schools in New South Sydney and has a keen interest in teaching students of differing ability levels. She was awarded the Jones Medal for Education at the University of Sydney and the Bourke prize for Mathematics. She has written for Cambridge NSW and was involved in the *Spectrum* and *Spectrum Gold* series.

Jennifer Vaughan has taught secondary mathematics for more than 30 years in New South Wales, Western Australia, Queensland and New Zealand, and has tutored and lectured in mathematics at Queensland University of Technology. She is passionate about providing students of all ability levels with opportunities to understand and to have success in using mathematics. She has taught special needs students and has had extensive experience in developing resources that make mathematical concepts more accessible.

Consultant

Beth Godwin is the author of several Cambridge titles, including *Spectrum Maths Gold Year 7* and *Year 8*. She has presented seminars and workshops to educators on topics including differentiating the curriculum, behaviour management and developing literacy skills. Currently the principal of Cabramatta High School in New South Wales, Beth has experience in ensuring that the curriculum is accessible to all students.

Introduction and guide to this book

This resource developed from an analysis of the NSW Syllabus for the Australian Curriculum and the ACARA syllabus, Australian Curriculum: Mathematics. It is structured on a detailed teaching program for the implementation of the NSW Syllabus, and a comprehensive copy of the teaching program can be found on the companion website.

The language and concepts have been carefully reviewed and revised to make sure that they are effective for students doing Stage 5.1/5.2. For each section, the coverage of Stages 4, 5.1, 5.2 and 5.20 is indicated by 'ladder icons'. More questions are provided for the Understanding and Fluency components of Working Mathematically, and there are fewer advanced and challenging questions, than in the Stage 5.1/5.2/5.3 textbook. However, the sequences of topics of both textbooks are aligned to make it easier for teachers using both resources.

The chapters are based on a logical teaching and learning sequence for the syllabus topic concerned, so that chapter sections can be used as ready-prepared lessons. Exercises have questions graded by level of difficulty, indicated in the teaching program, and grouped by the NSW Syllabus's working mathematically components, indicated by badges in the margin of the exercises. This facilitates the management of differentiated learning and reporting on students' achievement.

For certain topics, the prerequisite knowledge has been given in sections marked as REVISION, while EXTENSION marks a few sections that go beyond the syllabus. Similarly the word FRINGE is used to mark a few topics treated in a way that lies at the edge of the syllabus requirements, but which provides variety and stimulus. Apart from these, all topics are aligned exactly to the NSW Syllabus, as indicated at the start of each chapter and in the teaching program.

Guide to this book

Features:

NSW Syllabus for the Australian Curriculum: strands, substrands and content outcomes for chapter (see teaching program for more detail)

What you will learn: an overview of chapter contents

Chapter introduction: use to set a context for students

Chapter 1 Integers, decimals, fractions, ratios and rates

What you will learn

- 1A Adding and subtracting positive and negative integers
- 1B Multiplying and dividing positive and negative integers
- 1C Rational places and decimal fractions
- 1D Rational numbers and rational numbers
- 1E Adding and subtracting fractions
- 1F Multiplying and dividing fractions
- 1G Ratio
- 1H Rate and direct proportion

Negative numbers in the ancient world

The ancient Babylonians, Greeks and Egyptians were all aware of the need for negative numbers. There is no mention of negative numbers in their writings. The first mention of negative numbers is dated back to only 200 or so years. The Chinese used abacuses with black rods for negative numbers and red rods for positive numbers.

NSW Syllabus for the Australian Curriculum

Strands, substrands and content outcomes

Strand 5: Number and Algebra

Substrand 5-1: Integers and Fractions

Content Outcome 5-1-1: Integers and Fractions

Outcomes

A student compares, orders and calculates with integers, applying a range of strategies to add and subtract.

5MA-1-1A1

A student operates with fractions, decimals and percentages.

5MA-1-1A2

A student operates with ratios and rates and explores their graphical representation.

5MA-1-1A3

A student recognises direct and indirect proportion, and solves problems involving direct proportion.

5MA-1-1A4

A student interprets very small and very large units of measurement, uses scientific notation, and converts to significant figures.

5MA-1-1A5

Guide to this book (continued)

Pre-test: establishes prior knowledge (also available as a printable worksheet)

Topic introduction: use to relate the topic to mathematics in the wider world

HOTmaths icons: links to interactive online content via the topic number, 1A in this case (see page xiii for more)

Let's start: an activity (which can often be done in groups) to start the lesson

Key ideas: summarise the knowledge and skills for the lesson

Examples: solutions with explanations and descriptive titles to aid searches (digital versions also available for use with IWB)

Exercise questions categorised by the **working mathematically components** and **enrichment** (see next page)

Questions are linked to examples

Puzzles and games

Puzzles and games

- Can you arrange the first nine counting numbers with signs and brackets in how many ways can four girls and two boys be seated in a row if the girls sit in the odd-numbered seats?
- Complete the number cross below.

