The city of Cambridge received its royal charter in 1201, having already been home to Britons, Romans and Anglo-Saxons for many centuries. Cambridge University was founded soon afterwards and celebrates its octocentenary in 2009. This series explores the history and influence of Cambridge as a centre of science, learning, and discovery, its contributions to national and global politics and culture, and its inevitable controversies and scandals.

History of the College of St John the Evangelist, Cambridge

Thomas Baker (1656-1740) spent most of his long life at St John's College, Cambridge pursuing historical research. He was also an avid book collector, and bequeathed his valuable library to the college. His writings included a history of the college, which was edited by John Mayor and published in 1869. Volume 2, to which Mayor made a substantial contribution in his own right, is devoted to the Masters of the college between 1511 and 1840, and includes short biographies and anecdotes about their lives at Cambridge.

It describes visits by royalty, disputes with the authorities, appeals against elections, details of salaries, and more domestic matters such as policies on tobacco-smoking and the production of plays in the library. It makes fascinating reading for those interested in Cambridge, the history of education and the lives of these distinguished scholars and the society in which they moved.
Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value across a wide range of disciplines in the humanities and social sciences and in science and technology.
