Case Studies in Pain Management
Case Studies in Pain Management

Edited by

Alan David Kaye, MD, PhD, DABA, DABPM, DABIPP
Professor and Chairman, Department of Anesthesiology, Director of Interventional Pain Services, LSU School of Medicine, New Orleans, LA, USA

Rinoo V. Shah, MD, MBA, DABPMR, DABIPP
Interventional Pain Physician and Minimally Invasive Spine Specialist at Guthrie Clinic, Sayre, PA, USA
To my parents: my mother Florence Feldman, the former Fania Eichenblat, who despite having a lifetime of chronic pain has never given up in her efforts to make a good life for her children and whose kindness and love I can never adequately repay and my father Joel Kaye, the former Joseph Krakower, for providing me with thousands of enlightening lessons in life and for helping to shape me into the man I am today.

To my step parents: Andrea Bennett-Kaye and the late Gideon Feldman, who helped raise me, providing love, support, kindness, and wisdom over the last 30 plus years.

To my wife: Dr. Kim Kaye, and my children, Aaron Kaye and Rachel Kaye, for making each day worth living and for giving me balance, support, and inspiration for all that I do in life.

Alan D. Kaye, MD, PhD, DABA, DABPM, DABIPP

To my parents: my mom, Rajul Shah, and my dad, Vasant Shah, for their unconditional love, patience, dedication, industriousness, kindness, and hard work. They always deserved better, but handled what they had with what gives essence to the meaning to life. I am the luckiest child in all of humanity to have them as my parents.

To my wife: Dr. Kejal Shah and my Children, Maaya Shah, Diyaa Shah, and Dev-Dehdo for their unconditional love, patience, and for being the source of my eternal happiness and drive. They provide inspiration and keep me focused not only during the good and bad times, but during the ‘meh’ times. They remind me how every second is precious in cosmological time.

Rinoo V. Shah, MD, MBA, DABIPP, DABPMR

Both Dr. Kaye and Dr. Shah wish to thank Dr. Gabor Racz, Dr. Prithvi Raj, Dr. Miles Day, and Dr. Leland Lou who helped train both of them in the field of pain management at Texas Tech Health Sciences Center in Lubbock, Texas.

## Section 1 – Neurological Disorders

1. **Postherpetic neuralgia**  1  
   Alan David Kaye and Charles E. Argoff  

2. **Patient with spinal cord injury pain**  16  
   Daniel Krashin, Natalia Murinova, and Alan David Kaye  

3. **Patient with poststroke pain**  22  
   Natalia Murinova, Claire Creutzfeldt, Daniel Krashin, and Alan David Kaye  

4. **Patient with brachial plexopathy**  30  
   Jonathan Chang and Rahul Rastogi  

5. **Phantom limb pain**  38  
   Jonathan Chang and Rahul Rastogi  

6. **Patient with post-thoracotomy pain**  43  
   Rinoo V. Shah  

7. **Complex regional pain syndrome**  46  
   Gaurav Jain and Nashaat N. Rizk  

8. **Diabetic neuropathy**  52  
   Gulshan Doulatram and Tilak Raj  

9. **Alcohol-induced neuropathy**  64  
   Gulshan Doulatram, Tilak Raj, and Ankur Khosla  

10. **HIV neuropathy**  72  
    Gulshan Doulatram, Tilak Raj, and William Yancey  

## Section 2 – Spinal Disorders

11. **Cervicogenic headache**  81  
    Eric R. Helm and Nashaat N. Rizk  

12. **Cervical stenosis and myelopathy**  95  
    Santhosh A. Thomas and Garett J. Helber  

13. **Thoracic outlet syndrome (TOS): an enigma in pain medicine**  102  
    Narendren Narayanasamy and Rahul Rastogi  

14. **Patient with cervical radiculopathy**  109  
    Robert B. Bolash and Jianguo Cheng  

15. **Patient with axial neck pain**  116  
    Vikram B. Patel  

16. **Patient with thoracic spine pain**  123  
    Ankit Maheshwari and Jianguo Cheng  

17. **Patient with lumbar disc herniation**  131  
    Julian Sosner  

18. **Patient with lumbar facet-mediated pain**  137  
    Vikram B. Patel  

19. **Discogenic pain in the setting of lumbar spondylosis**  144  
    James Kelly and Jianguo Cheng  

20. **Unusual pain syndromes: epidural lipomatosis**  152  
    Vikram B. Patel  

21. **Unusual pain syndromes: Bertolotti’s syndrome**  155  
    Jiang Wu and Jianguo Cheng  

22. **Unusual pain syndromes: Baatrup’s disease/interspinous bursitis**  159  
    Jijun Xu and Jianguo Cheng  

23. **Lumbar spinal stenosis and neurogenic claudication**  164  
    Ike Eriator and Zachariah Chambers

Foreword

Case studies in pain management

Pain management is a dynamic and evolving specialty. The diagnosis and treatment of pain-related conditions have changed extensively in recent years. Major changes include not only surgical advances applying minimally invasive techniques and multidisciplinary approaches, but also multiple interventional techniques based on evidence. Numerous publications have described the anatomy, physiology, pathology, and technical aspects of interventional techniques. Other texts have been written describing various non-interventional modalities including pharmacology, psychology, behavioral aspects, and drug therapy. In recent years, pain medicine and interventional pain management have seen a substantial growth in the publication of journals and books.

However, there remains a major gap in pain management case studies. This text by Alan Kaye and Rinoo Shah is a monumental accomplishment toward fulfilling this goal. This text extensively describes neurological disorder cases in various categories. However, it does not stop with neuropathic pain cases; this text’s 72 chapters address various spinal disorders, musculoskeletal pain, visceral pain, headache and facial pain, cancer pain, and multiple special topics and complications.

Our understanding of a multitude of cases has grown over the years based on evolving evidence. The authors of the various cases in this text are of the highest caliber and are drawn from the highest levels of academia, research, and private practice. This text is directed not just to practitioners, but more importantly, to all types of clinicians engaged in managing painful conditions.

Once again, the contributing authors are appreciated for undertaking such a monumental task and providing a different perspective in managing painful conditions with the publication of Case Studies in Pain Management.