1.	2.	3.	
4.		5.	6.
7.	8.	9.	
10.			

Clues

Chapter summary: mind map of key concepts & interconnections

2 Semester reviews per book

Chapter reviews with **multiple-choice**, **short-answer** and **extended-response** questions

Multiple-choice questions

- Write $\frac{1}{2}$ in decimal form.
 - A. 0.25
 - B. 0.200
 - C. 0.250
 - D. 0.25
- 3.0000 is written in three significant figures as:
 - A. 3.004
 - B. 3.005
 - C. 3.0045
 - D. 3.0045
- 2.25 written as a fraction in simplest form is:
 - A. $\frac{2}{25}$
 - B. $\frac{9}{10}$
 - C. $\frac{9}{40}$
 - D. $\frac{9}{20}$
- $\frac{1}{2} + \frac{1}{3}$ is equal to:
 - A. $\frac{5}{6}$
 - B. $\frac{2}{3}$
 - C. $\frac{1}{6}$
 - D. $\frac{1}{3}$
- $\frac{1}{2} \times \frac{3}{4}$ is equal to:
 - A. $\frac{3}{8}$
 - B. $\frac{3}{2}$
 - C. $\frac{2}{3}$
 - D. $\frac{2}{8}$
- Round off the number 150.4 to the nearest:
 - A. 100
 - B. 150
 - C. 150.4
 - D. 150.5

Chapter 6: Length, area, surface area and volume

Multiple-choice questions

- The perimeter and area of the figure are, respectively, 30 cm and 100 cm^2 .
 - A. 30 cm , 100 cm^2
 - B. 30 cm , 100 cm^2
 - C. 30 cm , 100 cm^2
 - D. 30 cm , 100 cm^2
- The perimeter and area of the figure above, respectively, are:
 - A. 42 cm , 100 cm^2
 - B. 42 cm , 100 cm^2
 - C. 42 cm , 100 cm^2
 - D. 42 cm , 100 cm^2
- The perimeter and area of the figure above, respectively, are:
 - A. 30 cm , 100 cm^2
 - B. 30 cm , 100 cm^2
 - C. 30 cm , 100 cm^2
 - D. 30 cm , 100 cm^2
- The volume of the cylinder above is closest to:
 - A. 3000 cm^3
 - B. 3000 cm^3
 - C. 3000 cm^3
 - D. 3000 cm^3

Short-answer questions

- Find the perimeter and area of the figure above.

Textbooks also include:

- Complete answers
- Index
- Using technology activities

Pre-test

- Arrange the following mathematical terms under four headings: 'Addition', 'Multiplication' and 'Division'.
 - a Sum
 - b Total
 - c Less than
 - d Lots of
 - f Into
 - g Take away
 - h Difference
 - i Add
 - k Minus
 - l More than
 - m Quotient
- Without using a calculator, find an answer to each of the following.
 - a 16 less 12
 - b 24 more than 8

1A Adding and subtracting positive and negative integers

Integers are the set of positive and negative whole numbers, as well as zero. Being able to work with whole numbers is very important, since whole numbers are used every day for counting, calculating measuring and ordering.

Let's start: Naming groups

Here are some groups of numbers. In groups of two or three, use the correct mathematical terms to describe each group. (Suggestions include: 'multiples of', 'factors of', 'integers', 'squares' and 'cubes'.)

- 2, 4, 6, 8, ...
- 1, 4, 9, 16, ...
- 1, 3, 5, 7, 9, ...
- 1, 2, 3, 4, 5, 6, ...
- -1, -2, -3, -4, -5, ...

Numbers are used in marketplaces all around the world to describe prices.

Key ideas

- Rational numbers (fractions)** (e.g. $\frac{1}{2}$, $\frac{3}{4}$, $\frac{1}{1}$)
 - Terminating decimals (e.g. 8, 1.2, -6.123)
 - Recurring decimals (e.g. 0.5, -1.4, 2.375)
- Real numbers**
 - Irrational numbers** (e.g. $\sqrt{2}$, π , ϕ) – the golden ratio
 - Infinite non-recurring decimals (e.g. $\pi = 3.14159...$, $\phi = 1.618033...$, $\sqrt{2} = 1.414213...$)

Real number Any positive or negative number, or zero
Rational number A real number that can be expressed as a fraction
Irrational number A real number that cannot be expressed as a fraction

Example 2 Adding a negative integer

Find $17 + (-12)$.

