Cambridge

The city of Cambridge received its royal charter in 1201, having already been home to Britons, Romans and Anglo-Saxons for many centuries. Cambridge University was founded soon afterwards and celebrates its octocentenary in 2009. This series explores the history and influence of Cambridge as a centre of science, learning, and discovery, its contributions to national and global politics and culture, and its inevitable controversies and scandals.

Handbook to the Natural History of Cambridgeshire
Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.

AT THE UNIVERSITY PRESS.
PREFACE.

It is the object of this Guide to afford help to those students of Natural History who desire to make observations in the Cambridgeshire district.

It is our pleasant duty to acknowledge the assistance we have received from many willing helpers in preparing the Guide.

In the first place we wish to tender thanks to the various authorities on the different subjects who have without remuneration written the articles included in the book.

To the Editors and Publishers of the Victoria History of the Counties of England we owe our thanks for the article on the Vertebrate Palæontology of the County which was written by Mr R. Lydekker for the County History of Cambridgeshire, and is here allowed to appear in advance. We are also indebted to them for the use of other materials acknowledged in the body of the work.

The Geological Map of the County was kindly made by Mr H. H. Thomas, M.A., of H.M. Geological Survey. Our thanks are due to him and also to the Controller of H.M. Stationery Office, who has permitted us the use of the topographical details inserted on the map of H.M. Ordnance
Preface

Surveys (4 miles to the inch), and of the Geological lines which are taken from the maps of H.M. Geological Survey. The map has been prepared at the Office of the Ordnance Surveys, Southampton.

The other maps were prepared for the Guide by Mr Edwin Wilson, of Cambridge.

To Mr R. H. Rastall, B.A., of Christ’s College, we offer our sincere thanks for the compilation of the Index.

Lastly, we desire to record our obligations to the Syndics of the University Press for their liberality in presenting copies of the work to members of the British Association, and to others connected with the Press for the courteous manner in which they have on all occasions assisted us.

CONTENTS.

PHYSIOGRAPHY. By J. E. Marr and W. G. Fearnside . 1—8

GEOLoGY. By W. G. Fearnside . . . . 9—50

VERTEBRATE PALEoNTOLOGY. By R. Lydekker . . 51—70

Zoology.

Mammals. By J. L. Bonhote . . . . 71—74

Birds. By A. H. Evans . . . . 75—99

Reptiles and Amphibians. By H. Gadow . 100—107

Fishes. By E. Vellé-Pope . . . . 108—113

Mollusca. By H. H. Brindley . . . . 114—138

Insects: Introduction. By W. Farren . 139—141

Orthoptera. By M. Marr . . . . 142—144

Neuroptera. By K. J. Morton . . . . 145—149

Hemiptera. By W. Farren . . . . 150—154

Coleoptera. By H. St J. K. Donisthorpe . 155—160

Lepidoptera. By W. Farren . . . . 161—172

Diptera. By J. E. Collin . . . . 173—180

Hymenoptera. By C. Morley . . . . 181—183

Myriapoda. By F. G. Sinclair . . . . 184—192

Arachnida. By C. Warburton . . . . 193—203

Crustacea. By W. A. Cunnington . . . . 204—208

Flora. By A. Wallis . . . . . 209—237

Prehistoric Archaeology. By W. L. H. Duckworth
(with maps shewing skull localities and ancient roads) . . . . 238—256

Appendix to the Article on the Mollusca . . . . 257—258

INDEX . . . . . . . . 259—260

MAPS.

Botanical Map . . . . . between pages 236—237

Geological Map is available in colour as a download from

ADDENDA AND CORRIGENDA.

p. 114, line 2. For “101” read “102.”
p. 115, line 18. For “many places” read “some places.”
p. 120, line 27. For “Vitrea nitida” read “Zonitoides nitidus.”
p. 120, line 32. After “Testocella halidotidea” insert “found by Mr H. Watson.”
p. 120, line 33 should read “It was introduced from Kew about twenty years ago by Mr R. I. Lynch.”
p. 121, line 8. For “a common form” read “a form found here and there.”
p. 121, line 8. Add “the first two in the tropical fern house and the last in the water lily pond. These introductions were discovered by Mrs Hughes.”
p. 128, line 19. Add “Both the records are by Mrs Hughes.”
p. 128, line 25. After “occurs” add “both species being found first by Mrs Hughes.”
p. 127, line 18. For “cristata” read “costata.”
p. 128. Add to Pelocyopa, Cardiidæ, Cardium edule, Linn.
p. 131, line 4. After “colony” insert “by Mrs Hughes.”
p. 131, line 21. Add “including a tumid variety found by Mr Watson.”
p. 138, line 8. For “Reid” read “Reed.”
p. 138, line 30. For “Somersham” read “Bluntsisham.”
p. 138, line 19. Add “This discovery was made recently by Mrs Hughes, who obtained in the same bed shells of Cardium and Macoma as well as of several non-marine species.”
p. 216, line 15. For “commencement” read “end.”
