TABLE OF CONTENTS.

CHAPTER I.

LEIBNIZ’S PREMISSES.

1. Reasons why Leibniz never wrote a magnum opus . . . 1
2. Functions of the commentator on Leibniz . . . . 2
3. Two types of inconsistency in his philosophy . . . . 3
4. His premisses . . . . . . . . . . . . . . . . . . . . . . 4
5. Course of the present work . . . . . . . . . . . . . . 4
6. Influences which formed Leibniz’s opinions . . . . 5

CHAPTER II.

NECESSARY PROPOSITIONS AND THE LAW OF CONTRADICTION.

7. Leibniz’s philosophy begins with an analysis of propositions 8
8. Outline of Leibniz’s logical argument . . . . . 9
9. Questions raised by this argument . . . . . . 11
10. Are all propositions reducible to the subject-predicate form? 12
11. Analytic and synthetic propositions . . . . . . . . . . 16
12. Necessity and contingency . . . . . . . . . . . . . . 23

CHAPTER III.

CONTINGENT PROPOSITIONS AND THE LAW OF SUFFICIENT REASON.

13. The range of contingent judgments in Leibniz . . . . 25
14. Meaning of the principle of sufficient reason . . . . . 30
15. Its relation to the law of contradiction . . . . . . . . 35
CONTENTS.

CHAPTER IV.

THE CONCEPTION OF SUBSTANCE.

16. Cartesian and Spinozistic views on substance  . . . 40
17. The meaning of substance in Leibniz  . . . 42
18. The meaning of activity  . . . . . 44
19. Connection between activity and sufficient reason  . 46
20. The states of one substance form one causal series  . 47
21. How does a substance differ from the sum of its predicates?  48
22. Relation of time to Leibniz’s notion of substance  . 50

CHAPTER V.

THE IDENTITY OF INDISCERNIBLES AND THE LAW OF CONTINUITY. POSSIBILITY AND COMPOSIBILITY.

23. Meaning of the Identity of Indiscernibles  . . . 54
24. The principle necessary, but not a premiss of Leibniz’s philosophy  . . . . . 55
25. Is Leibniz’s proof of the principle valid?  . . . 58
26. Every substance has an infinite number of predicates. Connection of this with contingency and with the identity of indiscernibles  . . . . . 60
27. The Law of Continuity: three forms of continuity maintained by Leibniz  . . . . . 63
28. Grounds of the Law of Continuity  . . . 65
29. Possibility and compossibility  . . . 66
30. Common properties of all possible worlds  . . . 67
31. The three kinds of necessity  . . . . . 69

CHAPTER VI.

WHY DID LEIBNIZ BELIEVE IN AN EXTERNAL WORLD?

32. Leibniz accepted matter as a datum  . . . . . 70
33. The existence of the external world has only “moral certainty”  . . . . . . . . . . 72
CONTENTS.

CHAPTER VII.

THE PHILOSOPHY OF MATTER: (a) AS THE OUTCOME OF THE PRINCIPLES OF DYNAMICS.

34. The general trustworthiness of perception is a premise of Leibniz's philosophy ........ 75
35. Various meanings of matter and body ........ 75
36. Relation of Leibnizian and Cartesian Dynamics ........ 77
37. The essence of matter is not extension .......... 77
38. Meaning of materia prima in Leibniz's Dynamics ........ 78
39. Materia secunda ........ 80
40. The conception of force and the law of inertia ........ 81
41. Force and absolute motion ........ 84
42. Metaphysical grounds for assuming force ........ 87
43. Dynamical argument for plurality of causal series ........ 89
44. Three types of dynamical theory confused by Leibniz ........ 90
45. His grounds against extended atoms ........ 92
46. Against the vacuum ........ 92
47. And against action at a distance ........ 93
48. Force as conferring individuality ........ 94
49. Primitive and derivative force ........ 95
50. Antinomy of dynamical causation ........ 98

CHAPTER VIII.

THE PHILOSOPHY OF MATTER (CONTINUED), (b) AS EXPLAINING CONTINUITY AND EXTENSION.

51. There must be simple substances, since there are compounds ........ 100
52. Extension, as distinguished from space, is Leibniz's starting-point ........ 101
53. Extension means repetition ........ 102
54. Hence the essence of a substance cannot be extension, since a substance must be a true unity ........ 103
55. The three kinds of point. Substances not material ........ 104
56. Motion is phenomenal, though force is real ........ 106
CONTENTS.

CHAPTER IX.

THE Labyrinth OF THE CONTINUUM.

57. Difficulties about points .................................................. 108
58. Assertion of the actual infinite and denial of infinite number .... 109
59. Continuity in one sense denied by Leibniz .......................... 111
60. In number, space, and time, the whole is prior to the part ...... 112
61. Space and time, for Leibniz, purely relational .................... 112
62. Summary of the argument from the continuum to monads ....... 114
63. Since aggregates are phenomenal, there is not really a number of monads .................................................. 115
64. Difficulties of this view .................................................... 116

CHAPTER X.

THE THEORY OF SPACE AND TIME AND ITS RELATION TO MONADISM.

65. Reasons why a philosophy of substance must deny the reality of space .................................................. 118
66. Leibniz's arguments against the reality of space ............... 119
67. Leibniz's theory of position .............................................. 120
68. The relation of monads to space a fundamental difficulty of monadism .................................................. 122
69. Leibniz's early views on this subject .................................. 122
70. His middle views ............................................................. 123
71. His later views ............................................................... 124
72. Time and change ........................................................... 127
73. Monadisms take an unsymmetrical view of the relations of space and of time to things ............................................ 128
74. Leibniz held confusedly to an objective counterpart of space and time .................................................. 129

CHAPTER XI.

THE NATURE OF MONADS IN GENERAL.

75. Perception ................................................................. 131
76. Appetition ................................................................. 133
77. Perception not due to action of the perceived on the percipient .................................................. 133
78. Lotze's criticism of this view ............................................ 135
79. The pre-established harmony ............................................. 136
CONTENTS.

CHAPTER XII.

SOUL AND BODY.

80. Relations of monads to be henceforth considered ........................................ 139
81. Cartesian and Spinozistic views of the relations of Soul and Body ................... 139
82. Outline of Leibniz’s view ............................................................................. 140
83. The three classes of monads ........................................................................ 141
84. Activity and passivity ................................................................................ 141
85. Perfection and clearness of perception ........................................................... 142
86. Materia prima as an element in each monad ................................................... 144
87. Materia prima the source of finitude, plurality, and matter .............................. 145
88. And of the interconnection of monads ............................................................ 146
89. Two theories of soul and body in Leibniz ...................................................... 147
90. First theory .................................................................................................... 147
91. Second theory ............................................................................................... 149
92. The vinculum substantiale ............................................................................ 151
93. The second theory to be rejected .................................................................. 152
94. Preformation ................................................................................................ 154

CHAPTER XIII.

CONFUSED AND UNCONSCIOUS PERCEPTION.

95. Two kinds of differences between monads ...................................................... 155
96. Unconscious mental states ............................................................................ 156
97. Confused and minute perceptions .................................................................. 157

CHAPTER XIV.

LEIBNIZ’S THEORY OF KNOWLEDGE.

98. What theory of knowledge means .................................................................. 160
99. Innate ideas and truths ................................................................................ 161
100. The New Essays inconsistent with Leibniz’s metaphysics ............................. 163
101. Difficulties as to innate ideas ...................................................................... 165
102. Distinction of sense and intellect ................................................................. 166
103. The quality of ideas ..................................................................................... 167
104. Definition ..................................................................................................... 168
105. The Characteristica Universalis .................................................................... 169