SOLUTION
 $17 + (-12) = 17 - 12 = 5$

EXPLANATION
Adding a negative is the same as subtracting.
 $17 + (-12) = 17 - 12$

Exercise 1A

- Match each of the following sentences to the correct expression on the right.
 - a The sum of 5 and 7
 - b The total of negative 5 and 7
 - i $5 + (-7)$
 - ii $5 - (-7)$
- Mentally find the answers to these sums. Hint: Use the partitioning strategy.
 - a $23 + 41$
 - b $71 + 26$
 - c $138 + 441$
 - d $246 + 502$
 - e $937 + 11$
 - f $1304 + 4293$
 - g $140\ 273 + 738\ 410$
 - h $390\ 447 + 201\ 132$
 - i $100\ 001 + 101\ 010$
- Copy and complete:
 - a $-5 \times \square = -35$
 - b $\square \div (-4) = 8$
 - c $-10 \times \square = 200$
 - d $17 \times \square = -68$
 - e $34 \div \square = -34$
 - f $-6 \times \square = -36$
 - g $\square \div 9 \times -3 = 3$
 - h $15 \div \square + 3 = -1$
 - i $-15 \times \square = 225$
- The sum of two numbers is -3 and their product is -10 . What are the two numbers?
- Give the value of two different numbers that when squared each produce an answer of:

Enrichment: Magic squares with integers

13 a Copy and complete this magic square. Each row, column and diagonal add to the same number.

-8		
	-2	-6

What does the diagonal add up to?

Working mathematically badges

All exercises are divided into sections marked by Working mathematically badges, such as this example:

Understanding &
Communicating

Fluency &
Communicating

Problem-solving, Reasoning
& Communicating

The letters U (Understanding), F (Fluency), PS (Problem-solving), R (Reasoning) and C (Communication) are highlighted in colour to indicate which of these components apply mainly to the questions in that section. Naturally there is some overlap between the components.

Stage ladder icons

Shading on the ladder icons at the start of each section indicates the Stages covered by most of that section.

This key explains what each rung on the ladder icon means in practical terms. For more information see the teaching program and teacher resource package.

Stage

5.3#
5.3
5.3§
5.2
5.2◇
5.1
4

Stage	Past and present experience in Stages 4 and 5	Future direction for Stage 6 and beyond
5.3#	These are optional topics that contain challenging material for students who will complete all of Stage 5.3 during Years 9 and 10.	These topics are intended for students who are aiming to study Mathematics at the very highest level in Stage 6 and beyond.
5.3	Capable students who rapidly grasp new concepts should go beyond Stage 5.2 and study at a more advanced level with these additional topics.	Students who have completed Stage 5.1, 5.2 and 5.2 and 5.3 are generally well prepared for a calculus-based stage 6 Mathematics course.
5.3§	These topics are recommended for students who will complete all the Stage 5.1 and 5.2 content and have time to cover some additional material.	These topics are intended for students aiming to complete a calculus-based Stage 6 Mathematics course.
5.2	A typical student should be able to complete all the Stage 5.1 and 5.2 material by the end of Year 10. If possible, students should also cover some Stage 5.3 topics.	Students who have completed Stage 5.1 and 5.2 without any 5.3 material typically find it difficult to complete a calculus-based Stage 6 Mathematics course.
5.2◇	These topics are recommended for students who will complete all the Stage 5.1 content and have time to cover some additional material.	These topics are intended for students aiming to complete a non-calculus course in Stage 6, such as Mathematics General.
5.1	Stage 5.1 contains compulsory material for all students in Years 9 and 10. Some students will be able to complete these topics very quickly. Others may need additional time to master the basics.	Students who have completed Stage 5.1 without any 5.2 or 5.3 material have very limited options in Stage 6 Mathematics.
4	Some students require revision and consolidation of Stage 4 material prior to tackling Stage 5 topics.	

Additional resources online

CAMBRIDGE

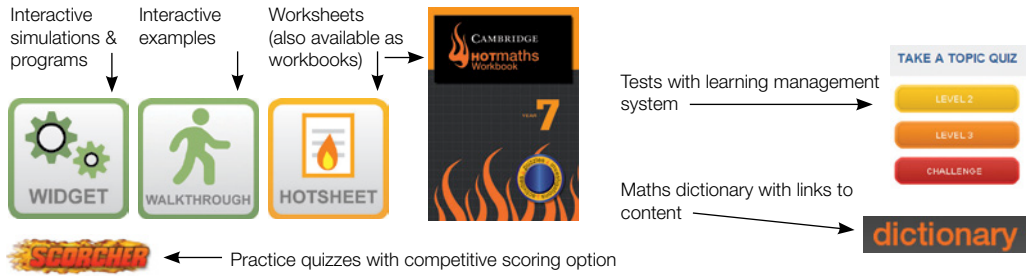

INTEGRATED PROGRAM

The *CambridgeMATHS/HOTmaths* integrated program for the Australian Curriculum offers the best of textbook and interactive online resources. It can be used with a HOTmaths account (eg for class demos via IWBs or data projectors) or with student accounts, which enable access to the full range of features, including use at home.

The integrated program is linked from icons and the topic numbers in the textbooks, as detailed in a document available (free) from the Cambridge website.

All HOTmaths features are included in the program, eg:
