CAMBRIDGE LIBRARY COLLECTION

Books of enduring scholarly value

Classics

From the Renaissance to the nineteenth century, Latin and Greek were compulsory subjects in almost all European universities, and most early modern scholars published their research and conducted international correspondence in Latin. Latin had continued in use in Western Europe long after the fall of the Roman empire as the lingua franca of the educated classes and of law, diplomacy, religion and university teaching. The flight of Greek scholars to the West after the fall of Constantinople in 1453 gave impetus to the study of ancient Greek literature and the Greek New Testament. Eventually, just as nineteenth-century reforms of university curricula were beginning to erode this ascendancy, developments in textual criticism and linguistic analysis, and new ways of studying ancient societies, especially archaeology, led to renewed enthusiasm for the Classics. This collection offers works of criticism, interpretation and synthesis by the outstanding scholars of the nineteenth century.

Pompeiana

Sir William Gell (1777–1836) was a British archaeologist well known for his drawings of sites and objects of classical interest. Gell published this new, two-volume edition of his *Pompeiana* in 1832, in an effort to describe the latest archaeological discoveries in the Roman city destroyed by an eruption of Mount Vesuvius in 79 CE. Concerned ‘that time will incalculably diminish the freshness of those objects ... stripped of their external coats by the rains of winter or the burning suns of summer’, he made it his task to describe what he had seen both through description and through his own numerous illustrations. In this second volume, Gell focuses on two Pompeiian homes and provides a commentary on the illustrative plates interspersed throughout the book. *Pompeiana* reveals both the history of the excavations, the individual finds, and the processes of field archaeology itself during a more romantic age.

Cambridge University Press has long been a pioneer in the reissuing of out-of-print titles from its own backlist, producing digital reprints of books that are still sought after by scholars and students but could not be reprinted economically using traditional technology. The Cambridge Library Collection extends this activity to a wider range of books which are still of importance to researchers and professionals, either for the source material they contain, or as landmarks in the history of their academic discipline.

Drawing from the world-renowned collections in the Cambridge University Library, and guided by the advice of experts in each subject area, Cambridge University Press is using state-of-the-art scanning machines in its own Printing House to capture the content of each book selected for inclusion. The files are processed to give a consistently clear, crisp image, and the books finished to the high quality standard for which the Press is recognised around the world. The latest print-on-demand technology ensures that the books will remain available indefinitely, and that orders for single or multiple copies can quickly be supplied.

The Cambridge Library Collection will bring back to life books of enduring scholarly value (including out-of-copyright works originally issued by other publishers) across a wide range of disciplines in the humanities and social sciences and in science and technology.
